

# Stock Show To Be Judged By Local Men

Twelve A&M University faculty members and College Station businessmen have been chosen as judges or superintendents of the various livestock departments at the 1965 San Antonio Livestock Exposition, Feb. 12-21 at the Joe Freeman Coliseum.

Named to superintendent and assistant superintendent positions were Uel D. Thompson, superintendent of Aberdeen-Angus and Santa Gertrudis classes; Donald Osbourn, superintendent of the Breeding Swine department, and assistant superintendent of the Market Barrow classes; M. M. Miller, superintendent of the Junior Ready-to-Cook Poultry Show and A. M. Meekma, superintendent of Dairy Cattle; all from the College Station Extension Service.

Superintendent of the Quality Beef, Lamb, and Pork Contests is Dr. G. T. King, associate professor of Animal Husbandry. Assisting him will be Dr. Z. L. Carpenter, associate professor of Animal Husbandry.

Judges include Dr. O. D. Butler, head of the Department of Animal Husbandry; judging the Brangus Breeding Cattle and Junior Shorthorn Show; Harold W. Franke, assistant professor of Animal Husbandry judging Brahman, Open and Junior Show, Steer Calves; L. D. Wythe, Jr., assistant professor, judging Quality Beef; T. D. Tanksley, Jr., Extension Animal Husbandman, judging Quality Pork; F. I. Dahlberg, professor of Animal Husbandry, Sifting Committee Chairman of all Market Barrows, Open and Junior Show; and George H. Draper, judging the Junior Ready-to-Cook Poultry Show.

Entertainment features at this year's Exposition include a variety of attractions at all performances of the Harry Knight produced RCA Rodeo of Champions. Starred at each rodeo performance will be The Judy Lynn Show, direct from Las Vegas, featuring her 8-piece, all-male, string band; the Flying Cimarrons, a trick riding act with a new concept.

## Livestock Judges Win 2nd Contest In Fort Worth

The A&M University Junior Livestock Judging Team won its second major contest of the year by taking first in the Southwestern Exposition and Fat Stock Show now underway in Fort Worth.

Early in January, A&M was top team at the National Western Livestock Show in Denver, Colo.

At Fort Worth the Aggies defeated 19 teams representing senior colleges and universities, and produced the overall contest's high point individual—James Newsom of Azle. Malcolm Osbourn of Valley Spring, who was high pointer in Denver, took fifth at Fort Worth for A&M.

Other high teams were Oklahoma State University, second; Colorado State University, third; and California Polytech, San Luis Obispo, fourth. West Texas State University was sixth, with Texas Technological College in 12th place.

Other A&M team members were Sam Kuykendall and Bill Sanders of San Angelo, Ruben Reyes of Beeville, Ross Conner of Izoro and Rex Stultz of Ballinger. L. D. Wythe, assistant professor in the Department of Animal Science is team coach.

**Rudder Honored By Marines**  
President Earl Rudder recently accepted a certificate of appreciation from Col. R. L. Stallings, Director of the 8th Marine Corps District. Encompassing all services the award was presented in the President's office.

## Former Student Receives Navy Oceanography Job

Dr. Charles C. Bates, holder of a Ph.D. in oceanography from A&M, has been selected as the Scientific and Technical Director of the U. S. Naval Oceanographic Office. The appointment was announced by Rear Admiral Denys W. Knoll, Oceanographer of the Navy.

With a broad background in environmental sciences and experience in geology, meteorology, physics, and oceanography, he will be responsible for four major departments which carry out the Oceanographic Office mission to support combat readiness of the U. S. Navy operating forces.

A&M Engineering Extension Service for seven years, became assistant superintendent in charge of vocational education for the Houston Public Schools Monday.

Whitely has worked in the field with teachers of vocational and industrial subjects in the public schools and junior colleges of Texas.

**15 HERE FOR SCHOOL**  
Fifteen men from Texas and other states are participating in the 18th Industrial Plant Security School here.

Wallace D. Beasley, coordinator of police industrial security training for the sponsoring Texas Engineering Extension Service, said the school will cover public relations, industrial defense, basic security, patrol activities, industrial theft, personnel investigation, mob and riot control, theft prevention, use of the polygraph, communism, sabotage and espionage, security training, employee identification, and disaster training.

Guest instructors will come from industry and the Texas Department of Public Safety. Other instructors will come from the Police Training Division of TEES.

Certificates will be presented to those who complete the course.

**MONROE GETS APPOINTMENT**  
The appointment on a half-time basis of Dr. Haskell M. Monroe Jr., of the A&M history faculty as an assistant dean of the Graduate College was announced Friday by President Earl Rudder. The appointment was effective Monday.

**NEW JOB FOR WHITELY**  
J. B. Whitely, a vocational-industrial teacher trainer for the

# Taxpayers May Use Card To Register Year's Income

Taxpayers may use the simple card Form 1040 A in filing their 1964 Federal income tax return if their incomes are less than \$10,000, Clarence E. Carlson administrative officer of Internal Revenue in Bryan said today.

