

4 Researchers Plan For Voyage

Four researchers from Texas A&M will leave Tuesday for South America for a 60-day cruise in Antarctic waters and the South Pacific. They sail May 24 from Valparaiso, Chile and are due July 24 in Auckland, New Zealand.

The A&M group which will join researchers from other major universities in working aboard the U. S. Navy Ship Eltanin includes two women. They are Miss Lela M. Jeffrey, a chemical oceanographer who has worked at sea before, and Mrs. Lynne Goers,

a student's wife and marine biological lab technician. Mrs. Goers will be making her first voyage.

Miss Jeffrey heads a chemical oceanography research project and Dr. S. Z. El-Sayed, a veteran of cruises off Antarctica, has charge of a biological productivity study. The studies are closely related.

Also going from A&M is a graduate student, Navy Lt. David J. Wright. A de Romedi of the Argentine Hydrographic Service will join the A&M group aboard ship.

Wright, a native of Oregon, holds a chemical engineering degree from Oregon State University. He came to A&M in September to study for a master's degree in chemical oceanography. A veteran of service aboard destroyers and ocean minesweepers, he knows the Pacific but not Antarctic waters.

This cruise Wright will be a technician for Miss Jeffrey and gather data for his master's thesis.

Two other A&M graduate students, Alan D. Fredericks and Donald R. Davis, will make the subsequent cruises aboard the Eltanin.

The National Science Foundation recently granted more than \$74,000 for the two research studies of A&M scientists. Equipment costs substantially increase the NSF support.

"It'll be winter there so this will be no pleasure cruise," El-Sayed said. His new project extends westward the area of ocean in which he has studied primary biological productivity. This involves microscopic organisms found in the sea. Their function is something like that of grass on a cattle range.

"I have been on oceanographic cruises in the Gulf of Mexico, that part doesn't bother me. But I dislike the long hours of darkness we'll have this voyage," Miss Jeffrey said. "First we have to find out what's there and then make sense of the findings."

She and Lieutenant Wright will take samples daily from the "water column," the sea from the surface to depths of more than 3,000 feet.

El-Sayed's group will take samples every six hours on each of three 60-day cruises of the Eltanin. Miss Jeffrey's plans also involve another cruise this fall.

The Eltanin is described as "a floating laboratory." The vessel was built originally as a polar cargo ship and is operated by the Military Sea Transport Service for the U. S. Antarctic Research Programs, National Science Foundation. The NSF sponsored conversion of the ship to scientific purposes.

The 60-day voyage begins May 24 and ends July 24 at Auckland. On July 29 the ship begins the voyage back to Valparaiso and Oct. 7 sails on a return voyage to Auckland.

CONCRETE MASONRY WINNERS

Three Texas A&M Agricultural Engineering Students won awards in the 1965 Texas Concrete Masonry Association Structures Design competition. Left to right: Robert Chenoweth, Tulia, placed first; Gilbert Kretzschmar, Bartlett, second; and Marvin Thedford, Brenham, third. Each of the

young engineers were presented checks totaling \$250 by the Concrete Masonry Association for their awards. Projects included designs of agricultural structures involving the use of concrete masonry and were judged on structural and functional adequacy, presentation and creative thinking.

60-Day Cruise Poses Problem To Aggie Wife

Texas A&M student wife Lynne Goers from Houston has solved a problem few wives face—how to tell a husband she has been asked to serve as a laboratory technician for a 60-day research cruise into Antarctic waters.

Mrs. Goers never has been on a ship but she is an experienced technician with a degree in bacteriology.

"I want her to go for the experience which few people can ever have," Roger said. He is an A&M senior majoring in electrical engineering. His plans are "to hatch it" in their college apartment and attend summer school.

Mrs. Goers and three other A&M representatives including another woman, chemical oceanographer Lela M. Jeffrey, will leave Tuesday from Valparaiso, Chile and dock July 24 at Auckland, New Zealand. The vessel is "a floating laboratory."

Lynne is especially interested in the fact they sail from Valparaiso.

"My father told me I had a great grandfather go around the Cape during the Gold Rush, and he probably stopped in Valparaiso."

The Goers have been married four years next September. Both attended the U of H while she was completing her studies and then they came to A&M.

Goers may stay at A&M for a master's degree in computer science after completing undergraduate work.

What does a woman wear on a cruise into Antarctic waters?

Mrs. Goers plans to wear warm slacks as her working clothes. She notes appreciatively the ship has a well-equipped laundry room.

"They furnish us with our heavy duty warm clothes," she said. Her only major travel until now was in 1959 when she flew to Hawaii to visit a Stephens College roommate. But, she points out, others in the A&M group are experienced travelers.

A&M Releases Night Courses For Summer

Texas A&M will offer 23 late afternoon and evening courses for the convenience of area residents who hold down full-time jobs but want to work toward their degrees at night.

H. L. Heaton, registrar, said the courses would be offered between 5 and 9 p.m. this summer for the benefit of persons living within a 100 mile radius of the university who want to commute.

Summer school at A&M is divided into two sessions. The first begins June 7 and continues through July 16; the second session begins July 19 and ends August 27.

"We know there are a large number of area residents who are interested in continuing their education if the classes would be scheduled for their convenience. The university has done this and expanded the number of courses available for evening study this summer," he said.

Courses to be offered the first session include:

Business Administration 105 and 211, Education 601, Psychology 207 and 634, English 103 and 104, Speech 403, Geology 201, Government 206 and 207, History 105, Liberal Arts 311, Oceanography 201.

During the second term, the late afternoon and evening course will include: business administration 106, 212, Education 421, 439, Psychology 301, English 104, Speech 403, Government 207, History 106.

Persons interested in enrolling in one or more of the courses may obtain additional details from the Registrar's Office.

BUGGIES to Bombers in a Lifetime

The other day Granddad read an account in our newspaper about the miraculous speed of a B-58 bomber. He contrasted this accomplishment with the experience in his youth when he spotted his first airplane five miles outside of town—and then rode a bicycle into town in time to see the plane circling the capitol building.

It seems incredible the technological advances mankind has made in the past fifty years. Men who rode to Sunday School by horse and buggy as boys, today follow the flight of astronauts on TV. Their wives do the family laundry with the twist of a dial, and their grandchildren learn Algebra from programmed textbooks.

One unchanging fact remains. Man still needs God as the center and circumference of his life. And the Church, as God's expression, remains constant in the teaching of His Truths.

ALL FOR THE CHURCH
THE CHURCH FOR ALL

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.

Parking Permitted For Homebound

Students preparing to leave for the summer will be permitted to park vehicles on Henderson Street and Old Main Drive May 21-22 and May 24-28, according to Ed Powell, chief of the Campus Security. Powell added that the open space between Law and Puryear Halls will also be reserved for the use of students during the above time periods.

AGGIES,

This summer, if you have a friend who is planning on entering A&M next fall, tell him to write to LOUPOTS, College Station, Texas, for his FREE CAMPUSOLOGY BOOK.

(Don't forget to tell him I'll present him with his free Aggie T-Shirt when he becomes an Aggie.)
