

# Graduate Student Council Adds Voice To Government

BY HERBERT L. ERNEST  
1964-65 Graduate Council  
Vice President

With the graduate student enrollment increasing each year, there has become an increasing need for an active voice in student government. To act as the official voice of the graduate students, a graduate student council has been recently organized. This graduate council which is

composed of twelve members selected at large meets fortnightly. The council later elects its officers from the twelve representative graduate students and is the central governing body for the graduate students at A&M University.

Objectives of the council are to aid in promoting a suitable academic program for all graduate students in compliance with the rules and regulations of the University administration; to provide leadership in regulating extra-curricular and college social activities in a manner that will foster the social and cultural phases of graduate student life.

The council is composed of various committees which deal specifically with graduate student problems. As a new student you may not be directly concerned with the graduate student problems, but as a member of a great institution of science and research you will or should be interested in the overall student opinion which is expressed in the student government.

## TO COLLEGE SENIORS and GRADUATE STUDENTS

You will be particularly interested in the fact that the College Master:

- ... has no war exclusion clause.
- ... affords excellent savings and insurance features.
- ... provides a unique family plan feature.
- ... is guaranteed by a top company.
- ... gives Insurance Now, with premium deposits deferred until you are out of school.

If you desire immediate information Call

## A NEW ROAD

"Let's find a new road!" That's a game we play often when we take a family ride. These little journeys of discovery have led us to some beautiful, serene sections of our community that we never would have seen if we'd stayed on the busy highway. At times, life itself can seem like a crowded, noisy highway. The years rush by . . . we promise ourselves that some day we'll take the time to look around us and try to understand where we are and why . . . but worldly interests tend to fill every minute to the brim. We wonder why the pleasures that we work so hard to obtain fail to bring us happiness . . . and we sense that life has a deeper meaning, if we could find it. The Church can guide you and your family to a new, wonderful road. Discover the warm fellowship, the renewed courage, the refreshing peace of mind that grow from membership in your neighborhood church.

Sunday Leviticus 26:3-13	Monday Leviticus 26:14-20	Tuesday Psalms 25:1-10	Wednesday Isaiah 30:15-21	Thursday Jeremiah 31:7-14	Friday Matthew 23:1-15	Saturday John 16:4-15

## AMONG THE PROFS

# History Professor Publishes 'San Antonio Defenses, 1863'

A faculty member has an article published in the latest issue of the Texas Military History Quarterly.

He is Allan C. Ashcraft, assistant professor of history, who is the author of numerous articles on the Civil War period.

His latest effort is titled, "San Antonio Defenses, 1863." It deals with the defenses thrown up by Confederate leaders who were fearful of a powerful Union invasion into the heart of Texas.

The Texas Military History Quarterly is a publication of the National Guard Association of Texas.

Several members of the Engineering Extension Service are attending the Texas Vocational Industrial Teachers meeting in Austin.

Featured speaker at the conference, which continues through Friday, is Gov. John C. Connally.

Representing A&M are H. D. Bearden, EES director; W. J. Konecny, assistant director; B. M. Hackney and J. B. Whiteley, teacher trainers, and Ed W. Kerlick, EES instructor.

Konecny will serve as moderator of Friday's program.

Dr. L. R. Richardson, head of the Agricultural Analytical Services, is in Washington, D. C., this week participating in a meeting of consultants on the Southern Interstate Nuclear Board.

The board is preparing a report to the Atomic Energy Commission. One of Richardson's special research areas is preservation of foods by irradiation.

Carter Litchfield, assistant professor in the Department of Biochemistry and Nutrition, is attending the American Oil Chemists' Society symposium this week at State College, Penn.

The symposium deals with "Qualitative Methodology in Lipid Research."

Reagan Brown, Extension Sociologist, will be the speaker for the annual banquet of the Burton Chamber of Commerce on Monday. He will speak on the subject "Small Towns—Complex Problems—Great Opportunities." Brown points out that there are 3,063 population centers in Texas. Out of these popu-

lation centers, 2,656 or 87 percent have less than 2,500 people. Towns like Burton are to be commended for a grass roots chamber of commerce effort working to make their communities better.

Louis E. Jenkins, a member of the Texas Engineering Extension Service's supervisory development staff, has been named director of technical-vocational education at Cisco Junior College.

