

Bauldauf To Give Fisheries Reports

Richard J. Bauldauf, professor in the Department of Wildlife Management, will give a report on fresh water fisheries Friday at the Governor's Conference on Management and Development of Natural Resources in Texas.

The conference in Hotel Adolphus at Dallas is expected to attract more than 1,500 persons. Stewart Udall, U. S. Secretary of the Interior, heads a list of distinguished speakers including Governor John Connally.

Speakers will be authorities in 14 fields of natural resources, including oil and gas, soil, water, ranching, wildlife, forestry, fishes, sulphur, and industrial metals and minerals.

Dr. J. H. Quisenberry, head of the Department of Poultry Science, will speak at the California Animal Industry Conference Oct. 19-20 at Fresno, Calif.

Quisenberry is to be the only speaker of the poultry portion of the program. He will present his talk on "Nutritional and Genetic Interrelationships" during the first session of the conference.

Two A&M University administrators are in Washington to explore with officials of national libraries and others the areas of possible cooperation in library automation and information retrieval.

Dean of Instruction W. J. Graff and Library Director Robert A. Houze made the trip. The library recently employed

Group pictures of the Staffs will be taken according to the schedule listed below. Staffs will assemble in front of the M.S.C. on appropriate day by 1715 hours.

The uniform will be Class A Winter with G.H. Hats. Style of uniform will be left to the discretion of the individual Staffs. However, uniformity must prevail.

Tues. Oct. 13, 1st Brigade, 1st & 2nd Batt.

a data processing specialist to begin efforts hoped eventually result in the retrieval of information by data processing techniques.

Dr. Alice C. Stubbs, associate professor and acting head of the Home Economics Research Department, was named to the Advisory Committee for Home Economics Research at the recent fall meeting of Home Economics Administrators of the Southern Region in New Orleans, Louisiana.

The committee will hold its meeting Nov. 8 in Washington, D. C., in conjunction with the annual Land-Grant College Meeting, according to Doretta Hillman of Kansas, chairman.

Dr. Earl H. Knebel, head of the Department of Agricultural Education, will present a program on vocational agriculture teachers at the San Saba Oct. 12.

His topic is "Communication in Vocational Agriculture."

The meeting begins at 4:30 p.m. and is part of an in-service educational program planned by teachers of the San Saba District.

W. H. Pittard, Jr., of Area 7 supervisor, said 21 teachers will attend.

Dr. J. R. Couch, professor of poultry science here will spend six days in the New Jersey area in New York areas in November to hold consultations, present seminars and discuss grant-aid proposals.

Henry D. Smith, director of the Firemen's Training School, will speak at the Institute in Department Administration Thursday through Sunday in Houston.

Smith will discuss rule making in a portion of the institute covering fire department management. Approximately 300 persons are expected at the institute.

What effects do soil and climate have on the quality of wood in a home, the strength of fence posts, or durability of wood in a golf club?

This is a question Robert Rhodes, associate of range and forestry here, hopes to answer sometime in the near future. Rhodes is project leader of an experiment by the Texas Agricultural Experiment Station to determine relationship of environmental factors to wood quality in loblolly pine.

Presenting America's slowest fastback.

There are some new cars around with very streamlined roofs. But they are not Volkswagens. They are called fastbacks, and some of them are named after fish. You can tell them from Volkswagens because a VW won't go over 72 mph. (Even though the speedometer shows a wildly optimistic top speed of 90.) So you can easily break almost any speed law in the country in a VW. And you can cruise right past gas stations, repair shops and tire stores. The VW engine may not be the fastest, but it's among the most advanced. It's made of magnesium alloy (one step better than aluminum). And it's so well machined you may never add oil between changes. The VW engine is cooled by air, so it can never freeze up or boil over. It won't have anything to do with water. So we saw no reason to name it after a fish.
