

Police To Study Modern Methods

Rookies as well as veteran policemen will be on the campus Monday for a four-week general course for Law Enforcement Officers, Wallace D. Beasley, coordinator of police training at A&M, announced.

Modern methods and techniques of law enforcement work will be stressed throughout the school, Beasley added. The program is sponsored by the Engineering Extension Service.

The instruction will include such subjects as police-community re-

lations, criminal evidence rules, arrest without warrant, crowd control and mob psychology.

Speakers during the first week include Police Chief John L. Guseman of Victoria, Inspector Larry Fultz of Houston, Attorney B. H. Dewey Jr., of Bryan and George Lumpkin, deputy police chief of Dallas.

Field trips are included on the agenda, with one to the Texas Department of Corrections in Huntsville and another to the Department of Public Safety in Austin.

Still Has An Eye For Girls
He's 75, and a lot of beauties have come and gone since he became a performer, but France's lively Maurice Chevalier can still quickly find the pretty girls at any party. Here he snuggles up close to young Sandra Dee as photographers snap the scene during a party in his honor at Hollywood's Universal International studio. They're both making a film at the studio. Tax Credits For Research Proposed By Speaker Here

A proposal that additional federal tax credits be allowed all companies for research and development work was voiced here by a prominent instrument supplier, Philip A. Sprague, president of the Hays Corp. of Michigan City, Ind., to a symposium on campus.

Such tax credits would tend to spread research and activities throughout the nation, he contended.

SPRAGUE IS A PAST PRESIDENT of the Instrument Society of America and delivered the technical keynote address for the nineteenth annual Symposium on In-

strumentation for the Process Industries. The meeting attended by more than 325 engineers and other specialists, mostly from the oil, gas and chemical industries of the Southwest, opened Wednesday and ends Friday.

"Wouldn't a tax credit for research and development be a constructive move both for government and industry?" Sprague asked during a discussion of the financial status of the instrument suppliers and buyers.

THE ENGINEERS ALSO heard a warning "that the impact of instrument technology upon American culture is closer than we like to admit and time is running out for determining the end result." This warning came from J. H. Hill of Union Carbide Corp. of Seadrift.

"Whether or not automation, the Twentieth Century version, modernization turns back to itself will be determined to a great extent by you and me and the companies for which we work," Hill said.

HE DESCRIBER one change being ultimately a civilization living in a decadent society.

"Or we can realize that we are in our hands the most powerful tool of a social revolution, strive to keep the use of instrument technology a creative science which will contribute to a culture — a trail blazing, vibrant, alive society," Hill said.

He described automation as nothing more than a new way to express the new version of modernization.

Prairie View Head To Receive Honor At Vet Group Meet

SAN ANTONIO — The only veterinarian in the nation ever to become president of a college, Dr. Edward B. Evans, president of Prairie View A&M College, will be singularly honored here Monday.

Evans, who was called back to Prairie View College to become its president in 1946 while on leave to establish a school of veterinary medicine at Tuskegee Institute, will be cited for "distinguished service to the people, to education and to the veterinary medical profession" by the Texas Veterinary Medical Association.

The honor will be presented at a luncheon in the Granada Hotel at the opening of Texas Veterinary Medical Association's 51st annual three-day convention which will bring to San Antonio top authorities on new treatments and preventive measures for ailments of farm animals, as well as household pets.

A native of Missouri, Evans' parents died when he was a school boy and he worked his way through Iowa State College performing odd jobs where he could find them. He graduated in 1918 with the degree of Doctor of Veterinary Medicine.

Long a member of the Texas and American Veterinary Medical Associations, Dr. Evans, active in Boy Scout, YMCA, rural youth work and other civic endeavors, received the Hoblitzelle Award for the Advancement of Texas Rural Life with its gold medallion in 1953.

Electric Managers To Attend School

A special conference for municipal electric system managers will be held here Monday through Wednesday.

The session is the ninth of an annual series known as the Municipal Electric Short School and sponsored by the Department of Electrical Engineering.

John S. Denison, associate professor of electrical engineering, said the school will be of interest to managing personnel of electrical systems and to power plant superintendents, operating superintendents and other municipal employees.

Subjects and speakers the first day are "Basic Circuit Theory" by Denison; and "New Light Sources and Their Application," N. P. Fox of the General Electric Company in Houston.

In the afternoon is a discussion of the Texas Municipal Power Pool in which Dr. M. G. Reko, A&M electrical engineer, will give an engineering study. Other discussion members are Jack Ard of Greenville, Calvin Beard of Bryan, Jack Ogle of Garland and W. S. Robson of the Brazos Electric Power Co-operative in Waco, all managers of municipal electric systems.

On Jan. 28 are "Use and Application of Distribution Transform-

ers," D. H. Mullen of the Westhouse Electric Corporation in Athens, Ga.; "Training Agency Personnel Programs," Marvin H. Kel, San Antonio City Public Service Board; and "Kilowatt-hour Metering Errors," A. J. D. A&M associate professor of electrical engineering.

That afternoon, school managers will tour training facilities at Research and Development Agency of Texas A&M.

C. A. Brannon of the City of Austin will lead off on the last day with a discussion of sales promotion of municipal utilities. J. Hancock also of the City of Austin, will conduct a question and answer session.

The last talk, "Maintenance Satisfactory Service Conditions will be made by Denison.

Engineers To Hold Annual Symposium

More than 400 engineers, mostly from the Southwest, will be on campus through Friday noon for the nineteenth annual Symposium on Instrumentation for the Process Industries.

The oil, gas and chemical industries especially will be represented at the symposium.

Our Mightiest Hour
Rockets have a certain thrust — and no more. Nuclear bombs have a certain explosive force — and no more. Every powerful device on which man depends for military defense or scientific advance is limited in its energy.
But FAITH has no limits. It turns with trusting eyes to the Almighty, whose power is infinite, whose love is everlasting. It is constantly confident and courageous — because its resources cannot be exhausted.
In perilous times a great nation always finds its might in spiritual resources. And today, significantly, one of the essential elements of survival in which our stockpile dwarfs the Russians is FAITH. Khrushchev has no secret installation to match the thrust and force generated in the souls of our people by our hundreds of thousands of churches.
Think on these things as we worship together next Sunday morning . . . our mightiest hour!

Sunday Deuteronomy 8:11-20	Monday Isaiah 40:25-31	Tuesday Jeremiah 16:14-21	Wednesday Daniel 4:28-33	Thursday Ephesians 1:15-23	Friday Colossians 1:3-12	Saturday Revelation 5:6-14
