

\$5,000 Set As Campus Chest Goal

By MIKE ODOM
Battalion Staff Writer

"Five thousand dollars has been set as the goal of the Campus Chest this year," said Alan Peterson, chairman of the Student Welfare Committee.

Peterson said that \$3,000 was collected in last year's campaign and that he was sure that if the student body will support the drive, 100 per cent of the goal can be reached.

This year's drive will be kicked off at a banquet in the Assembly Room of the Memorial Student Center Thursday at 7 p.m. The presidents of the civilian dormitories and the commanding officers of all the outfits in

the Corps of Cadets are to be present in order that the methods of collecting the funds, and how they are to be turned in, can be explained by Peterson. At this time he will also discuss the ways the money will be used.

W. J. Graff, Dean of Instruction, will speak on why students and other people connected with A&M should contribute to the Campus Chest campaign.

Peterson said the money collected will be used in the following ways:

Sixty per cent of the funds will be used for Aggies in need of financial assistance. The

money is given, not loaned, on the condition that it will enable an Aggie to remain in school. This assistance applies to the family of any Aggie if it is needed to allow the Aggie to continue his education.

Last year the Campus Chest donated \$154 to help pay for an Aggie's hospital bill. In addition to direct assistance, the Chest arranged for aid from the Wichita Falls A&M Mother's Club and from several other organizations on the campus.

Thirty per cent of the funds will be divided three ways with 10 per cent going to the College Station Community Chest, 10 per cent to the Brazos County Tuberculosis Association, and 10 per cent going to the March of Dimes.

He added that the remaining 10 per cent is given to various, deserving organizations throughout the world.

One of the organizations the Campus Chest gave money to last year was the World University Service. This group receives financial assistance from universities throughout the world and uses it to help provide food, medical expenses and other needs of university students in underprivileged countries.

Money was also sent to University College Pius XII in South

Africa to aid in a scholarship program.

Peterson said that one proposed project of the Campus Chest is the adoption of an orphan from the Cal Farley's Boys' Ranch in Amarillo. He said that this project was started last year and that he hoped this year it would be successful.

Peterson said that civilian dormitory presidents and commanding officers will be in charge of the collection of the money from their respective organizations. The organizations that contribute 100 per cent will be awarded a certificate of commendation and the organization

that contributes the most over 100 per cent will be awarded a plaque that is to be kept by the winning organization.

"This is an award that every organization should work hard to win and one that all would be proud to own," said Peterson.

"Tubs will be placed at the exits of Kyle Field during football games for persons who wish to contribute to the drive and aren't members of an organization making a unified collection," said Peterson. "Also tubs will be placed in the lobby of the Memorial Student Center and at the exits of G. Rollie White Coliseum."

Charts will be placed in the lobby of the MSC that will make a comparison of the fund raising of the organizations that are participating in the campaign.

Pat Nance, commanding officer of Squadron One, the outfit that won the plaque last year, said Squadron One was going to win the award again this year and challenged all other participating organizations.

The motto of the Campus Chest is "A dollar from an Aggie for an Aggie," and for this reason every Aggie should participate in the drive, said Peterson. The drive will extend from Oct. 28 to Nov. 27.

COLLEGE BOWL ELIMINATIONS
Eight finalists will be chosen.

Completion Nears For 'College Bowl'

Thirteen students have been chosen as "College Bowl" semifinalists and will compete on Tuesday and Thursday at 7:30 p. m. in Room 113 Nagle Hall to determine eight finalists.

They are William J. Darling, math; Howard M. Head, pre-veterinary medicine; Jerry H. Jessup, English; Lawrence Kelmanson, finance; Bobby L. Limmer, pre-medicine; Alan C. Love, English; Daniel D. Mast, English; John McClure, history; Charles B. Organ, education and psychology; James E. Ray, English; John A. Schmidt, electrical engineer-

ing; Calvin C. Simper, history; and Keith B. Ward, physics.

THE EIGHT finalists will appear on KBTX-TV on Oct. 29, at 11:30 a.m. From the eight finalists, five will be chosen to go to New York and appear on the NBC "General Electric College Bowl" program on Nov. 10.

Four of the members will compose the A&M University team and one member will act as an alternate.

THE 13 SEMIFINALISTS have been grouped into teams and will compete as a team and individually Tuesday and Thursday nights, said their coach, Dr. Harry P. Kroitor, associate professor of English.