He has been teaching classes for industrial and municipal supervisors throughout Texas since 1962. A graduate of Sul Ross College and the University of Houston, Jenkins has a bachelor's degree in industrial education and a master's in industrial management.

Dr. Donald E. Farris of the Department of Agricultural Economics and Sociology will participate in meetings during the latter part of August in Washington, D. C. and at Purdue University.

In Washington, the associate professor will contact representatives of the USDA's Foreign Agricultural Service and agricultural attaches of major meat importing and exporting countries to obtain

data on prospects of expanding foreign sales of Texas livestock and meat.

At Purdue, Farris will meet with members of the Western and National Regional Livestock Marketing Technical Committee and coordinate regional research in livestock marketing.

George D. Berry, former Tournau College faculty member, has joined the Engineering Extension Service as an instructor in the heavy equipment operation school.

Berry, a member of the LeTourneau school's staff for seven years, received his bachelor's degree at LeTourneau.

W. B. Mansfield of A&M University's Engineering Extension Service will address a national meeting of the Administrative Management Society in New Orleans Friday and Saturday.

Mansfield, chief instructor of Engineering Extension Service supervisory development programs, will talk on "Effective Communications." He will demonstrate an instrument called a "communication" used to test people's ability to communicate.

# Some Of Nations Leaders Were Once Students Here

The 1964-65 freshmen at A&M will be on "hallowed ground at Aggeland. For it has been over this small plot of earth in Brazos County that some of the nation's outstanding leaders have walked.

It has been over these few acres that many former students first received that valuable training in leadership, discipline and knowledge. The freshman of today is little different from the freshman of 1910, 1920, or 1930. For the most part, all have come from various sections of Texas and from all types of economic backgrounds. However, it is safe to say that many were farm boys without much money, boys who "worked their way through" at A&M.

To name all the successful graduates of Aggeland would require a volume; to tell the story of each Aggie would require a library.

Their accomplishments in the world of business, industry, the military and other fields are outstanding.

In the military field, for example, many "former freshmen" have been successful.

Lt. Gen. Bernard A. Schriever, Class of '31, is commander of the U. S. Air Missiles Program, Maj. Gen. Alvin A. Luedek, Class of '32 is general manager of the Atomic Energy Commission. A list of others would make a lengthy story in itself.

The public utility industry contains many A&M graduates who hold high positions. For instance, E. H. Leavey, Class of '15, is chairman of the board of International Telephone and Telegraph. Lester T. Potter, Class of '28, is president of Lone Star Gas Company. J. B. Thomas, Class of '12, is president

of Texas Electric Service Company. W. W. Lynch, Class of '22 is president of Texas Power and Light Company. J. L. Bates, Class of '25, is president of Central Power and Light Company. Price Campbell, Class of '13, is president of Texas Utility Company.

The oil industry is another field where Aggies have made their mark to the top. J. W. Foley, Class of '32 is president of Texaco, Inc.

H. Dunn, Class of '25, is president of Shamrock Oil and Gas Company. W. C. McGee, Jr., Class of '21, is president of Tennessee Gas Pipeline Company. J. L. Sewell, Class of '27, is president of Delhi-Tulsa Oil Company. Delbert Brockert, Class of '34, is president of British American Oil Company. W. T. Hickey, Class of '31, is president of Sun Oil Company of Canada. W. Doherty, Class of '22, is president of the Mound Company.

Former students like H. A. Sawyer, Class of '16, president of Lone Star Cement Company; Tyree Bell, Class of '13, president of Austin Road Company; J. W. Astin, Class of '33, president of Republic National Bank; George Mitchell, Class of '40, president of Christian Mitchell-Mitchell; M. T. Halbow, Class of '30, petroleum engineer and geologist and Leonard Hobbs, Class of '16, vice president of United Aircraft Company, have proved themselves successful.

## ARE ALL GREAT CHEFS TEMPERAMENTAL?

We can't really say if they're all temperamental . . . but we know about the chef at Ramada Inn! His disposition is so miserable . . . his voice so loud and abusive — if his food wasn't so spectacular he'd be out of work tomorrow. Temperamental isn't the word for him. But the way he prepares a steak! Easily angered! Salsas like you've dreamed of! Mean and sassy? Well, we didn't hire him because he was a nice guy.
