Intramurals

With five activities of this year's intramural program beginning Oct. 7, Charles E. McCandless, intramural director, is sending an urgent plea out for sophomore managers.

Approximately 20 slots have to be filled and McCandless asks interested persons to contact the intramural office this week. Managers, who officiate at games, receive intramural sweaters if they serve all year, McCandless said.

Swimming, the first intramural activity, began Monday in Downs Natatorium. Other swimming preliminaries will be held through next Monday. Class B races start at 5 p.m. Class A&C begin at 7:30 p.m.

The finals for Class B diving will be at 5 p.m. Oct. 8. Finals in all other events will be raced Oct. 9.

Freshmen flag football, horseshoes and bowling start Oct. 7. Class A&C basketball and handball begin on the same day.

NEW YORK (AP) — Duke Rodney and Porterhouse probably will compete in the Prix'd Amerique at Vincennes near Paris next winter. But Su Mac Lad, winner of the recent International Trot at Roosevelt Raceway, will stay home. Su Mac Lad is a gelding and ineligible.

2ND DEFEAT
Ags Fall 17-0

By JIM BUTLER

Coach Hank Foldberg used quarterbacks like they were going out of style Saturday afternoon but to no avail as the Aggies picked up their second defeat of the year, 17-0, at the hands of Ohio State.

If it hadn't have been for A&M's strong fourth down offense and defense it could have been much worse.

Jim Keller's punting and Travis Reagan's punt and kickoff returns consistently pulled the Cadet's out of a hole.

Keller kicked eight time for 353 yards and a 42-yard average including a booming 63-yarder from his own end zone. Reagan traveled 84 yards on three kickoff returns.

ALL FIVE A&M quarterbacks saw action with two other ex-quarterbacks running at halfbacks. Jim Linnstaedter started the parade and lasted for almost two periods when Keller took over.

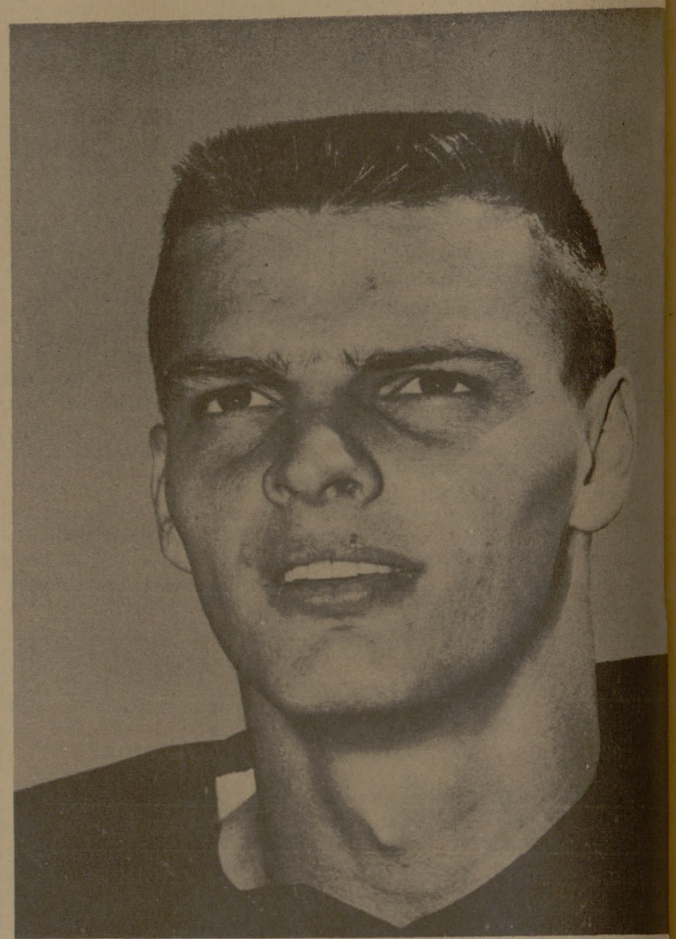

The tall defensive specialist finished out the half and gave way to sophomore Charles LaGrange in the third quarter. LaGrange drew his pink slip after three plays when he was stacked up for a 16-yard loss by the stout Buckeye defense.

JUNIOR DANNY MCILHANY replaced LaGrange and finished out the game. The fifth quarterback, John Sparling, saw action at halfback and on defense.

McIlhany got off to a bad start but achieved the most success in moving the sluggish Aggie offense. The junior from Houston fumbled twice on his first series of plays but recovered both times. On his next chance he guided the Farmers 50 yards from their own 19 to OSU's 31 before he fumbled the ball way to the Buckeyes.

In the middle of the fourth period, McIlhany took the Aggies down to Ohio State's 32 where an intercepted pass ended the drive.

In waning minutes of the game, A&M, at the hands of McIlhany, drove to OSU's 21 where a fourth down pass play was thwarted and Ohio State took over with 11 seconds to play.

AGGIE OFFENSE
 Jim Keller's punts supplied only A&M offense.

Terrell Flash
Punts Rivals
Into Trouble

"I don't remember if I ever kicked one that far before in a game, but I've been punting since my junior year in high school."

The speaker was tall Jim Keller, A&M's number 2 quarterback, one of the top defensive backs in the SWC and the Aggies' splendid punter.

