

**BATTALION EDITORIALS**

**It's A Long Way—  
But There Is A Way**

It's a long way to Lubbock and Texas Tech—that's where the Aggies will be tonight looking for that seventh straight conference win.

There are probably not too many Ags who are going to be able to travel the distance between here and Lubbock. But The Battalion staff has discovered that it cost just pennies to send a GOOD LUCK telegram. We know because we sent one to Coach Metcalf and his team.

Now we would like to see a bunch of telegrams go out to Lubbock. For about \$2 one can get 15 words or less off to the team in Lubbock. Just send it to:

Coach Shelby Metcalf  
Lubbock Municipal Coliseum  
Lubbock, Texas

While we're at it we might as well go all out for that bunch of cagers. They've been playing some real fine ball this season and have given all us Aggies something to talk about. The best thing we can do is let those men know we appreciate the extra effort they've been putting out to get some of the games.

The exact time of arrival in College Station for the team's chartered flight is not available, but sometime late today Easterwood Airport should have some idea.

Now there wouldn't be a thing wrong with several thousands Ags being on hand to greet those cagers when they step out of that airplane. And that means win, lose or draw—and we're pretty confident that the latter two possibilities are out.

**Barry Blasts Rights Bill**

THATCHER, Ariz. (AP) — Republican Sen. Barry Goldwater told a Negro college student Monday night the civil rights bill passed by the House "may cause more trouble than good" in the fight to end racial discrimination.

Goldwater, campaigning for the Republican presidential nomination, answered students' questions in a crowded cafeteria at Eastern Arizona Junior College.

Goldwater said the section granting the attorney general more power to deal with defiance of school integration orders may be hopeful.

"I don't think the rest of the package is going to accomplish much, in fact it may cause more harm than good," he said.

The senator said he doesn't see how the government can enforce the section barring discrimination in public accommodations.

**CADET SLOUCH**

by Jim Earle

"Of course I'll excuse you if you boys have an appointment with your doctor in Lubbock, however, it does strike me strange that two east Texans would have a doctor in the Panhandle!"

**WRIGHT or WRONG**

by John Wright

The scheduled talks between Sir Alec Douglas — Home and President Johnson come at a time when the "special relationship" between England and the United States needs to be utilized, if never again.

With the U. S. rather miffed, to say the least, at British firms selling buses to Cuba and willing to extend more than five years of credit to the Soviet Union, and the British peevish at the fact that the U. S. is financially supporting Sukarno who, in turn, is causing the British to use 6,000 troops to keep down Indonesian guerilla warfare on the Malaysian border, it is rather obvious that the two countries could stand an amicable agreement.

Sir Alec has already expressed his wish for an Anglo-U. S. foreign policy "That would be in tune and harmonious to that of the U. S." President Johnson has also expressed his desire for such accord by dispatching a trouble-shooting team to co-ordinate Anglo-American policy on the Cyprus situation.

Despite the opinion of those who feel that the "special relationship" between England and the U. S. is fast due for the scrap heap, one should pause and remember that if ever there are two nations in the world today who are able to sit down and talk things over for the mutual interest of both countries, it is Britain and the United States.

This in no way means that our foreign policy should be subject to the approval of the British every time we feel like taking a step, but it would not hurt at all for both countries to present a united front, and thus both benefit.

The very nature of Britain's geographical position and her

population leave her no choice but to export or die. We, who are in contrast, well able to prosper by means of domestic trade, tend to sometimes forget England's plight and consequently allow our own foreign policy to run right across theirs, when it could if handled right, parallel theirs and benefit both of us.

The immediate application of such a policy could be at the moment of Russia's antagonistic attitude toward a settlement of the Cyprus issue. The British spent almost 10 haggard years trying to rid themselves of the island of Cyprus. Except for the right to maintain bases there, they probably wouldn't be too perturbed if the whole island sank.

As for the U. S., we certainly have no ambition to occupy Cyprus for national gain. I can't help thinking what the effect may have been on the Russians if we had replied to Krushchev at the same time and in the same vein as Prime Minister Home's terse rebuke.

**INTELLIGENCE EXPERT**

**Soviet Secret Police Agent Asks United States Asylum**

WASHINGTON (AP) — Yuri I. Nosenko, a Soviet secret police officer, defected to and asked political asylum from the United States, the State Department reported Monday.

