

Polygraph School Slated

Another group of students will undergo training to become polygraph examiners at A&M University July 20 through Aug. 28, D. C. Betts, supervisor of the Engineering Extension Service sponsored program, announced. The school, organized in 1963, has attracted law enforcement officers from Texas and other states.

TEACHERS LEARN MATH ... attending two week session on modern math.

New Math Draws Heavy Enrollment

The nursery rhyme woman who lived in a shoe and had so many children she did not know what to do would have been at home among 150 elementary school teachers attending a two-week workshop at A&M University.

The workshop planned originally for 30 teachers within commuting distance of the A&M campus is devoted to the teaching of modern mathematics, the "new math."

Teachers have come from Texas and New Mexico, Dr. Paul Hensarling said. He heads the Department of Education and Psychology.

The heavy enrollment brought change of plans, particularly in meeting rooms.

Dr. Neville Bremer of the Amarillo schools is visiting professor and workshop director. He is the author of textbooks and professional articles and has directed many workshops. At Amarillo he is assistant superintendent for instruction.

The "eminence" of Bremer was cited by Hensarling as one of the reasons for the overflow workshop attendance.

The phasing in to the elementary

schools in September, 1965, of the new textbooks using the "discovery method of teaching mathematics" was cited as another major reason for the workshop popularity.

"Another reason," Hensarling continued, "is that this is the first elementary education workshop held at A&M in a number of years."

Assisting Bremer in leading the workshop are Associate Professor Roger V. McGee of the A&M mathematics department; A. R. Denny, supervisor of elementary education in the Bryan schools; Hugh Lancaster, supervisor of mathematics in the Bryan schools, and four graduate assistants.

The workshop meets from 9 to 11 a.m. and 2 to 4:30 p.m. Monday through Friday for two weeks.

The "new math" will be introduced in Texas junior high schools this fall after being taught last academic year in senior high schools.

Bramer holds degrees from West Texas State University, Colorado State College and the University of Houston.

He began his teaching career in 1940 and went to Amarillo in 1950 as an elementary school principal.

THANKS!
