

Twelve Profs Aid Hartley, Statistics

Twelve professors from 10 departments at A&M will serve as associate members of the Institute of Statistics staff to assure the closest possible liaison, Dr. H. O. Hartley, institute director, announced Friday.

"These appointments represent the institute's strong interest in the application of statistics to research in the various subject matter areas," Hartley said.

The institute begins its first year of complete operations in teaching and research in September.

Some of the associate members of the institute staff teach courses in their departments, with considerable statistical orientation.

The associate members represent departments in agriculture, engineering and the sciences.

The associate members and their departments are A. R. Burgess, industrial engineering; T. C. Cartwright, animal husbandry (genetics); D. E. Cleveland, civil engineering; R. B. Davis, wildlife management; D. D. Drew, industrial engineering (computer science); W. F. Krueger, poultry science; H. A. Luther, mathematics; and B. C. Moore, mathematics.

Also included are R. O. Reid, oceanography and meteorology; J. D. Smith, plant sciences (genetics); and K. R. Tefertiller, agricultural economics.

Application Deadline Nears For Fulbright Scholarships

The deadline to apply for Fulbright Scholarships for graduate study abroad in 1964-65 nears, Dr. J. M. Nance, campus adviser for the program, said Monday.

"Any student desiring to apply for a grant under the Fulbright-Hays Act for graduate study abroad must submit an application not later than Oct. 25," Nance said. The applications should be turned in to Dr. Nance, head of the Department of History and Government. His office is 203 Nagle Hall.

The Institute of International Education administers the competition which involves above 710 Fulbright Grants, 45 Joint U. S.—Other Government Grants, and 89 Travel-Only Grants for study in 50 foreign countries.

A working knowledge of the native language is required for study in many of these countries. For others, only English is required.

Other eligibility requirements include U. S. citizenship, bachelor's degree or its equivalent before the beginning date of the grant, and good health. A superior academic record is always most helpful in gaining acceptance, Nance said.

Exchange Store Air Expresses Books To Better Serve Aggies

The Exchange Store has a new policy of filing orders for textbooks and laboratory manuals by air express at the store's expense, manager Carl Birdwell announced today.

He said the policy proved its value in trials mainly during the start-of-classes period this semester and applies mainly to that time each semester when students are buying books and laboratory manuals.

"We have the best staff and the finest student body in America and they are deserving of the best in service," Birdwell said. "This new policy emphasizes our old motto of 'Serving Texas Aggies Since 1807.'"

Birdwell said that the "airlift our expense" trials resulted in books and lab manuals being on the Exchange Store shelves in less than 24 hours. Most orders were filled within a day or two.

The sharp increase in graduate studies for which only limited stocks of books have been carried, late "out of stock" notices from publishers of undergraduate courses and limited storage space combined with record sales caused the temporary emptiness of the book bins, Birdwell said.

Agronomy Society To Select Winner

The A&M University Agronomy Society will announce the winner of their Local Speech Contest and conduct initiation of new members Tuesday night at 7:30 in Room 105, Agronomy Building.

This contest is to select a representative to the National Speech Contest at the National Student Agronomy Society meeting in Denver, Colorado, Nov. 17. Expenses will be paid by the local society.

Extemporaneous speeches were held at three different dates last week. Each contestant drew a slip of paper with three subjects concerning the general subject "Agronomy Today" and was allowed six hours to prepare his speech.

STPA Will Hold Dairymen's Meet Here Wednesday

The South Texas Producers Association, a dairymen's organization covering 57 counties in the Houston area, will hold its annual meeting Wednesday at A&M University.

The association promotes marketing and consumption of milk and its products.

About 700 members are expected to attend the session, which starts at 10 a.m. in Guion Hall.

The featured speaker will be R. G. Lyle, manager of United Dairymen of Arizona. Dr. I. W. Rupel, head of the Department of Dairy Science, will deliver an address of welcome.

Also on the program is a business meeting, a report by STPA manager Roy Smith of Houston, and an election of directors.

A&M Industrial Education Fulfills Growing Demands

Construction Equipment Distribution, a major which teaches young men the technique of heavy construction sales and supervision, is starting its second year in the Department of Industrial Education.

The course is an option of the department's industrial distribution major, a program that teaches marketing of a wide variety of industrial materials.

Dr. Chris H. Groneman, head of the Department of Industrial Education, said many opportunities are available to construction equipment distribution graduates.

"In order to serve their customers in the giant construction industry, distributors are anxious to strengthen their technical sales and supervisory forces," Groneman said. "They are looking for young men with a combined technical and business background to work into their organizations."

He said markets for construction equipment are growing continuously. The machinery is used for construction, logging, mining, transportation, public utilities and military defense.

THE CONSTRUCTION industry alone has the big task of meeting growing demands of super highways, freeways, skyscrapers, dams, bridges, factories and dwellings, Groneman added.

Construction equipment distribution at A&M leads to the bachelor of science degree in industrial distribution. Total program credits required are 146 semester hours. Courses include mathematics and

basic sciences, 23 hours; engineering sciences, 19 hours; industrial materials and processes, 25 hours; business and industrial services, 26 hours; humanities and social studies, 35 hours; and electives, 18 hours.

ELECTIVES INVOLVE such subjects as plane and topographic surveying, elementary and historical geology, and engine and tractor design.

Groneman said applications are still being accepted for the \$500 E. R. Boehck Scholarship, established for construction equipment distribution majors.

A&M was the second school in the United States to organize a curriculum in this field. The first was Clarkson College of Technology in New York, and the third was California State Polytechnic College.

Groneman said he has been assisted in establishing and maintaining the four-year course by the following members of the Associated Equipment Distributor's committee on education: George Closser of San Antonio, Cliff English of Dallas, National AED vice president W. C. Gardner of Hous-

ton, and Frank Skidmore, the AED's director of industry services.

CIVILIAN FRESHMEN

All Civilian Freshmen will have their portraits made for the "Aggieland '64" at the Aggie-land Studio, North Gate, between October 9 and October 18.

Dark Coats, white shirts and ties will be the dress.

CORPS FRESHMEN YEARBOOK PORTRAIT SCHEDULE

FRESHMEN IN THE CORPS will have their portrait made for the "AGGIELAND '64" according to the following schedule. Portraits will be made at the AGGIELAND STUDIO, one block north of the intersection at North Gate, between the hours of 0800 and 1700 on the days scheduled.

Uniform will be winter blouse, BLOUSES AND BRASS WILL BE FURNISHED AT THE STUDIO. EACH MAN SHOULD BRING HIS OWN SHIRT AND TIE. GH cap may be used for optional personal portraits.

(PLEASE NOTE: The studio will have NO BAND BRASS. Band members are requested to bring OWN BLOUSE & BRASS)
