

SUPPLIES DAILY MILK

A&M Dairy Plays Important Role

By MIKE JACKSON
Special Writer

The A&M University Dairy plays an important part in the lives of most Aggies every day. It supplies about 800 gallons of milk daily and about 200 gallons of ice cream weekly.

The two key men of the dairy operation are Dr. R. E. Leighton, in charge of production, and Dr. Carl Vanderzant, in charge of manufacturing. Both are professors in the Department of Dairy Science.

Most of the milk is consumed in the dining halls, Dr. Vanderzant said. Some milk is sold to the Memorial Student Center and across the counter at the Dairy Processing plant. During the summer months the South Texas Dairy Producers Association buys the milk from the university dairy and in turn sells milk to the university in the early fall, when the A&M production is inadequate to meet the demand.

THE DAIRY operates on an 800-acre farm with 220 cows of which 180 are in production. The dairy is west-northwest of the campus and has a picture window for visitors to watch the milking. Holstein, Jersey, and Jersey Brahman Cross are the breeds of dairy cattle. The dairy has its own re-

Noted Physicist Plans Monday Lecture Here

Dr. John H. Williams, president of the American Physical Society, a former member of the Atomic Energy Commission and a professor of physics at the University of Minnesota will speak at 4:30 p.m. Monday in Room 146, Physics Building.

"Experimental Program on the Linear Accelerator at the University of Minnesota" is Dr. Williams' announced topic.

He received his B.S. from the University of British Columbia and his M.A. from the University of California. In 1958 the University of British Columbia awarded him a D.Sc. Honorary and in 1960 Pennsylvania Military College bestowed a Dr. Eng. Honorary on him.

He has been a National Research Council Fellow, an official investigator with the Office of Science Research and Development and Group Leader, Physics Division, Los Alamos Scientific Laboratory, University of California.

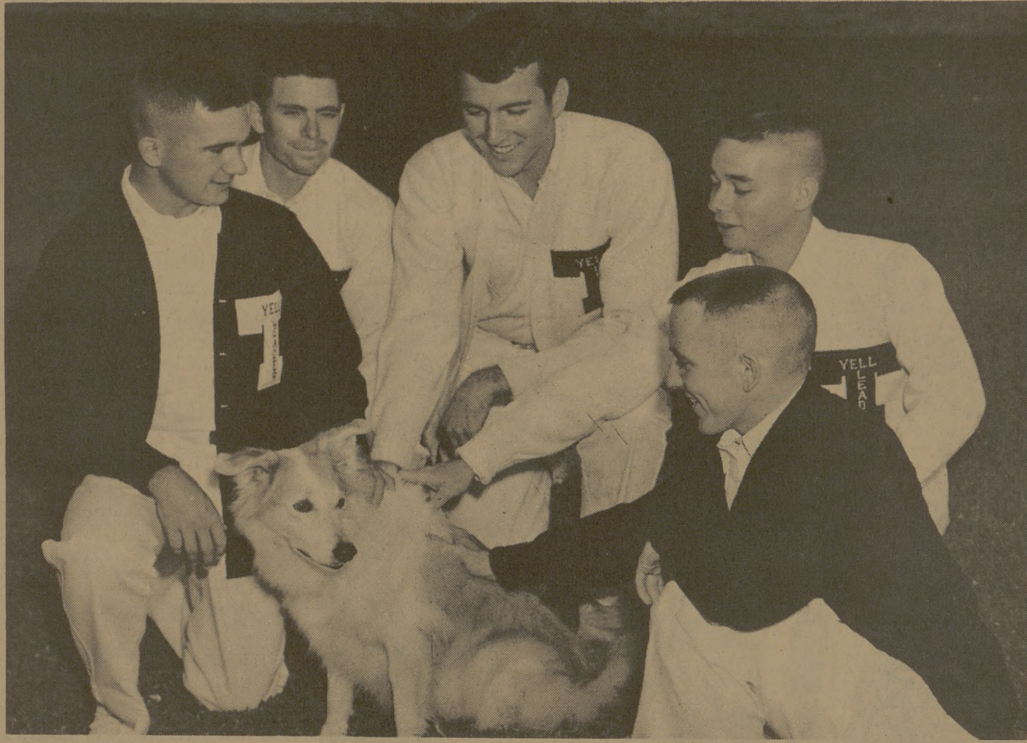

Dr. Williams is director of the Division of Research of the AEC in 1958-59 and served the following year as a commissioner. He also has served as a member of the Ramsey Committee, a special study committee.

placement herd which numbers 120 heifers, all under two years of age.

