

## Room Reservations Commence Aug. 17

The following dormitory assignments will be in effect for the Fall Term 1964: CIVILIAN: Hart, Puryear, Walton, 19, 21, Law Ramps 1-6, Legett, 13, 20, and 22. CADET CORPS: Dormitories 1 through 12 and 14, 15, 16, 17 and 18. ATHLETIC: Henderson, Dorm 15 (78 rooms) and Law, Ramps 7-9.

Students in the following categories who will live in a dormitory for the Fall semester 1964, should report to the Housing Office between 8:00 a. m., August 17 and 5:00 p. m., August 21 to reserve rooms:

Students who will live in Cadet dormitories.

Civilian students who have not yet reserved rooms in civilian dormitories in accordance with procedure established during the Spring semester may reserve available rooms on a first come-first served basis during this period.

Civilian students who signed for rooms in the Spring should make certain their room reservations cards have been received by Housing Office.

Students who have a \$20.00 room deposit on file will not have to pay any additional fees to reserve rooms. Other students must pay \$20.00 deposit in order to reserve rooms. Students who sign up for Fall but do not cancel their reservations by August 15 will forfeit their \$20.00 room deposit.

Dormitories 14, 15, 16, 17, 18, 19, 20, 21 and 22 will not be available for students to transfer belongings thereto at the end of the summer session. Students who will live in one of these dormitories in the Fall may either take their belongings home with them between the summer term and the Fall semester or they may leave them in the room they now occupy at their own risk. Belongings should be tagged for identification purposes since the room may be occupied by an earlier arrival in September. All rooms must be cleared at the end of summer school regardless of disposition of personal belongings.

Students who will live in any dormitory other than one of those mentioned in above, must move their belongings to their new rooms by 7:00 p. m. Friday, August 21. Those dormitories in this group which are not being used for summer school, namely 1 - 12, Hart, Walton and 13, will be unlocked from 1:00 p. m. to 7:00 p. m. on August 20 and 21 to accommodate students who must move.

In order to protect student property, all dormitories except Ramps C and D of Hart Hall and Ramps E and F of Walton Hall will be locked at 7:00 p. m. Friday, August 21. Students who wish to remain on the campus between terms may register for a room in one of these ramps by paying rent of \$11.50 at the Fiscal Department and presenting the receipt of the Housing Office in the Y.M.C.A. This registration must be completed by 5:00 p. m. Friday, August 21.

Single undergraduate students are required to live on the campus unless they live with near kin. Exceptions will not be made except for very unusual circumstances. Students who have reasons which are an exception to this policy must file a request for a day student permit with the Student Affairs Office.

Students who are eligible for a day student permit, including students living in University apartments and others who are day students at the present time, are strongly urged to secure their permits early in order to save time for all concerned at registration on September 10 and 11. Permits can be secured at the Housing Office until September 9. After that, they must be secured in the process of registration at Sbis Hall.

## Science Foundation Grants \$42,000 To University Profs

National Science Foundation grants totaling \$42,000 have been made to two A&M University professors, President Earl Rudder announced. The grants effective Sept. 1 are for two years.

Associate Professors Richard J. Baldauf of the Department of the Department of Wildlife Management and Willard A. Taber of the biology department received the grants.

Taber's grant of \$30,000 is for a study formally titled "Physiology of Shunt Metabolism in Moulds." He describes the study as an attempt "to answer what conditions are needed to force the production

of useful and novel compounds from the mould." The mould is a source of medically useful compounds.

Taber joined the A&M faculty last September. The microbiologist is the author of more than 40 publications.

Baldauf was awarded a \$12,000 grant for continued study of the morphology or form and structure of the skull of a family of frogs known as Leptodactylidae. When he received a \$17,600, three-year grant in 1961 he described detailed research into the cranial morphology of frogs as "virtually untouched."

## Police Officials To Meet For Institute Proceedings

Fifty police officials from Texas and other states will arrive at A&M University Sunday for the seventh annual Police and Community Relations Institute.

Theme of the week-long institute will be "Youth and the Ordered Society," and the speaker will include law enforcement officials, sociologists and youth specialists, announced Wallace D. Beasley, chief of police training at A&M.

