

License Plates Go On Sale; Early Purchases Trickle In

AUSTIN—License plates sales started Monday and end April 1 throughout the state.

Texas Highway Department officials say that a good many people rush to buy plates the first week of sales, but the biggest flurry falls during the last week of March. Current registration receipt, cer-

Wives Of Officials At Executive Meet

Mrs. M. T. Harrington, first honorary president, and Mrs. Earl Rudder, second honorary president, attended the Executive Board Meeting of the Federation of A&M University Mothers Clubs in the Memorial Student Center Saturday.

The Federation President, Mrs. H. Elbert Dew of Tyler, presided as the governing body reviewed plans and heard respective members duty reports.

The group heard talks by President Earl Rudder and Mr. J. Wayne Stark, Director of the MSC on Higher Educational needs and the Proposed Systems as recommended by the Governor's Board.

tificate of title—and money enough to pay for the plates—are needed to complete the transaction.

Lost receipts or ownership papers may be replaced easily enough by sending 25 cents for each duplicate desired to the Department's Motor Vehicle Division in Austin (40th and Jackson Streets). But remember—to issue a duplicate the Department needs your license number, make and vehicle identification number. Receipts may also be obtained from the county in which the vehicle was registered.

Texas license plates have a "new look" this year. Each passenger plate has a three-lettered prefix followed by two or three numerals. (Commercial and miscellaneous vehicles retain their own special registration system.) The new passenger registration system enables the Department to cope with the increasing vehicle registration.

Since World War II, approximately a quarter-million more vehicles have been registered yearly in the state. This trend should continue, but the new system should provide sufficient numbers for at least the next ten years.

CAMPUS BRIEFS Engineering Discussion Slated For Wednesday

Bio-environmental engineering will be discussed at 5:10 p.m. Wednesday in Room 145, Physics Building.

Guest lecturer is Maj. Hubert E. Bell from the U.S. Air Force School of Aerospace Medicine, San Antonio.

This talk will be of special interest to students studying toward a degree in Industrial, Chemical, Civil, or Sanitary Engineering or to undergraduate candidates in these four fields eligible for advanced degree training at the graduate level.

The Air Force Bio-environmental Engineer's job is to take theoretical solutions to problems and translate them into reality. Many of these deal with how aircraft and space vehicles should be designed in the light of the requirements of the men who fly them. Others involve the complexities of environmental hygiene, under extremely specialized conditions.

Interested students are invited to attend this talk by Maj. Bell.

Language Exams Set
Examinations for meeting the foreign language requirements for

the Ph.D. degree will be given at 6:30 p.m. Feb. 12 in Rooms 125-127 of the Academic Building, Graduate Dean Wayne C. Hall announced.

"Students wishing to take this examination should apply to the Graduate Office for a letter of authorization not later than Feb. 8," he said.

Instruction sheets are available from the secretary in the office of the Department of Modern Languages.

Grad Record Exam

Registration for the Graduate Record Examination this week is the first of several deadlines approaching for A&M graduate students. The Graduate College released the listing of key dates during the Spring Semester for students seeking advanced degrees.

Most of the deadlines come during February.

The Graduate College listing shows April 30 as the final day for filing theses and dissertations with May 15 scheduled as the last day for final examinations for advanced degrees.

Federal Career Interviews

On February 8 and 9, 1965, representatives of the Federal Career Service will be at the Placement Office. Individual interviews can be arranged by contacting the Placement Office now.

These representatives are prepared to answer questions and advise students on career opportunities in the Federal Service, according to Louis S. Lyon, Regional Director for the Dallas Region, U. S. Civil Service Commission. He said the Federal Government, the nation's largest employer, affords opportunities for graduates of any discipline.

Lyon said the variety of Federal agencies affords a unique opportunity for individual development and personal satisfaction in a virtually limitless span of professional occupations. In addition, he pointed to promotions based on merit, liberal annual and sick leave provisions, comprehensive health benefits, and a host of other provisions for employees as typifying the progressive personnel policies of the government. Appointments to positions in the Federal Career Service are made without regard to race, religion, sex, creed, national origin, or political affiliation.

Singing Cadets Audition

Auditions for the Singing Cadets are scheduled now through Feb. 11, announces Robert L. (Bob) Boone, director of the group. "I don't know how many openings we will have. Several is about the only estimate I can make now," Boone commented. He said auditions will be held every weekday from 3 to 4:30 p.m. in G. Rollie White Coliseum. The Spring Tour of several Texas cities is the highlight of the Singing Cadets' agenda for the

Spring term. During the Fall term, the Cadets are the official glee club of the Miss Teenage America Pageant, held annually in Dallas.