EACH COW receives a health test regularly for diseases. Before the cows are milked automatically, they are hand milked enough to get a sample from each quarter. These samples are examined very carefully for possible disease.

THE MILK is picked up once a day by a stainless steel tank truck. The truck brings the milk back to the dairy processing plant where it is pumped into one of two 1,000 gallon tanks. These tanks keep the milk cooled from 35 to 40 degrees Fahrenheit.

The milk is bottled Monday, Wednesday and Friday and is pasteurized and homogenized before bottling.

Yell leaders, left to right, Frank Cox III, Harry Haggard, Royce Knox, Michael Marlow and Ted Hopgood Jr. prepare Reville for the invasion of Fort Worth Saturday for the semester's first corps trip.

Accent On Youth For Astronauts

HOUSTON (AP)—The accent is expected on youth Friday as the national space agency selects from 10 to 16 astronauts.

The Manned Spacecraft Center has indicated the average age of the new group will be about 30, compared to 32.5 for nine trainees selected last year and 34.5 for the seven Mercury astronauts picked in 1959.

As the center prepared for the formal announcement of the new space team members, there also was indication one of the original seven—Maj. Donald K. Slayton—soon may be restored to flight status.

IT WAS REVEALED Wednesday night Slayton has initiated action to resign his Air Force commission. A National Aeronautics and Space Administration spokesman said in Washington accept-

ance by the Air Force would open the way for NASA doctors to permit Slayton to take part in a two-man Gemini mission or a three-man Apollo moon shot.

Slayton was the only one of the original seven not to make a Mercury solo flight. An erratic heart rate prompted Air Force doctors to bump him from a scheduled orbital mission last year.

SLAYTON became coordinator of astronaut affairs at the space craft center.

The Houston Chronicle said Thursday it had learned the identity of three of the new group to be named Friday.

The Chronicle named three Air Force captains—Charles A. Bassett, 30, a native of Berea, Ohio; Theodore C. Freeman, 33, a native of Haverford, Pa., and David R. Scott, 30, of La Jolla, Calif.

Barbecue Honoring Bill Moore Planned

A giant barbecue, honoring East-Central Texas Senator William T. (Bill) Moore, will be held in Bryan on October 24.

The affair, sponsored by "Brazos County Friends of Bill Moore," will be open to the public at no charge. It is set for 6:30 p.m. at the old Bryan Field on Highway 21.

"Bill Moore Appreciation Day" has been officially proclaimed for Brazos County by County Judge W. C. Davis Jr. Similar proclamations were issued by Mayors Roland Dansby of Bryan and Ernest Langford of College Station.

In their proclamations, the trio of officials cited Moore's 15 years of service in the State Senate and one year in the Texas House as a representative from Brazos County. The proclamations commended the senator for "his splendid record of achievements."

W. N. (Flop) Colson of Bryan will act as master of ceremonies at the event, which will feature a brief tributary program.

"There'll be no speeches," said Colson. "Just an old fashioned get-together to express our appreciation and gratitude to Senator Moore for the good work he has done in the Texas Legislature."

Large groups from each of the nine counties in the 11th Senatorial District will be on hand for the occasion. It was announced that the general public has been invited to the Brazos County event.

Counties in the 11th District are Anderson, Brazos, Burleson, Falls, Freestone, Limestone, Lee, Robertson and Navarro Counties.

"Dear God..."

When Grandmother was a girl, prayer was no stranger to her. She learned early to turn her thoughts to God and to ask Him for courage and for guidance.

The country was younger then. Men were still probing physical horizons in search of a better life for their families. Their quest took them to the sea in ships, or along the danger-filled trails to the West. Sometimes the women shared their peril. Other times, they stayed at home and waited, and that was even harder. But whichever their course, they prayed.

Our horizons are different today, and our lives filled with less danger. But we need prayer just as much — if not more — than we did in Grandmother's day.

Remember that prayer is our greatest source of strength. If the habit of prayer has become unfamiliar to you, start rediscovering it by attending church services regularly.