The State Department refused to give details of Nosenko's job in the secret police, but Soviet sources in Geneva said he was a legal expert of the Soviet Foreign Ministry and had specialized in disarmament for several years.

In this post, the sources said he had access to Soviet defense secrets and negotiating plans for the disarmament conference which resumed in Geneva Jan. 21.

It was believed in Geneva that Nosenko's information could be of immense value to Western disarmament negotiators and defense strategists. But this defection also might harden the Soviet position in the two-year-old conference.

Nosenko, 36, reportedly described himself as a "staff officer" of the KGB, the top-level Soviet agency in charge of gathering intelligence and counter-intelligence. The three initials stand for Komitet Gosudarstvennoy Bezopasnosti.

A terse statement by State Department press officer Richard I. Phillips said that Nosenko had been assigned on tem-

porary duty to the Soviet delegation attending the disarmament conference and that he had requested asylum prior to his scheduled recall last Wednesday.

Phillips refused to answer any questions about the circumstances of the defection.

Swiss officials said Nosenko had crossed into France Feb. 4 over one of the many crossing points near Geneva, using his diplomat's passport. He had been living in a small Geneva hotel with about 10 other Soviet defectors.

Soviet sources said Nosenko is married and has two children but brought no member of his family to Geneva.

Some U. S. officials, however, indicated that Nosenko might be in the United States at some secret place being questioned by intelligence agents.

Soviet sources said Nosenko is married and has two children but brought no member of his family to Geneva.

**Remember Next Tuesday, February 11, 1964 is the LAST DAY**

to register for DANCE CLASSES for the spring Semester for only per semester

Learn Ballroom and Contemporary Dancing

Instructor — Manning Smith

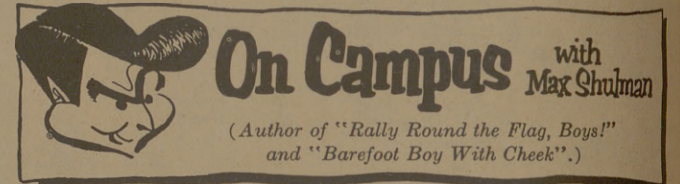

Registration — 7:30 to 8:00 p. m. in the M.S.C. Ballroom

Classes every Tuesday

Beginners — 8:00 to 9:00 P. M.

Advanced — 9:00 to 10:00 P. M.

An M.S.C. Dance Committee Presentation

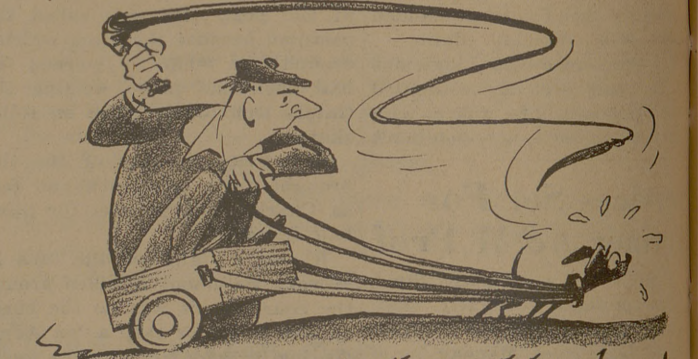

**On Campus** with Max Shulman

(Author of "Rally Round the Flag, Boys!" and "Barefoot Boy With Cheek".)

**ARF!**

Benjamin Franklin (or The Louisville Slugger, as he is better known as) said, "A penny saved is a penny earned," and we, the college population of America, have taken to heart this sage advice. We spend prudently; we budget diligently. Yet, despite our wise precautions, we are always running short. Why? Because there is one item of expense that we consistently underestimate—the cost of travelling home for weekends.

Let us take the typical case of Basil Metabolism, a sophomore at UCLA majoring in avocados. Basil, a resident of Bangor, Maine, loved to go home each weekend to play with his faithful dog, Spot. What joy, what wretched smiles, when Basil and Spot were re-united! Basil would leap into his dogcart, and Spot, a genuine Alaskan husky, would pull Basil all over Bangor, Maine—Basil calling cheery halloos to the townfolk, Spot wagging his curly tail.

The results were not all Basil had hoped

But the cost, alas, of travelling from UCLA to Bangor, Maine, ran to \$400 a week, and Basil's father, alas, earned only a meagre salary as a meter-reader for the Bangor water department. So, alas, after six months Basil's father told Basil he could raise no more money; he had already sold everything he owned, including the flashlight he used to read meters.