He was referring to the 63-yard boot he boomed against Ohio State in Columbus Saturday afternoon. It was a pressurized kick, too, because the Aggies' scrimmage line was their own five and he was standing deep in the end zone. The Buckeye safetymen fielded the punt on Ohio State's 32-yard line.

After two games Keller has a 42.1 average for 15 kicks. His punting has kept the Aggies out of a lot of trouble.

What makes him such a consistently good punter?

"Mostly it is his ability to drop the football correctly on his foot," says Aggie backfield coach Leonard Brown. "He has good hands and his timing is real good. He has worked hard on his punting and it is paying off."

Keller, a 22-year-old senior, is the son of Mr. and Mrs. John Keller Jr. of Terrell, Tex. He has a brother, John, 23 and a sister, Kaye, 19.

He stands 6-4 and is long-legged, which gives him added leverage for punting.

He was a Class AA all-state quarterback at Terrell High School and was a member of the National Honor Society.

"Coaching him is an easy task," Brown says. "He's intelligent, retains instructions and works hard on execution."

What's going on at General Electric?

SEA WATER FOR A THIRSTY NATION

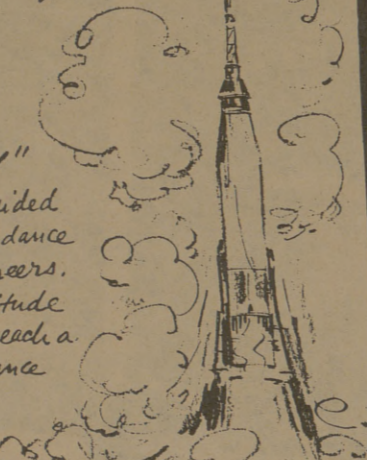

ENGINEERS CAN GET DOCTORATES WHILE WORKING AT G.E.

G.E. has joined with Brooklyn Poly to develop new ideas in graduate education. All qualified G.E. people eligible. While getting on-the-job experience, student takes 46 weeks in classes (in 3 years) at Company, taught by university profs and G.E. engineers. Student also takes graduate math, physics and engineering at the college. 4th year devoted to preparing dissertation.

With America's 1980 water needs predicted at 600 billion gallons a day (twice present volume), G.E. can report progress in its salt-water-conversion program. Its thin-film distillation method now produces water purity to within one part salt per million parts water. **FORECAST:** You may be drinking "fresh" salt water sooner than you think.

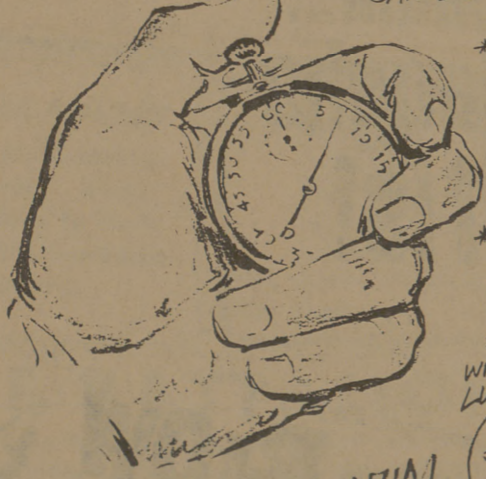

A "KEVHOLE IN THE SKY"

Glen, Carpenter, Schirra, Cooper... all guided into orbit by G.E. radio-command guidance system... operated by team of G.E. engineers. Atlas' velocity, flight-path angle and altitude all had to be minutely coordinated to reach a "kevhole in the sky." Altogether, G.E. guidance team has taken part in over 125 successful launchings.

WHAT A GE-225 COMPUTER CAN DO IN JUST 60 SECONDS

- * Read 400 80-column cards
- * Punch 100 cards
- * Read one-half million words
- * Write one-half million words
- * Print 900 typewriter lines
- * Send 3,000 words to Sweden
- * Receive and store 3,000 words from Paris

MAKING ALUMINUM SLIPPERY-ER

Industrial designers are excited about a great advance in lubricants from G-E research. Aluminum, though popular with metal fabricators, has always been tough to lubricate. A new family of lubricants now developed has friction coefficients about 1/5 those of conventional lubricants. This produces an affinity for aluminum which assures a wear-resistant film that adheres to the surface.

P.S. During 1962, 6,871 G-E employees gave \$330,544 to the colleges they had attended in appreciation for what their education had done for them. This was matched dollar for dollar by the General Electric Foundation.

Hargett Hurt
Against OSU

Halfback George Hargett was on the injury list Monday as the Aggies began preparations for their Southwest Conference opener with Texas Tech at Lubbock Saturday night.

Hargett hurt his knee in the game with Ohio State and his playing status won't be determined until mid week.

Tommy Meeks moved to the first team in his place.

We all make mistakes...

ERASE WITHOUT A TRACE
ON EATON'S CORRASABLE BOND

Touch-type, hunt-and-peck, type with one hand tied behind your back—it's easy to turn out perfect papers on Corrasable. Because you can erase without a trace. Typing errors disappear like magic with just the flick of an ordinary pencil eraser. There's never a telltale erasure mark on Corrasable's special surface.

Corrasable is available in light, medium, heavy weights and Onion Skin. In convenient 100-sheet packets and 500-sheet ream boxes. Only Eaton makes Corrasable.
