

## Aggie Players Opener Slated For Next Week

By JAY FERGUSON  
Battalion Special Writer

The Aggie Players, directed by C. K. Esten, will present their first performance this year Somerset Maugham's "The Constant Wife", Monday through Saturday, at 8:00 at Guion Hall.

"The Constant Wife" is a three-act sophisticated comedy in modern marriage which attempts to present some of the problems met by people who are adjusting to married life, said Esten.

What do married people do after they cease to love each other, is the theme of the production.

In the cast of "The Constant Wife" will be Lee Hance as Mrs. Culver; Rhea Smith as Constance and Bob Hipp as Constance's husband, John Middleton; Adriene Stout as Martha Culver, spinster sister of Constance; Sally Wynn as Marie-Louise Durham; Renee Reece as Barbara Fawcett; Kip Blair as Mortimer Durham; Bill Thornton as Bernard Kersal; and Terry Mayfield as Bentley, the butler.

## Better Roads Are Valuable, Survey Shows

A&M University is making available copies of a report on value of time saved to commercial motor vehicles through use of improved highways.

Authors are Charles R. Haning and William F. McFarland of the Texas Transportation Institute at A&M.

The report, originally written for the Bureau of Public Roads, assesses dollars and cents value of time savings to trucks and buses on improved highways.

THE STUDY concentrates in industry operations of commercial carriers in the southwest United States.

According to the report, time savings must be put to productive use if they are to be of real value to commercial highway users. There are numerous obstacles that restrict utilization of time saved. Some of these obstacles include route restrictions, methods of figuring driver compensation, fixed terminal locations, rigid scheduling, and equipment inter-change agreements.

THE VALUE of time, as developed in the study, is not necessarily the value arising from use of improved highways. Various intangible benefits are not included in the report.

Data from the report show that the estimated range of value was highest for contract and private carriers and lowest for common carriers of general freight. Range of estimated values for the composite freight vehicle was \$3.16-\$4.11 per hour of time saved.

Winning Dorm Sign

Law Hall came up with the winning football Arkansas in Little Rock. Charlie's Food sign this week as the Aggies prepare for Market at North Gate presented this week's Saturday night's tilt with the University of prize to Chuck Hook, dorm president.

## Graduate Student Increase Credited To Business Trend

A&M University has 42 active candidates for the Master of Business Administration degree as compared with 22 students a year ago.

Why this great increase? The trend toward professional education in business is the most important factor, Dr. John E. Pearson, head of the School of Business Administration, believes.

Taking a new booklet from his desk, Pearson cited it as an example of the national interest in graduate or professional training in business administration.

"Ten years ago," he said, "there would not have been enough interest in graduate business administration courses to justify this booklet."

BUSINESS STUDIES are described as being in a period of transition comparable to that undergone earlier in other professional fields of study.

"What we call professional business administration studies now start at the junior level. The first two years are pretty much general curriculum studies," Pearson said. The year of graduate study results in three years of professional studies following two years of general curriculum. Medical and legal schools and colleges accept students only after a period of broad studies as a basis for the professional courses.

Business studies have been offered here for many years, with the Bachelor and Master of Business Administration degrees conferred since 1955.

## Young Demos, Republicans To Try Once More

By MIKE REYNOLDS

An Executive Committee of the Academic Council decision forced the Texas A&M Young Democrats to move their meeting Wednesday night from the Memorial Student Center to the Wesley Foundation Building of the A&M Methodist Church.

The committee denied recognition for the club, as well as for the Young Republicans, as official clubs because "it is undesirable to have organizations on university property engaging in partisan politics," according to a letter from James P. Hannigan, Dean of Students.

"IT IS HEARTBREAKING to be denied official recognition after so much work has been done building our organization into what it is now, said Randall W. Bland, club president.

"This is not a party issue, and I plan to work hand in hand with the Young Republicans to gain recognition from the administration," continued Bland.

"I hope to convince the administration that we exist only for student participation in political education outside of the classroom," he said.

"AS AN UNOFFICIAL club we would have to rent a room, and we would be able to do that only when an official organization didn't have first call," concluded Bland.

The letter from Hannigan explained that recognition was denied on the basis of Article II of the University Articles, and that the administration felt that off-campus organizations in the Brazos County area provided enough facilities for political study by university students.

The meeting was concerned with adoption of a club constitution and a presentation of the "Facts and Fallacies of Goldwater Conservatism" by Theo Harris of the Department of History.

Bland stated after the meeting that no matter what the decision of the administration was, it would not slow the functions of the club in the least.