Basil returned to California to ponder his dilemma. One solution occurred to him—to ship Spot to UCLA and keep him in his room—but Basil had to abandon the notion because of his roommate, G. Fred Sigafoos, who was, alas, allergic to dog hair.

Then another idea came to Basil—a stroke of genius, you might call it. He would buy a Mexican hairless chihuahua! Thus he would have a dog to pull him around, and G. Fred's allergy would be undisturbed.

The results, alas, were not all Basil had hoped. The chihuahua, alas, was unable to pull Basil in the dogcart, no matter how energetically he beat the animal.

Defeated again, Basil sat down with G. Fred, his roommate, to smoke a Marlboro Cigarette and seek a new answer to the problem. Together they smoked and thought and—Eureka!—an answer quickly appeared. (I do not suggest, mark you, that Marlboro Cigarettes are an aid to cerebration. All I say about Marlboros is that they taste good and are made of fine tobaccos and pure white filters and come in soft pack or Flip Top box.)

Well, sir, Basil and G. Fred got a great idea. Actually, the idea was G. Fred's, who happened to be majoring in genetics. Why not, said G. Fred, cross-breed the chihuahua with a Great Dane and thus produce an animal sturdy enough to pull a dogcart?

It was, alas, another plan doomed to failure. The cross-breeding was done, but the result (this is very difficult to explain) was a raccoon.

But there is, I am pleased to report, a happy ending to this heart-rending tale. It seems that Basil's mother (this is also very difficult to explain) is a glamorous blond aged 19 years. One day she was spotted by a talent scout in Bangor, Maine, and was signed to a fabulous movie contract, and the entire family moved to California and bought Bel Air, and today one of the most endearing sights to be seen on the entire Pacific Coast is Spot pulling Basil down Sunset Boulevard—Basil cheering and Spot wagging. Basil's mother is also happy, making glamorous movies all day long, and Basil's father is likewise content, sitting at home and reading the water meter.

Pacific Coast, Atlantic Coast, the great Heartland in between—not to speak of Alaska and Hawaii—all of this is Marlboro Country. Light up and find out for yourself.

**Job Calls**

**WEDNESDAY**

Collins Radio Company—Electrical engineering, mechanical engineering, industrial engineering and computer science.

Soil Conservation Service, US DA—Agricultural education, agricultural engineering, agronomy, animal husbandry, range management and wildlife management.

Continental Can Company, Inc.—Electrical engineering, industrial engineering, mechanical engineering and business administration.

Department of Water and Power, City of Los Angeles — Civil engineering, electrical engineering, mechanical engineering and sanitary engineering.

The Pure Oil Company — Chemical engineering, electrical engineering, geological engineer-

ing, geology, mechanical engineering and petroleum engineering.

Celanese Corporation of America — Chemical engineering, chemistry, electrical engineering and mechanical engineering.

Southwestern Investment Company — Business administration.

**THURSDAY**

International Business Machines Corporation — Chemical engineering, electrical engineering, industrial engineering, mechanical engineering, petroleum engineering, accounting and mathematics.

Lockheed-California Company, Division of Lockheed Aircraft Corporation — Aerospace engineering, chemical engineering, civil engineering, electrical engineering, mechanical engineering, mathematics and physics.

**TEXAS INSTRUMENTS ANNOUNCES  
CAMPUS INTERVIEWS  
FEBRUARY 25-26**

TI's family of professionals at all degree levels works at 89 different specialties in...

**ENGINEERING AND THE  
PHYSICAL SCIENCES**

TI is a multidivisional company with the APPARATUS DIVISION conducting interviews during above dates. This division operates at two locations each with different product lines:

Dallas: Government product lines in missile electronics, space systems, undersea warfare systems, surveillance systems, communication systems, and tactical weapon systems. Technologies include radar, infrared, magnetic detection, sonar, data links, microwave devices, electro-optics, digital communications, data processing, and guidance.

Houston: Industrial and commercial electronic products that measure, display, record, and process data for control — including strip-chart recorders, test instruments, component test systems, digital instrumentation, and automatic supervision systems.

... your College Placement Officer to arrange interview during TI's visit — or to examine TI's "Career Opportunity Guide" which details the many professional career possibilities awaiting you at Texas Instruments. If inconvenient to arrange campus interview during dates noted above, send resume or request for further information to Mr. J. W. Troster, APPARATUS DIVISION, Dept. 154...