Team one consists of Jessup, Kelmanson, Schmidt, and Simper; team two, Darling, Limmer, Mast, and McClure; two three, Head, Organ, Ray, and Ward, Love will be used as an extra.

Development by United States Steel Corporation to cut costs and time of erecting wire fences, the fencing machine will go into action at 2 p.m. at the agricultural engineering warehouse grounds. The demonstration, staged by the Tennessee Coal and Iron Division of United States Steel, is being held in collaboration with the university's agricultural extension service. The public has been invited to the showing, which will be attended by farmers, ranchers and agricultural specialists from many Texas points.

Research Group Awarded Grant

A \$21,000 grant has been made by the National Science Foundation to the A&M Research Foundation to support a study titled "Volumetric Properties of Polar Gases."

Dr. C. R. Sparger, A&M Research Foundation vice director, said the grant covers a two-year period and is under the supervision of Dr. Philip T. Eubank, assistant professor in the Department of Chemical Engineering.

Eubank said the project measures pressure and temperature of fixed amounts of gases. Polar gas molecules behave like magnets and have positive and negative charges which create measurement problems.

He said the study, while mostly in the realm of basic research, has some application to the chemical engineering industry.

Fence Erecting Machine Shown Here Thursday

The "Fury Fencer," a revolutionary machine which takes the drudgery out of fence erecting, will have its first Texas showing here on Thursday.

Developed by United States Steel Corporation to cut costs and time of erecting wire fences, the fencing machine will go into action at 2 p.m. at the agricultural engineering warehouse grounds. The demonstration, staged by the Tennessee Coal and Iron Division of United States Steel, is being held in collaboration with the university's agricultural extension service. The public has been invited to the showing, which will be attended by farmers, ranchers and agricultural specialists from many Texas points.

The "Fury Fencer," which has been cited as possibly "the most significant advance in fence building in decades," is drawn by a standard tractor and is operated by only two men. It eliminates much of the labor normally associated with erecting wire fences on farms, ranches and along highways and railroad rights-of-way.

Today's Thought

"We know there are no errors in the great eternal plan, and that all things work together for the final good of man."

Marlow Lays Down Law On Yell Practice Conduct

Yugoslavia Subject Of MSC Lecture

Yugoslavia, a Communist Satellite that frequently repudiates the principles of Marxism, will be the subject of a film-talk at 8 p.m. Thursday in the Memorial Student Center Ballroom.

Gene Wiancko, a former radio narrator, producer and writer prior to entering the motion picture field, will present the film. The event is sponsored by the MSC's Great Issues committee.

One of the film's highlights

Steele Rites Set Thursday

Funeral services for Marvin Edward Steele, 51, a campus security officer since 1961, have been set for 10 a.m. Thursday in the Phillip-Luckey Funeral Home Chapel in Caldwell.

Steele died Tuesday at his farm near Caldwell. He was born in Bullard and was graduated from Whitehouse High School. Steele served in the Army from 1938-1952.

The Patrolman joined the A&M faculty in 1952 as a military property custodian.

Survivors include his wife and one brother.

Too Many Drunks, Too Much Damage

By MIKE REYNOLDS
Battalion Staff Writer

Head Yell Leader, Mike Marlow, has laid down some definite plans for the Midnight Yell Practice Friday due to the misfortunes encountered before the University of Houston game.

Too many drunks and toilet paper, old area Corps students cutting in front of the band, and crowds congregating outside the gates of Kyle Field were the three major problems present at the last Yell Practice, according to Marlow.

"Yell Practice has been degraded over the last few years into something that doesn't represent the spirit," said Marlow. "Upperclassmen have passed on to freshmen the idea that the only way to go to yell practice without a date is to go drunk. We can't do anything about this phase of the problem though. It is up to the individuals to discipline themselves."

"THE TOILET PAPER business had got to stop," continued Marlow. He added that any cadet caught with toilet paper Friday night would find himself before the Senior Court.

Commanding officers of the various outfits will meet Wednesday night to try and clear up the problem created when the old area students and civilians join the march to Kyle Field.

"The Corps students from the old area will be asked to form their lines down the streets running along the side of Sbis Dining Hall and in front of the old dormitory area. They should wait until the band and the new area Corps students have passed before they try to join the march.

"We can't do anything about the civilians but we hope that they will cooperate with us," the Yell Leader added.