Ag Researchers Get Grants

Four research grants totaling \$43,109 have been made available to the Texas Agricultural Experiment Station, Dr. R. E. Patterson, station director, has announced.

The largest of the grants, \$37,620, is from the Cotton Producers Institute of the National Cotton Council in Memphis, Tenn., to support research on genetic, cultural and chemical modification of the cotton plant for earlier planting.

Patterson said the project is being conducted at the South Plains Research and Extension Center near Lubbock.

The Herman Frasch Foundation of New York has provided \$2,489 for chemical research on poisonous range plants. Dr. B. J. Camp of the A&M Department of Biochemistry and Nutrition is project supervisor.

A grant of \$2,000 comes from the American Potash Institute in Decatur, Ga., for research on soil fertility. Dr. Grant Thomas of the Department of Soil and Crop Sciences is investigations leader.

Work on control of internal parasites of sheep and goats will be supported by a \$1,000 grant from Merck Sharp and Dohme Research Laboratories of Rahway, N. J. Dr. W. T. Hardy, superintendent of Substation 14 at Sonora, heads the project.

Pinky Says

A record 6,567 visitors were on campus during January, according to P. L. Downs Jr., official greeter for the university.

Downs said 19 different groups attending short courses, conferences, class reunions and other meetings, made up the total.

An estimate by Downs indicates A&M has been visited by 953,243 persons during the past 15 years and eight months. He said the visitors spent an estimated \$20,018,103 in the community during that period.

Churches To Offer Religious Courses

Three courses in religion are being offered on a non-credit basis through a co-operative effort of five local churches.

"Survey of the New Testament," "Makers of Contemporary Protestant Thought" and Survey of the History of Christianity" will be offered Thursday at the Wesley Foundation Building from 7:30-9 p.m. Feb. 4-Apr. 8.

Interested persons wishing to participate have been invited to write to "School of Christian Studies," c/o Wesley Foundation, P.O. Box 295, College Station or call VI 6-6014.

The cost of the studies will be \$1 for students and \$2 for adults plus the cost of the textbook.

Atomic Energy Research Offers Graduate Grants

For the sixth year, atomic energy research fellowships for graduate students of Texas colleges and universities are being offered by the Texas Atomic Energy Research Foundation.

The summer fellowships in controlled nuclear fusion research will again be offered to up to six graduate students of high scholastic standing and with special aptitude in experimental or theoretical physics, electrical engineering or applied mathematics.

The Foundation, which consists of ten investor-owned electric utility companies in Texas, is supporting a major research effort aimed at controlling nuclear fusion reactions for the eventual production of electric power.

The research is conducted at the laboratories of the General Atomic Division of General Dynamics Corporation in San Diego, California and on the campuses of Texas universities.

To date, 24 graduate students in physics, mathematics and engineering have worked alongside General Atomic scientists in the exciting quest for a means of controlling the tremendous energy of the H-bomb and harnessing it for the generation of electric power.

The fellowship recipients will be selected by a committee representing Texas educational institutions, the Foundation and General Atomic. There is no limit to the number of applications which may

be filed from any one college and all graduate students, including those who will begin graduate work in 1965, will be considered. This also includes instructors who are working on advanced degrees.

Detailed announcements of the 1965 fellowship program have been posted at Texas colleges and universities and also have been distributed to the appropriate faculty department heads or staff members. Copies of the announcement may be obtained by writing the Texas Atomic Energy Research Foundation, P. O. Box 970, Fort Worth, Texas.

Deadline for applications is March 1, 1965 and announcement of awards will be made to the selected candidates by April 1, 1965.

King, 256 Negroes Arrested Over Right-To-Vote Protest

SELMA, Ala. (AP)—Dr. Martin Luther King Jr. was arrested with 156 other Negroes during a right-to-vote protest march Monday, and he refused to post bond when called before a magistrate.

Bond for all 257 arrested on charges of parading without a permit was set at \$200 each.

After appearing before City Judge Edgar P. Russell, King told newsmen outside the courtroom that he did not intend to seek release on bond for the time being.

His top aide here, a fellow Negro minister, also declined to post bond.

Unless he does post bond he will remain in jail until his case is heard on Feb. 15. Maximum penalty for the offense under the city is 180 days in jail and a \$100 fine.

Before returning to jail, King conferred with members of staff and then told newsmen he would spend the night in jail and decide Tuesday whether he would seek release on bond.

