

## English Professor Appointed Editor Of New Publication

Dr. Harrison E. Hierth, an associate professor of English, has been named editor of the new publication, "Texas College English."

The appointment was made by a committee of the College English Association of Texas. Dr. J. D. Thomas of Rice University chaired the committee and Professor Vernon Lynch of Southwest Texas State College heads the state association.

The new publication will be issued quarterly and concentrate on information about the teaching of English, not on literature. The publication will have a newsletter format.

Hierth hopes to have the first issue ready for the mails late in October. Some 500 members of the association will receive the first issue. Further circulation will be by subscription.

The College English Association of Texas is affiliated with the national and regional associations. The regional association will meet in Memphis on Nov. 1 and 2, coinciding with the South Central Modern Language Association meeting.

## Farmer Captures Beaver On Brazos

There are beavers on the Brazos after all. A farmer delivered one to A&M University this week.

More than 100 of the animals were transplanted along the Brazos River in 1939. Dr. W. B. Davis, head of the Department of Wildlife Management, commented.

This is the first one officially sighted since 1942, when a wildlife management student studied the animals' eating habits. In his report, Garrett Soulen found the beaver had moved from five to 30 miles from their original location.

The animals, noted for their fur and ability to build dams, were moved into the Brazos Valley area to help with the water conservation problem.

**A Helping Hand From Liz**  
Actress Elizabeth Taylor helps actor Richard Burton wipe perspiration from his face at Mexico City Airport after they eluded a crowd of about 500 teenagers on hand to greet them after their flight from Toronto. Miss Taylor lost a shoe in the escape to the airport's immigration room. (AP Wire-photo)

## A&M Women To Discuss Folk Music And Folklore

"Folk Music and Folklore of America" will be featured Friday at the first meeting of the A&M Women's Social Club.

Robert L. Boone, director of the A&M University Singing Cadets, and Mrs. B. J. Clack, a self-taught folk singer from Bryan, will be the guest performers.

Tea will be served at 2:45 p.m. in the Memorial Student Center

## NSF Gives Grant To A&M Research

The National Science Foundation has granted \$80,000 to the A&M University Research Foundation to support studies on "Meteorological Research Through Electronic Simulation."

The grant covers a two-year period. Dr. William Clayton, associate professor in the Department of Oceanography and Meteorology, will direct the research project.

Meteorological research by electronic simulation involves use of analog computers instead of digital computers.

Ballroom. Hostesses for the day will be wives of faculty members in the departments of agricultural engineering and chemical engineering.

Mrs. Garland Bayliss, president of the group, has extended a special invitation to all newcomers in the A&M System to come as guests of the Social Club. Those eligible for membership include local women who are members of families of present or former (including retired and deceased) employees of the A&M System, local women who are employees of the System and wives of local ministers and YMCA workers.

Besides Mrs. Bayliss, officers for 1963-64 are: general chairman, Mrs. Ernest T. Smerdon; vice president, Mrs. Paul Hensarling; secretary, Mrs. Joe S. Ham; treasurer, Mrs. Fred Brison; parliamentarian, Mrs. W. E. Eckles; and publicity, Mrs. James D. Smith.

A nursery has been established for the use of Social Club members at St. Thomas Episcopal Church. Mrs. Charles Heppburn is nursery chairman and may be con-

## 3 Profs Will Attend Sanitation Meeting

Three members of the A&M University College of Veterinary Medicine will attend the 67th U.S. Livestock Sanitary Association meeting Oct. 13-18 at Albuquerque, N.M.

They are Dr. L. C. Grumbles, Dr. Ted Franklin and Dr. R. W. Moore, all of the Department of Veterinary Microbiology.

Franklin, who leads the anaplasmosis research project at A&M, is a member of the association's national committee on anaplasmosis.

He said a wide variety of major livestock disease and control programs are discussed at the session.

The association was formed in 1897 in Fort Worth, largely as an outgrowth of the Texas fever tick control program led by Dr. Mark Francis of A&M.