ROSS VOLUNTEER JUNIORS will form a "V" outside the gates to Kyle Field to aid the band in entering through the small portals, the major place of property damage and personal injury over the past few years.

All students that have dates and those that do not wish to march to the stadium should stay back

Valichi Talks; Signals Wave Of Crackdowns

United States Senate hearings with gangster Joseph Valachi were viewed as another step forward in eradicating organized crime by Houston Police Inspector Larry Fultz, a guest instructor at an A&M University police officers school.

Comments by Fultz on organized crime came during a talk on problems of modern day policemen at the 37th General Course for Law Enforcement Officers, sponsored by the Engineering Extension Service.

Fultz said the public needs to know the significance of organized crime, which he added "is just as much a problem in Texas as large metropolitan cities in northern states."

"WITHOUT PUBLIC support," Fultz commented, "police are handicapped in enforcing the law. Putting organized crime in the public spotlight will help eradicate organized crime in the United States."

Valachi, a long-time underworld figure and former head of the Philadelphia Cosa Nostra, has named leaders of various mobs in Senate testimony.

HE ADDED that Americans continue to resist regimentation by police.

"When you write a traffic ticket today," Fultz said, "you know it's being done without the full wishes of the community."

The people who are frequently contacted by police are the ones who have the highest opinions of law enforcement officers, Fultz said, quoting a study made in Houston.

The A&M police school, headed by Wallace Beasley, will continue through Nov. 15.

'Mousetrap' Snaps On Thursday Night

"The Mousetrap" by Agatha Christie will be presented by the A&M Consolidated High School junior class Thursday and Saturday nights at the school.

Mrs. Jane Alston, director of the play, has solved the problem of how to keep a mystery mysterious.

Several pages from the script of each play has been removed in order to keep the play a mystery, even to the actors themselves. Closed rehearsals will be held after the missing pages are restored to the cast. This will be the only time the real murderer is known except on performance nights.

Extension Service Employees Honored At Retirement Party

Sixteen retiring employees of the Agricultural Extension Service will be honored with a dinner in the Ballroom of the Memorial Student Center at 7 p.m. Wednesday.

The retirees will be presented with plaques by the County Judges and Commissioners State Association in recognition of their service, stated V. G. Young, state agricultural agent.

THE DINNER is being co-sponsored by the headquarters staff of the Extension Service and by Epsilon Sigma Phi, an honorary service fraternity for members of the extension service.

Of those being honored, five are from the headquarters staff. They are Roy Snider, Dr. Kate Adel Hill, Mrs. Eloise T. Johnson, Tad Moses and Floyd B. Beamblossom.

SEVEN RETIRING County Home Demonstration Agents from across the state include Mrs. Gertrude Dryman, Corsicana; Clara Pratt, Lubbock; Mrs. Katie Pruitt, Beaumont; Ruth Ramey, Richmond; Pearl Taylor, Falfurrias; Myrna Holman, Rankin and Mrs. Ione Resch of Palestine.

County Agricultural Agents Robert Pate of San Antonio, Jack Louis of Kaufman, E. R. Lawrence

Faculty Fellowship Continues Meetings

The Faculty Interfaith Fellowship held its second meeting of its current series at 7 a.m. Wednesday in the All Faiths Chapel, with the "Origin and Nature of Man," discussed from three religious viewpoints.

Dr. Melvin Eisner of the Department of Physics, spoke on Judaism, while Dr. Aly Hamid Mohamed, Department of Forestry, lectured from a Moslem viewpoint. Dr. Robert Powell of the Department of Plant Sciences talked on Christianity.

The discussion for next Wednesday will be "Sacramental."

Wire Review

By The Associated Press
U. S. NEWS

NEW YORK — An American-owned ship was strafed by unidentified aircraft early Tuesday off the coast of Cuba. Havana Radio later said its air force attacked a ship in the area that was carrying saboteurs and arms.

The owners of the American vessel, the J. Louis, reported no casualties during an hour-long attack, in which flares were dropped to light up the target. Shells damaged her superstructure and hull and set fire in the forecabin of the 33,000-ton vessel.

BERGSTROM AIR FORCE BASE — "We're keeping our fingers crossed because things are going so smoothly."

That was the way Col. Robert C. Oliver, mission commander for the Military Air Transport Service MATS, summed up the first hours of gigantic "Exercise Big Lift."

Big military transports, carrying soldiers of the 2nd Armored Division to West Germany, flew out of Texas air bases with clockwork precision.
