

Metcalfe Awarded Color Television

EDITORS NOTE: Shelby Metcalfe was presented with a color TV set this summer on behalf of the entire student body in appreciation of his leading the Aggie cagers to the Southwest Conference Basketball Championship. The following is an appreciation letter from Coach Metcalfe.

I am deeply appreciative of the beautiful color TV set given me through the combined efforts of The Battalion and the Texas A&M University student body.

I sincerely believe that The Battalion's drive to raise funds for this present should be classified as something beyond the call of duty.

I wish it were possible for me to personally thank each person who contributed to this fund. But, since such is impossible, I hope you will allow me space in The Battalion to express a blanket "thank you" to all concerned.

Too, on behalf of myself and the 1964 Texas Aggie varsity basketball squad, I want to convey appreciation for the splendid support we received from you and your sports staff of The Battalion and the entire student body. No team in the United States was supported by more spirited or loyal fans.

Sincerely,
Shelby Metcalfe
Head Basketball Coach

Registration Set For Night Courses

The Sam Houston State Teachers College extension courses and the late afternoon and night classes at A&M University will again be offered this semester.

Dr. William J. Graff, Dean of Instruction at A&M, announced that persons interested in enrolling in the A&M courses should contact the registrar's office by Saturday, while Nancy Blazek will meet with the SHSTC students at 7 p. m. Thursday at A&M Consolidated High School Auditorium for selection of courses.

The Auxiliary to the Texas Student Chapter of the American Veterinary Medical Association is sponsoring the Sam Houston extension courses in the Bryan-College Station area.

Almost all of the courses listed

in the SHSTC catalogue will be offered and carry full college credit. A course will be offered only when 15 people register for it. Cost of the courses will be \$12 per semester hour plus the cost of a textbook. All classes will meet one night a week for 16 weeks at A&M Consolidated.

Courses to be offered at A&M will include: education — elementary school curriculum, college teaching, standardized tests and measurements, techniques of counseling, organization and administration of pupil personnel services, and processes in educational leadership; psychology — techniques of research and principles of human development; industrial education — philosophy of industrial arts education and vocational guidance procedures, and engineering graphics.

All persons interested in taking courses at the university must bring their transcripts to registration unless they have attended the university in the past.

Classes will begin at 5 p. m., except engineering graphics and vocational guidance procedures which will start at 7 p. m.

LYNN R. CARTER

Lynn R. Carter Gets Assistant Registrar Post

Lynn Ray Carter, a member of the Data Processing Center for two years, has been named an assistant registrar by H. L. Heaton, university registrar.

Carter succeeds John T. Wynn, who resigned.

"With Mr. Carter's background of data processing, we feel that the registrar's office will be in much better position to be of service to the University and to make greater use of the Data Processing Center," Heaton said.

Heaton's office has used machines in connection with registration since 1935 and is making greater use steadily of the Data Processing Center facilities.

Carter is a 1958 graduate of Stephen F. Austin High School in Bryan and an alumnus of Sam Houston State Teachers College where he studied business administration. At the Data Processing Center he has been a tabulating equipment operator.

New Electric System Set

Power To Be Off During Hook-Up

Electric power will be turned off in 38 campus buildings Saturday, as the Physical Plants System connects the new electrical power distribution system with the existing circuits.

Installation of a new 12,000 volt generator and related equipment has reached the stage where the connection is necessary, according to W. H. Badgett, Physical Plant director.

Badgett added that the connection does not signify completion of the electrical project, but is one more step in that direction.

Power will be extinguished at 8 a. m. in the 38 buildings and will be restored by 5 p. m. Buildings to be affected Saturday include Academic, Agriculture, Agriculture Analytical Service, Agricultural Information, Animal Husbandry Pavilion, Animal Industries, Architecture, Biological Sciences.

Also, Bizzell, Bolton, Chemistry, Creamery-Sales, Data Processing Center, Doherty Petroleum, Dorms 1-12, Duncan Dining Hall, Fernier, Francis, Golf Course Club House, Goodwin, Herman F. Heep, Military Science, Nagle, Physics, Plant Sciences, Soil and Crop Sciences and System Administration.

The project had been set for Aug. 24, but late delivery of necessary equipment caused its rescheduling, Badgett said.

The absence of electrical power will also prevent the operation of any air conditioning or refrigeration equipment in the affected buildings. Telephone systems depending on power from rectifiers will also be inoperative, Badgett noted.

This project is part of the campus improvement program which includes the construction of new dormitories. An increase in campus electrical output has been deemed necessary largely because of the addition of air conditioning to several buildings.

Internal Revenue Has Extra Funds

R. L. Phinney, director of the Austin Internal Revenue District, has announced that about 1,700 tax refund checks have not been delivered. Reasons for the non-delivery include errors in addresses, misspelling of names and changes in the addresses of the parties concerned.

He said that the names of these persons are available as public information and are filed in alphabetical order without regard to city or county. Anyone wishing to use the files should contact the Austin office.

14th Industrial Development Conference Set

A&M University will be host to a two-day Texas Industrial Development Conference Thursday and Friday in the Ramada Inn.

James R. Bradley, conference director and head of A&M's Industrial Economics Research Division, said speakers for the 14th annual session will include Dallas bank official Arthur A. Smith, General Electric official Paul R. Thompson and Ling-Temco-Vought Inc. executive Robert McCulloch.