## ATOMIC ENERGY STUDY

# Extension Service Gets Radiographers Training Job

A training program to prepare industrial radiographers for industry is under study by the A&M University Engineering Extension Service.

A special grant has been awarded by the Vocational and Technical Division of the U. S. Office of Health, Education and Welfare to develop a curriculum for industrial radiology schools.

A nationwide advisory committee, representing men from industry and state and federal agencies, held its initial meeting in Houston Tuesday.

Frank J. Konecny, an Engineering Extension Service executive assistant, said the advisory group discussed subject matter to be included in the program to train industrial radiographers.

The committee also outlined duties graduates may be expected to perform, Konecny added.

"Once the curriculum is approved," he said, "the next logical step would be the establishment of schools, including one at A&M."

Commenting on the program, Konecny said laymen are generally acquainted with hazards of radiation, but few are aware of its peaceful uses in industry.

"Radioisotopes have provided some of the most important peaceful benefits of atomic energy," Konecny said. "Such techniques permit manufacturers to

produce products more easily, quickly and cheaply."

A beam of radiation emitted from a radioisotope often provides information about material previously impossible, he said. Other benefits range from dollar savings and improved products to prevention of accidents through detection of faulty construction.

Eugene F. Kormenberg of Houston, who has several years experience in industrial application of radioactivity materials, will help prepare the course material.

His previous assignments have included inspection work on atomic submarines, gamma-ray inspection of a 630 mile pipeline in Alaska and consultant type

work for numerous firms. Kormenberg developed a method of well-head inspection for internal erosion and corrosion of flowing wells.

Licensed by AEC, he has trained company personnel in safe handling and use of radioactive materials and has assisted in production of radiation safety films.

Konecny, Kormenberg and H. D. Bearden, Engineering Extension Service director, are among the members of the advisory committee.

Others include A. G. Barkov of Chicago, a Natural Gas Pipeline Company of America official; D. E. Hamilton of Austin, representing Trinity Testing Laboratories; William H. Henken of Arlington, president of Henken Industries; Robert F. Lee of Dallas, deputy chief, Quality Control Division Headquarters for the U. S. Air Force.

Also Allan C. Love of Houston public health engineer; Sherrill D. McMillen of Washington, D.C. U. S. Department of Health, Education and Welfare; William O. Miller and Henry Thurston of the Atomic Energy Commission; Gary Robinson of Houston, regional manager for Materials Testing Laboratories; Gerald H. Tenney, Los Alamos Scientific Laboratory, and Martin C. Wukash of Austin, Texas State Department of Health.

## Graduate Dean Has Fellowship Info

Information about the Social Science Research Council's fellowships and other appointments now are available at the office of Wayne C. Hall, A&M University graduate dean.

The appointments generally are for mature scholars in the social sciences or for graduate students who have fulfilled all requirements except the dissertation for the Ph.D. degree.

The application deadline for most programs is Dec. 1.

**Ph. D. Language Examination**  
Examinations for meeting the foreign language requirement for the Ph. D. degree will be given Tuesday, Oct. 1st at 6:00 p. m. in Room 129, Academic Building. Students wishing to take this examination should leave the material over which they wish to be examined with the Secretary in the Department of Modern Languages not later than 5:00 p.m. Friday, Sept. 27th. Department of Modern Languages J. J. Woolket, Head 13447

Students interested in applying for a Rhodes Scholarship should confer with R. H. Ballinger, 302-C Academic Bldg. prior to October 9, 1963. 13819

All students who have completed Military Science, and have not received a branch assignment, are requested to report to the Chemistry Lecture Room at 1715 hours Friday 27 September 1963. An examination, to be used in conjunction with branch assignments, will be administered at that time. There will not be a make up examination. 13812

Changes in the list of courses for which any student is currently registered may be made only on the recommendation of the head of each department concerned and with the approval of the dean of student's college. Any course dropped after Sept. 25 shall normally carry a grade of "F". 13742