Husband and wife may file a joint return on Form 1040 A if their combined income is under \$10,000.

Taxpayers whose incomes were less than \$10,000 and consisted entirely of wages subject to withholding, or entirely of such wages and not more than \$200 total of other wages, dividends, and interests may use the Form 1040A.

Taxpayers who use the Form 1040A must take the standard deduction, either the regular 10% or the minimum standard deduction allowed in lieu of medical expenses, contributions, interest payments, taxes, and other itemized deductions.

Taxpayers were reminded that the minimum standard deduction was established by the 1964 tax law. It permits a deduction of \$200, plus \$100 for each allowable exemption of the taxpayer. A married taxpayer filing a separate return, however, is limited to a

\$100 deduction, plus \$100 for each allowable exemption. Both the 10% and the minimum standard deduction are subject to a maximum limitation of \$1,000 for single taxpayers or married taxpayers filing jointly. The maximum is \$500 in the case of married taxpayers filing separate returns.

## A&M Receives Instruments From Indian Consul General

A&M University will receive a gift of musical instruments from the government of India during a luncheon Wednesday in the Memorial Student Center.

P. N. Menon, consul general of India for the Western States of America, will make the presentation to President Earl Rudder and Music Coordinator Robert L. (Bob) Boone.

A sitar, tabla and tamboura are the instruments A&M will receive. The sitar, most popular stringed instrument of India, is similar to a guitar. The tabla is a two-piece drum and the tamboura a four or five stringed instrument which gives an essential droning background to all Indian music.

The gift is the result of a letter written about a year ago by Boone in behalf of the Indian Students groups on campus. He wrote the India Embassy asking for help in securing native musical instruments of India for use in the observance of India Republic Day on campus. A short time later he received a letter from the embassy telling him that work had begun on securing the instruments.

Next contact with the embassy came last week when Boone received a letter saying two boxes of musical instruments were being shipped to A&M. The letter also suggested the official presentation by Menon.

Approximately 60 students from India are enrolled at A&M. Although the annual Republic

Day celebration is usually held in January elsewhere, the day is observed here in February because of mid-semester examinations. Republic Day will be observed Feb. 12 at A&M.

Day celebration is usually held in January elsewhere, the day is observed here in February because of mid-semester examinations. Republic Day will be observed Feb. 12 at A&M.

## 83-Foot Skyhook Installs Pedestal Atop Bizzell Hall

A Bryan - manufactured "skyhook" proved vital Thursday afternoon as A&M University moved nearer to having the only known matched set of radars for weather research.

The 83-foot boom capacity of the locally - manufactured FlexLift operated by Austin contractor George D. Owens lifted into place a 2,000-pound pedestal for a 15-foot radar antenna "dish" and other equipment on a tower atop Bizzell Hall. P-M Machine Co. manufactured the mobile FlexLift.

The large "dish" to be installed shortly is for a 10-centimeter set being matched to a 3.5 centimeter set. The synchronized sets will provide data "something like having a nearsighted person exchange information with a farsighted individual."

Dr. Vance E. Moyer, A&M professor and radar meteorologist, said the two sets are being readied under a \$19,000 grant from the National Science Foundation. A&M researchers under a \$90,200 NSF grant determined the feasibility of the matched set approach.

Jake Cangelose as a research engineer has immediate responsibility for readying the new system.

## Reading Machine Helps To Solve Zip Code Problem

Postmaster Ernest Gregg said today he has received word from Postmaster General John A. Gronouski in Washington, that a big "breakthrough" has now been made on electronic machines to "read" Zip-code addresses on mail.

"The Postmaster General said he expects to begin installing these sophisticated new machines in major post offices starting in about a year," Gregg explained. Gregg said each machine will be able to sort, as well as read, at the rate of 35,000 letters in an hour.

## "when can I interview IBM?"

Feb. 11, 12

## "for what jobs?"

Product Development, Programming, Systems Engineering, Marketing/Sales

If you are majoring in Engineering, the Sciences, Mathematics, or Business Administration, see IBM. The development, manufacturing, and marketing of information systems and equipment offer many opportunities to show what you can do.

See your placement office for our brochures—and an appointment with the IBM interviewers. Ask where your ideas can best be used at IBM, an Equal Opportunity Employer. There are 20 laboratories, 17 plants, and over 200 sales and service offices coast to coast.

If you cannot attend the interviews, visit the nearest IBM office. Or write, telling us about your interests, to Manager of College Relations, Dept. 882, IBM Corporate Headquarters, Armonk, New York 10504.

Applied Mathematics, Applied Mechanics, Data Communications, Digital Computers, Guidance Systems, Human Factors, Industrial Engineering, Information Retrieval, Marketing, Manufacturing Research, Microwaves, Optics, Reliability Engineering, Servomechanisms, Solid State Devices, Systems Simulation, and related areas.
