

# Army Sets Up Scholarship Program

## 2 Year, 4 Year ROTC Students To Benefit

The Department of the Army has announced a college ROTC scholarship program beginning in September 1965, which will provide financial assistance to 1,000 qualified students.

The program is conducted in 247 colleges and universities throughout the country and produces over 10,000 officers each year for the Army. Scholarships are being added to this program for the first time this year in view of the importance of the ROTC program to the Army.

Authorized by the recently enacted Public Law 88-647, the ROTC revitalization act of 1964, four-year scholarships will be awarded to 400 students and two-year scholarships to 600 students. Four-year scholarships will be granted to individuals who are entering college for the first time. Two-year scholarships will be awarded to selected college students completing the second year of the four-year Army ROTC program.

The Army will pay these students \$50 a month plus their tuition, textbooks and laboratory fees for attendance at colleges with four-year ROTC programs. Payment of \$50 a month will be made from the date the scholarships begin until graduation, to include summer months except for one six-week summer training camp where the student will be paid at the rate of \$120.60 per month, plus transportation.

Applications must be made during April and postmarked not later than May 1. Students applying for the two-year scholarship program will do so with the Professor of Military Science. Those applying for the four-year scholarship program may do so with the Commanding General, Fourth United States Army, ATTN: AKARF-U, Fort Sam Houston, Texas, 78234. Final selections will be made by the Department of the Army. Applicants will be notified during July as to whether or not they have been selected.

Upon graduation from college and the successful completion of their Army ROTC studies, the scholarship students are required to accept, if offered, either a regular or reserve commission as a second lieutenant and to serve at least four years an active duty with the Army.

To be eligible for these scholarships, an applicant must be a male U. S. citizen who meets the prescribed physical standards. He must also enlist in the Army Reserve for six years at the time he accepts the scholarship.

The four-year applicant must be between 17 and 21 years of age on June 30, 1965. The two-year applicant must be under 23 years of age on June 30, 1965, and must be a cadet in good standing in the second year of his Army ROTC training.

Applicants for a four-year scholarship may attend any school for which he qualifies and which offers the four-year Army ROTC course. He must pursue a course of study leading to a baccalaureate degree.

Appointees attend the school of their choice from among 69 designated colleges and universities and work toward the masters degree or doctorate.

Texas A&M offers MS and doctoral studies in nuclear engineering.

Heriberto Plaza-Rosario and David Clifton of A&M are among the outstanding college science students named to receive Atomic Energy Commission graduate fellowships in 1965-66. The pair and a Californian plan to hold the fellowships at A&M. He is Philip Heintz, now at California Polytechnical Institute.

The 247 appointments were made under the Atomic Energy Commission program in nuclear science and engineering. The Oak

Ridge Institute of Nuclear Studies administers the national program. The students were chosen by a fellowship board from more than 650 applicants.

## CAMPUS BRIEFS

# Wildlife Management Grads Receive 3 Research Grants

Three graduate students in the Department of Wildlife Management have been awarded research grants for support of their field studies, according to Dr. James G. Teer, who will direct their studies.

James Barteo of Denton was awarded \$850 for research at the Delta Waterfowl Research Station at Delta, Manitoba, Canada. The stipend comes from the R. Howard Webster Fund which was established to support research,

management, and conservation of waterfowl in North America.

Hanley K. Smith of St. Petersburg, Fla., received \$2,000 from the Texas Parks and Wildlife Department to support his problem on food habits of tree squirrels in Texas. Smith plans to develop a micro-technique to identify finely ground food material in stomachs of squirrels.

Duane C. Gall of MacAllen was awarded \$525 by the National Wildlife Federation to support his studies on the ecology and habitat requirements of Attwaters prairie chicken in Refugio and Victoria Counties. Gall presently holds a Graduate College Research Fellowship at A&M; the additional funds from the National Wildlife Federation will be used for the travel and equipment costs of his study.

Phi Eta Sigma  
Dean C. H. Ransdell, faculty advisor for Phi Eta Sigma, announced Tuesday that 71 freshmen were eligible to be initiated into the organization Tuesday at 5 p.m. in the Birch Room of the Memorial Student Center.

Phi Eta Sigma is a national scholastic honor fraternity for first-year college men. It was founded at the University of Illinois in 1923 to encourage scholarship among first-year college men and to honor those who make outstanding records.

The requirement for membership is high, a 2.5 average during the first semester of college work, but everyone who attains this is eligible. Membership is an earned honor which is retained for life, although active membership is limited to the sophomore year.

## TTI Begins Pavement Test Construction

Research engineers in the Pavement Design Department of the Texas Transportation Institute have begun construction of a unique pavement testing facility at the A&M Research Annex.