The conference is expected to bring between 250 and 300 industrial developers and businessmen to the area. The conference's executive council will arrive Wednesday for its annual meeting before the conference starts.

The Bryan - College Station Chamber of Commerce will host a dinner party for approximately 30 officials from railroads, utilities, banks and state industrial concerns Wednesday evening to unofficially kickoff the conference.

The Texas Industrial Development Conference and the Industrial division of the B-CS Chamber of Commerce will host a social hour Thursday for those attending the conference.

Registration for the conference will begin at 8 a. m. Thursday. A&M President Earl Rudder will welcome the conference delegates before the first session opens at 9:20 a. m.

In addition to Thompson, McCulloch, and Smith, other speakers will be John B. Turner, Jr., Humble Oil and Refining Co., L. C. AuBuchon, regional buyers for Sears Roebuck & Co., Dallas, and Harry W. Clark, executive director of the Texas Industrial Commission, Austin.

Kilgore Rangerette Officers

Officers of the famed Kilgore College Rangerettes are, left to right: Lt. Andrea Croughen, Granger; Lt. Becky English, Houston; Capt. Ginny Lynn Thompson, Greenville; Lt. Nina Miller, Kilgore, and Lt. Mary Ann Oder, Gladewater. The Rangerettes are familiar on the A&M campus for their yearly appearance at the Intercollegiate Talent Show.

Headlines Feature Gladys As Dora, Ethel Take Gas

By The Associated Press
MIAMI, Fla. — Tropical storm Gladys grew to hurricane force Monday as her older sisters, Ethel and Dora, appeared headed for their graves in the cold waters of the North Atlantic.

Gladys, the season's fourth hurricane, was frothing the tropical waters about 850 miles east of San Juan, P.R., with highest winds of 85 miles an hour.

Her gales embraced an area 250 miles in diameter, but the Weather Bureau said the storm would pass a safe distance north of the Lee-

ward Islands on the eastern fringe of the Caribbean. She posed no immediate threat to land.

Gladys was moving west-northwest at 18 miles an hour. She was expected to increase slightly in size and intensity and turn to a more northwesterly course by Tuesday, the Weather Bureau said.

Ethel swirled into the North Atlantic after brushing the resort island of Bermuda with fringe winds that gusted to 100 miles an hour.

There were no reports of injuries from Ethel on the British crown colony, but trees were blown down, power lines cut, boats sunk and roads flooded.

Dora picked up speed and swept northeastward away from the northeast coast of the United States, but gale warnings were displayed from Block Island, R.I., to Newburyport, Mass.

The once-mighty Dora, downgraded to a tropical storm, no longer posed a threat to any land and was expected to diminish in intensity, if not in size, the Weather Bureau said.

Behind her, Dora left at least seven persons dead and property damage reckoned in excess of \$200 million, most of it where she slammed ashore as a hurricane in northeast Florida last Wednesday.

Experiment Stations Receive \$6,750 In Research Grants

Research grants totaling \$6,750 have been received by the Texas Agricultural Experiment Station, Dr. R. E. Patterson, Dean of the College of Agriculture, has announced.

Dow Chemical Co. gave two grants totaling \$3,000. One is for \$2,500 to support research on fertilizer and interrelated responses of cotton grown in representative Texas soils. The other for \$500 is to be used for studies on weed control in peanuts.

The Texas Turkey Federation and the American Cyanamid Co. each issued \$1,500 research grants. The Texas Turkey Federation grant will be used for studies on causes of downgrading of turkeys, while the American Cyanamid Co. donation will support the research on new insecticides.

Abbott Laboratories of Chicago donated \$500 to support research on use of gibberellin in cotton production. Gibberellin is a growth regulator.

For the research on cotton defoliation and discoloration, Colloidal

Products Corp. of California has provided \$250.

C. E. Fisher of Substation 8 in Lubbock will supervise the Dow cotton project and the use of gibberellin in cotton production.

Dr. T. E. Boswell of the experiment station's Plant Disease Laboratory at Yoakum will direct the work on the peanut project.

Education Grants Open To Graduates

Students interested in Kent Fellowships for graduate study in the field of education may contact Graduate Dean Wayne C. Hall in the Coke Building for applications.

The Danforth Foundation supports the fellowship program to encourage and support graduate students who are preparing for teaching or administration in colleges and universities.

Some previous graduate study is required. The fellowships are renewable for a total of three academic years and provide a basic stipend of at least \$1,800 annually.

Group Selects Rural Minister To Be Honored

Committee members of the 19th annual Town and Country Church Conference met here last week to select the Rural Minister of the Year who will be named at a conference to be held on campus Oct. 14-16.

The main topic at the conference will be "Building a Climate of Love in Town and Country." Milton Vanderpool, one of the main speakers will speak on "Building a Climate of Love in Business Relations."

Vanderpool, from Tyler, is the president of the Ideal Baking Co. and the East Texas Hereford Association. He serves as director of eight businesses and charitable organizations and was listed in this year's "Who's Who in Industry."

Other topics to be subjects of speeches during the conference include family life, race relations and church relations. More than 250 persons are expected to attend the conference, representing eight denominations and every geographic region of the state.

The minister named Rural Minister of the Year at the convocation will receive an expense-paid trip to a summer workshop at Emory University in Georgia. The Progressive Farmer Magazine sponsors the award. The conference is sponsored by the Department of Agricultural Economics and Sociology.