Louis A. Radelet of Michigan State University's School of Police Administration will present the keynote address Sunday night, following registration. His talk will be "The Idea of Police-Community Relations."

Monday's speakers include Clarence Bronstron, St. Louis, Mo., police chief, who will present the police chief's view of "Youth and the Ordered Society."

Police Foundation will present "The New Orleans Plan."

Miss Mary Beech, Houston youth specialist, and Houston Police Inspector Larry Fultz head Tuesday's program, along with Dr. Mary Ellen Goodman of Rice University's sociology department, who will discuss "Influence of TV and Movies on Youth."

Inspector C. G. Conner of the Texas Department of Public Safety will discuss "Youth and Traffic" Tuesday night.

Assistant Attorney General Bill Morse, Jr., of Austin will outline the "Attorney General's Youth Program" Wednesday morning, and a representative from the Texas Department of Corrections will report on youth programs at the prison system.

Another speaker for Wednesday, the Rev. William F. Bull of Houston, will present a minister's view of youth in today's society. The Rev. Mr. Bull is religious coordinator for the Harris County Probation Department and minister of juvenile guidance for the Tex-

# Campus Area Landscaping, Scenic Lighting Started

## Landscaping Starts On Area Between Law, Puryear Hall

Work is progressing to remove the sunken garden area between Law and Puryear Halls across from the YMCA.

\$7,100 was set aside for landscaping and installing a sprinkler system which will replace the sunken garden area which was constructed when the dormitories were first built.

David R. Thornton, superintendent of the ground maintenance department said the area will be filled and developed with a new turf area with an underground sprinkler system installed.

Thornton said plans call for the installation of the sprinkling system and turf to be completed by Sept. 1. He said they hoped the area would show signs of growth by the time students arrived in the middle of September.

He added that maintenance trouble would be cured and the students would have a safer place in which to exercise.

A HARD DAY'S WORK  
Lewis Elliot, left, and Billy Burt of John Watson Co., lift turf to lay electrical conduit that will carry power lines for the con-

## Outdoor Lights To Illuminate Campus Scenes

John Watson of Dallas, whose specialty is creating artificial moonlight, has been given approval to light outdoor scenes on the A&M University campus.

Watson, one of the nation's top landscape illuminators, will provide outdoor lighting for the All Faiths Chapel and the water fountain triangle across from the chapel at Houston and Jones street.

Installation of the lighting for the A&M project is underway, and Watson feels the work will be completed by Sept. 1.

Chapel area lighting is a gift of R. Wofford Cain of Dallas, one of A&M's most distinguished alumni who is chairman of the Board of Southern Union Gas Company and Aztec Oil Company.

A 1943 graduate of A&M, Watson has illuminated more than 500 gardens during the past five years, ranging in size from 10 by 15 feet to 17 acres.

Among his illumination projects is one in Saskatchewan, Canada, that is expected to continue for 100 years.

East and north views of the chapel will be lighted to simulate a moonlight scene, David R. Thornton, superintendent of Grounds Maintenance Department, explained.

Concealed lights also will highlight the water fountain and triangle in front of the chapel, Thornton added. Lighting for this area will be given by Mr. and Mrs. Watson.

Watson's work has taken him to East and West coasts and north to Canada, although most of his clients are from the Southwest.

Time magazine called the Aggie "the busiest practitioner of a fast-growing trade," and "Reader's Digest" referred to him as "today's most far-ranging practitioner."

## A&M University Students Tell Of Overseas Venture

A couple of months ago, six A&M University students volunteered to spend their summer months overseas as participants of two international exchange programs.

What has happened since then? Here's what Frank Berngen of Chillicothe, now in Egypt, writes: "Our plane landed in Cairo about 10 p.m. — but a day late."

"Had a little trouble explaining to (Egyptian) custom officials where we got six Egyptian pounds. After an hour, they allowed us to keep the money and continue on our way."

"I think I got a fairly good picture of Mrs. Nasser. She and a group of delegates to the Arab conference were not more than 15 feet from us."

Berngen is one of many American students participating in "Operation Crossroads Africa," an international exchange program designed "to promote peace through a better understanding of various peoples of the world."

Berngen's job is teaching people who don't speak English to swim. Three American girls in his group conduct recreational games for 310 children, and Berngen often helps out.