The Negro residents of Dallas County who were arrested in a lineup march were allowed to sign their own bonds and were released late in the day. King was arrested by city police while leading a march to the Dallas County Courthouse where other Negroes tried again to register his voters as they have for the past two weeks. Arrested with the 1964 Nobel Peace prize winner was one of his top aides, the Rev. Ralph Abernathy. King, Abernathy and the followers were charged with parading without a permit after receiving a warning from Selma public safety director, Wilson B. E.

ONCE MORE UNTO THE BREACH
Today I begin my eleventh year of writing this column in your campus newspaper.

I wasn't sure I'd be coming back this year. After a decade of doing this column, I had retreated to my country seat, tired but happy, to enjoy a nice long rest. But last night as I sat on my veranda, peaceful and serene, humming the largo from *A Long Day's Night* and worshipping my dog, a stranger suddenly appeared before me.

He was a tall, clean-limbed man, crinkly-eyed and crooked-grinned, stalwart and virile. "How do you do," he said. "My name is Stalwart Virile and I am with the Personna Stainless Steel Razor Blade people."

"Enchanted," I said. "Take off your homburg and sit down." I clapped my hands sharply. "Norman!" I called. "Another chair for Mr. Virile!"

"Another chair for Mr. Virile!"

Obediently my dog trotted away and returned directly with a fanback chair of Malayan rattan. He is the smartest dog in our block.

"I suppose you're wondering why I am here," said Mr. Virile, seating himself.

"Well, sir," I replied, my old eyes twinkling roguishly, "I'll wager you didn't come to read my meter."

"You can imagine how we howled at that one!" "That's a doozy!" cried Mr. Virile, finally catching his breath. "I must remember to tell it to Alice when I get home."

"Your wife?" I said. "My father," he said. "Oh," I said.

"But enough of wit and humor," he said. "Let us get down to business. How would you like to write a campus column for Personna Stainless Steel Razor Blades?"

"For money?" I said. "Yes," he said.

"My hand, sir," I said and clasped his. Warmly he returned the pressure, and soft smiles played upon our lips, and our eyes were moist with the hint of tears, and we were silent, not trusting ourselves to speak.

"What will you write about in your campus column?" asked Mr. Virile when he was able to talk again.

"I will take up the burning issues that vex the American undergraduate!" I cried, bounding to my feet. "I will explore, without fear or favor, such explosive questions as 'Are roommates sanitary?' and 'Should proctors be given a saliva test?' and 'Should capital punishment for pledges be abolished?' and 'Can a student of 19 find happiness with an economics professor of 80?'"

"And will you also say a pleasant word from time to time about Personna Stainless Steel Razor Blades?" asked Mr. Virile.

"Sir," I said simply, "what other kind of word except pleasant could I possibly say about Personna Blades, which give me more luxury shaves than Beep-Beep or any other blade I might name?"

"Another of my products is Burma Shave," said Mr. Virile. "Can you find it in your heart to mention Burma Shave occasionally?"

"But of course!" I declared. "For is not Burma Shave the whisker-wiltingest lather in the land?"

"Yes," he admitted. And then he shook my hand again and smiled bravely and was gone—a tall silhouette moving erectly into the setting sun. "Farewell, good tonsorialist!" I cried after him. "Aloha!"

And turned with a will to my typewriter.

Course 205—Prin. of Sociology (3)	MW5:30-7 p. m.	205 Agri.	Section 509

SCHOOL OF CHRISTIAN STUDIES
(Non-denominational)

held at the

WESLEY FOUNDATION
(Church & Tauber Sts.)

THURSDAY NIGHTS
FEBRUARY 4th—APRIL 10th
7:30 p. m. — 9:00 p. m.

Courses
"SURVEY OF THE NEW TESTAMENT"
"MAKERS OF MODERN PROTESTANT THOUGHT"
"SURVEY OF THE HISTORY OF CHRISTIANITY"

Cost: A&M Students or Wives \$1.00 plus cost of Textbook
Other Adults of the community \$2.00 plus cost of Textbook

PEANUTS

1. SNOOPY, I KNOW HOW MUCH YOU LIKE THIS GIRL BEAGLE YOU'VE MET...

2. I KNOW YOU'VE BEEN GOING SKATING WITH HER EVERY NIGHT, AND ACTUALLY, I'M GLAD... I REALLY AM...

3. WHAT I'M TRYING TO SAY IS, IF YOU WANT TO MARRY THIS GIRL, I WON'T STAND IN YOUR WAY...

4. I WONDER IF I'M THE MARRYING KIND...

5. PERHAPS I'M TOO SELFISH.... I'VE ALWAYS HAD THINGS SORT OF MY OWN WAY...

6. IF I GOT MARRIED IT WOULD BE DIFFERENT...

7. FOR ONE THING, WE'D HAVE TO GET ANOTHER SUPPER-DISH!