## KBTX-TV To Air Teenage Pageant

Residents of the Bryan-College Station area will be able to watch the Miss Teenage of America pageant over KBTX-TV in Bryan, beginning at 9 p.m. Friday.

The Singing Cadets of A&M University will provide the vocal music for the hour-long show to be presented over the nationwide CBS television network.

Jim Mitchell, program director for KBTX-TV, said the station's request to carry the show was approved Wednesday.

R. L. Boone, director of the 60-voice men's chorus, said the group will rehearse in Dallas Thursday and Friday. The Aggies will sing the title song "Miss Teenage of America" and special and background music.

Following the Friday night performance, the Cadets will present a concert on the campus of Texas Women's University in Denton.

The concert will begin at 7:30 p.m. with a reception scheduled for 8:30 to 10 for the cadets and other Aggies. A dance, beginning at 9 p.m. will follow the concert and will end at 1 a.m. Admission to the dance is \$1.50 and only couples will be admitted. Stags and couples may attend the reception and there will be no admission charged.

Dress for the dance is semi-formal—suits and ties for boys.

## Invitation Deadline Is Today In MSC

Deadline for January graduates to order invitations is 4 p.m. Thursday. Orders may be placed at the finance window in the lower level of the Memorial Student Center.

Leather booklets are priced at \$1, with paper booklets, 25 cents; French folds, 10 cents; engraved cards, \$2.50 a hundred, and printed cards, \$1.50 a hundred.

## Central Intelligence Agency Schedules Local Interview

A Central Intelligence Agency's Southwest personnel representative will visit A&M University Nov. 18-19 to interview students interested in the field of strategic intelligence.

The CIA is responsible to the National Security Council of which President Kennedy is chairman. Mission of the agency is to provide information needed by the Council.

## Methodist Youth To Aid Milk Fund

The Commission on Missions of St. Paul's Methodist Church in Bryan will sponsor a "trick-or-treat" for CROP, the Christian Rural Overseas Program, Thursday evening.

The young people of the church will have milk carton and tin can "banks" and will wear the CROP insignia on their costumes.

Any size contribution will be taken. One cent buys twelve cups of milk and three cents buys a balanced meal for a hungry person overseas.

After "trick-or-treat," the children will gather at the church fellowship hall for refreshments and games.

## Esten To Attend Theater Conclave

C. K. Esten, an assistant professor of English, will attend the Southwest Theater Conference being held jointly at the University of Texas and Southwestern University Friday and Saturday.

Esten, president of the Texas Educational Theater Association, will discuss association activities. He will remain in Austin Sunday to appear before the legislative council of the Interscholastic League One-Act Play Contest to argue new proposals.

## AEC Fellowships Are Available Here

Two types of the Atomic Energy Commission's special fellowships for 1964-65 are available at A&M University and applications must be submitted by early in 1964, Graduate Dean Wayne C. Hall said recently.

The fellowships are for graduate studies in health physics and in nuclear science and engineering.

A&M is one of 10 universities participating in the health physics program which involves formal course work here and on-the-job training at an AEC facility. Approximately 60 universities participate in the nuclear science and engineering program.

EITHER PROGRAM may be used by successful students in completing requirements for a Ph.D. degree, but the initial term of appointment is 12 months.

Applicants for first-year participation in either program are required to take the Graduate Record Examination. Special fellowships in nuclear science and engineering are available for graduate students already at an advanced level.

ALL APPLICANTS in the health physics program should be U.S. citizens, hold a bachelor's degree, and be less than 35 years of age.

The basic annual stipend in the health physics program is \$2,500 with an additional \$500 allowed for a wife and each dependent child. The nuclear science and engineering program stipend is \$2,400 for the first year, \$2,600 for the intermediate year and \$2,800 for the terminal year, plus \$500 allowed for a wife and for each dependent child. The fellowship awards also include tuition and travel allowances.

Further information may be obtained from Dean Hall's office in the Richard Coke Building.

## Great Issues Talk Is Reset

The Great Issue presentation, "Crisis in Higher Education," scheduled Friday on the A&M campus, has been postponed until Spring.

Issues Chairman Hal Brown said panelists for the program had been forced to cancel their appearance due to commitments elsewhere.

Tentative speakers on the program were Gov. John Connally, Speaker of the House Byron Tunnell, Dr. Harry Ransom, chancellor of the University of Texas, and William Steven, editor of the Houston Chronicle.

Brown said the same speakers would be invited for the Spring presentation.

Scaffold Goes Modern

George Price, supervisor of the Preventative Maintenance Shop of the Department of University Services, operates an electrically driven scaffold used to aid building repairs. The machine moves up and down and over ledges, with a two-man crew.
