

# Geneticist Prepares Paper About Texas Cow 'Punching'

New Yorkers will soon learn that the old art of cow punching in Texas is losing some of its glamour to cold automation and card punching.

Dr. T. C. Cartwright, geneticist with the Department of Animal Husbandry, will tell them how this is coming about when he presents a paper at the IBM Agricultural Symposium Sept. 23-26 at Endicott, N. Y.

Cattlemen still rely largely on the experienced eye in selecting and judging beef animals. But lately, A&M researchers have been demonstrating that electronic computers can do a thorough and objective job of cattle selection.

The workers collect large amounts of information on certain cattle types and lines, punch in the data on cards and then feed them through computers in the Data Processing Center. Out come suggested programs to follow.

The title of Cartwright's talk? What else but "Punch Card Cattle Judging"?

Research findings of two A&M University sanitary engineering professors are expected to aid cities in attaining greater capacity and efficiency with sewage treatment facilities.

They are described in the article "Heavy Loadings on Tricking Filters" by J. H. Sorrels and P. J. A. Zeller which appears in the September issue of the Journal of the Water Pollution Control Federation. The researchers operated batteries of primary and secondary experimental trickling filters in series for two years with settled sewage from the university treatment plant to obtain the data.

The work was sponsored cooperatively by the Department of Civil Engineering and Engineering Experiment Station.

Dr. J. B. Storey, A&M University horticulturist, will represent the Texas Agriculture Experiment Station at a pecan research conference Sept. 22-23 in New Orleans. Storey will discuss pecan research needs in Texas.

The conference is sponsored by the Federated Pecan Growers of the United States, an organization composed of various state pecan production associations.

An A&M University nuclear engineer has had a paper accepted

## 75 Attend Annex Telephone Meeting

Seventy-five delegates attended the annual Texas Statewide Telephone Cooperative conference held at the Research and Development Annex by the Engineering Extension Service.

The annual meeting featured speakers from industry and members of the Communications Technicians Training Center of the Engineering Extension Service.

The training program featured a wide variety of subjects relating to problems of the telephone industry, Ed Kerlick, chief of the job training and safety program, said.

Don Hall, an instructor with the Communications Training Center, served as conference director.

## CORPS FRESHMEN YEARBOOK PORTRAIT SCHEDULE

FRESHMEN IN THE CORPS will have their portrait made for the "AGGIELAND '64" according to the following schedule. Portraits will be made at the AGGIELAND STUDIO, one block north of the intersection at North Gate, between the hours of 0800 and 1700 on the days scheduled.

Uniform will be winter blouse. BLOUSES AND BRASS WILL BE FURNISHED AT THE STUDIO. EACH MAN SHOULD BRING HIS OWN SHIRT AND TIE. GH cap may be used for optional personal portraits.

September 26-27 E2, F2 & G2  
30-1 Oct. A3 & B3

October 1-2 C3 & D3  
2-3 E3, F3 & G3  
3-4 H3 & I3  
7-8 Maroon Band

(PLEASE NOTE: The studio will have NO BAND BRASS. Band members are requested to bring OWN BLOUSE & BRASS)  
October 8-9 White Band  
9-10 Squadrons 1-3  
10-11 Squadrons 4-6  
14-15 Squadrons 7-9  
15-16 Squadrons 10-12  
16-17 Squadrons 13-14  
17-18 Squadrons 15-17

for presentation at the Conference on Problems of Operating Research and Power Reactors Oct. 21-23 at Ottawa, Canada.

He is Donald E. Feltz of Sherman, chief of facility operation for the Nuclear Science Center.

"A Large-Volume, Continuous Gas Effluent Monitoring System" is the scientist's topic. He will

read his paper during the fission product detection session of the conference.

Feltz' research on the paper was conducted at the Nuclear Science Center.

John Randall, associate head of the center, said the conference is sponsored by the American Nuclear Society.

## San Marcos Academy Has Twin Girl Sharpshooters

AUSTIN (AP)—Two sharp-sighted young beauties have the boys at San Marcos Baptist Academy wide eyed.

The 15-year-old Tune twins, Annie and Tina, of Dallas, have just become the first females ever to make the rifle team at the academy. In fact, they are the first girls ever to make the attempt.

There were a few chuckles last week when the petite misses turned out for rifle team tryouts. The mirth turned to amazement when the girls racked up identical scores of 89 to place in the top six shooters.

The twins have been firing rifles for six years. They learned and have kept in practice at Camp Lake Hubert for girls in Nebraska where they will be counselors next summer.

## Bryan Internal Revenue Head Presents Plan For Employers

A workable plan to reduce the chore of employers in handling wage levies against their employees for delinquent federal income taxes was presented today by Clarence E. Carlson, administrative officer of Internal Revenue Service office in Bryan.

The plan, he said, solves the major cause for wage levies against delinquent workers, namely, that the amount to tax withheld from wages or salaries is lower in many cases than the amount of tax due at the end of the year.