Accepted research in the past has been to drive fleets of heavily loaded trucks over pavements night and day for months at a time to destroy pavements.

The new plan for a test facility to be used as a reference standard or proving ground for recently developed non-destructive equipment designed to determine the strength of various types of flexible pavement without damaging the pavement structure.

Altogether, 29 test sections of 600 square feet each will be constructed.

Frank H. Scrivner, head of the Pavement Design Section, pointed out the combination of materials and material thicknesses used represents a range of pavement designs from the weakest to the strongest in use today. Dimensions and arrangement of materials selected for test sections were based on recommendations by Dr. H. O. Hartley, head of the Institute.

While the facility has been planned to test presently available equipment, it probably will be used for a number of years as a standard of comparison to measure the performance of other non-destructive testing devices, according to Tom W. Stallworth, assistant research engineer in charge of the construction of the project.

Stallworth said the cost of constructing each mile of Interstate Highway System is approximately \$1 million, while the cost of this project to develop basic pavement design information of value nationwide is estimated at \$40,000.

# Renaissance Talk Subject Is Bard

Scholars attending the South Central Renaissance Conference here heard Shakespeare depicted "in one perspective as a skillful conservator and reflector of the amassed wisdom of the human race" rather than original writer in the modern sense.

The Rev. Dr. Walter J. Ong, of St. Louis University, was featured speaker for the conference held Friday and Saturday with A&M faculty acting as hosts. Registered were 75 scholars in the humanities. Six states were represented.

"Commonplaces, Typography and the Transformation of Renaissance Culture" was Ong's topic for the banquet Friday night at the Ramada Inn.

Commonplaces came to mean printed collections of quotations from writers of the ages on diverse subjects. Ong described the tradition as "the last great far-flung bastion of the old oral state of mind."

"The discovery of the massive use of commonplace material has, of course, upset our study of sources in the Renaissance," the professor of English said.

Handbooks provided collections of saying on all possible themes. Borrowing was a virtue.

"In these perspectives, Shakespeare's value becomes that of a skillful conservator and reflector of the amassed wisdom of the human race," Ong said. "... Shakespeare was not original in the way in which later people have tried to be original. He did not want to be. He wanted to rework the old wisdom in an always fresh and meaningful way... (this) belongs to a different world from ours."

The difference holds special interest for Ong who has written extensively upon the "discourse oriented" and our "visually oriented" cultures.

The St. Louis University professor completed doctoral studies at Harvard. He has conducted research in the major libraries of Europe, lectured on both sides of the Atlantic and is the author of numerous books and articles.

Tulane University professor Panos Paul Morphos presided at the banquet as president-elect of the 1965-66 conference. Other

officers were elected and Louisiana State University chosen for the 1966 conference site during a business session.

# Honors Group Discussing Fiscal Control

"Major Philosophical Issues," "The Politics of Monetary and Fiscal Policy" and "The Languages of the World" are among the topics being discussed this semester by selected A&M freshmen.

All are in the Honors Program inaugurated this academic year.

The discussions or colloquia conducted weekly by outstanding members of the faculty are a feature of the Honors Program for selected superior students of the College of Arts and Sciences.

"The Honors Program Committee is very well pleased with the performance of our students in this program," Dr. R. H. Ballinger said. He chairs the faculty committee composed of one representative from each of the 14 departments in the arts and sciences.

The total of 43 students this semester in the selective, voluntary program is more than the initial semester. The 43 students represent various disciplines in the arts and sciences.

"Honors Program students also are participating actively in extra-curricular activities," Ballinger also reported.

The purpose of the Honors Program is to offer the superior student special opportunities for academic work of a range and depth appropriate to his capabilities and greater intellectual interests.

The Honors Colloquium each week and Honors Sections of basic freshman courses are key points of the program.

The colloquia or discussion topics this semester concern the humanities and social sciences. In the Fall Semester, physical and life scientists led the sessions.

Grading in the Honors Sections is the same as the quality of work would merit if done in regular sections.

Those undergraduate students who have 95 hours passed may purchase the A&M ring. The hours passing at the time of the preliminary grade report on March 29, 1965, may be used in satisfying the 95 hour requirement. Those students qualifying under this regulation may leave their name with the Ring Clerk in the Registrar's Office in order that she may check their records to determine their eligibility to order the ring. Orders for the rings will be taken between April 21 and May 31, 1965, from 8:00 a.m. to 12:00 noon. Delivery for these rings will be made on or about July 1, 1965. Transfer students must complete two full semesters at A&M University before they are eligible to order the A&M ring. THE RING CLERK IS ON DUTY FROM 8:00 a.m. to 12:00 noon, MONDAY THROUGH FRIDAY OF EACH WEEK.