Bob Barsh, a wildlife management major from Brady, is spending the summer in Turkey.

He writes (before Turkey's recent attack on Greece):

"The Turks are famous for their hospitality, and our first night in Istanbul verified this fact. A rather well-to-do Turkish gentleman gave us a party on the European side of Bosphorus."

"Our table was located right at the edge of that famous stream, linking the Black Sea with the Sea of Marnara. We tried Turkish folk dances, which are loads of fun but rather silly-looking when the participants included awkward Americans," Barsh continues.

"Turks are very concerned about maintaining their identity," the Aggie writes. "The same Turk

who may be hurt if you don't like his Turkish coffee will listen for hours to Italian and American music."

From England, Terry Oddson of Dallas reports: "This is one of the most inspiring parts of the world. It is not at all difficult to imagine how men like Wordsworth found the necessary inspiration to create their works."

Garry Tisdale of Tyler is living with a family in Talca, Chile. His "foster father" is a high school teacher of English, and his "brother" is a student at the University of Chile.

Bob Wimbish of Milford also refers to "my family" in Italy.

## Top Ranking A&M Students To Be Eligible For GM Grant

Top ranking students at A&M University will soon become eligible for grants provided by General Motors Corporation through its fifth-year institute, Dr. Richard E. Wainerdi, associate dean of engineering at A&M announced.

The grants, which will be made available for the first time in 1965, will provide each recipient \$1,800 to \$2,400 plus tuition, fees and a \$500 research allowance.

A&M is one of 17 schools named program participants and the only Wainerdi reported.

The program, called the "Bachelor-Master Plan," provides advanced training in research, design, development and manufacturing.

## Final NSF Lecture Slated For Monday

The final lecture of the NSF Summer Institute Lectures at A&M University will be given at 8 p.m. Monday by Dr. Arnold A. Strassenburg of the University of Michigan.

"Our Newest Atom Smasher—the Argonne Zero-Gradient Synchrotron" is the topic for the public lecture in Room 113, Biological Science Building.

The National Science Foundation lectures planned especially for participants in all NSF summer programs has brought to the A&M campus outstanding men from varied fields of science.

Strassenburg is staff physicist, Commission of College Physics at the University of Michigan. He is a member of the American Physical Society, the American Association of Physics Teachers and the American Association of Scientists.

## Harrington Invited To White House For Luncheon

Chancellor M. T. Harrington of the A&M University System has been invited to have luncheon at the White House Thursday with President Johnson.

He is one of a group of chief officers of leading State Universities throughout the U.S. who have been asked to meet with the President to discuss the needs of higher education as these needs involve the development of the states and various regions.

The President's telegram to Dr. Harrington, apropos of these needs, read: "I am deeply interested in these studies and (wish) to further them in any way I can."

## Classical Guitarist

The Memorial Student Center sent Robert L. Guthrie, classical guitarist, Aug. 16 at 3:00 p.m. in the ballroom of the MSC.

Admission will be 75 cents excepting children under 12 and students holding summer activity cards.

## Mattress Covers

All students who live in the dormitories are requested to turn in their mattress covers in the Puryear Hall lounge on 20-21 August 1964.

All students who do not return the mattress covers will be billed for \$4.00.

## Hervey Made Vice-Pres. Of Local Bank

The University National Bank has announced that J. B. (Dick) Hervey will become the only active vice-president of the bank effective Sept. 1.

It was further announced that Hervey will resign from his present position as Executive Secretary of the Association of Former Students at A&M University.

Hervey was elected to his new post by the bank's board of directors on Aug. 12.

He was president of his class at A&M in 1942, and following distinguished military service in World War II became executive secretary of the Association of Former Students in 1947.

Hervey was 1954 president of the College Station Kiwanis Club, and has been a member of the A&M Consolidated School Board for three years.

Self-Styled Klansman and Nazi Clarence Brandenburg, 48, left, who says he's an officer in the Klu Klux Klan, and Richard J. Hanna, 21, an admitted member of the American Nazi Party, pose for a picture following their arrests in Cincinnati. Brandenburg was arrested in connection with a recent KKK meeting in Cincinnati, and Hanna was held on a disturbance of the peace charge for supposedly standing guard at the Klansman's appliance shop. Hanna is from Newport, Ky.
