

Head Of Activation Analysis Lab To Present Papers In 4 Countries

Dr. Richard Wainerdi, professor and head of the Activation Analysis Research Laboratory at Texas A&M, will give four invited papers in four countries during the next two weeks.

He addressed the Mid-America Symposium on Spectroscopy Tuesday in Chicago, then flew to Harwell, England, where he will speak Friday to the United Kingdom Atomic Energy Authority on various phases of activation analysis.

Dr. Wainerdi will be in Grenoble, France, June 23 to speak at a joint meeting of the French Atomic Energy Commission and the European Atomic Energy Community, again on various phases of activation analysis.

On June 30 he will speak in Johannesburg, South Africa, during celebration of the 10th anniversary of the South Africa Institute of Physics.

Dr. Wainerdi is speaking under the auspices and sponsorship of the Division of Isotopes Development, United States Atomic Energy Commission.

Richard T. Cherry of the Texas A&M School of Business Administration faculty now is Dr. Cherry.

A&M Visited By Teachers From GMI

Two professors from General Motors Institute, one of the nation's unique colleges, visited Texas A&M recently for an "exchange of ideas." Their host was Professor A. R. Burgess, head of the Department of Industrial Engineering.

General Motors Corp. operates the Institute at Flint, Mich. Among its approximately 2,500 students are GM employs from over the world. Students normally attend classes for six weeks, resume their work assignments for an equal period and then return to the Institute.

The Institute offers specialized training in addition to work leading to the BS degree.

"In the next two or three years we plan to develop an industrial engineering laboratory," Associate Professor George L. Boley said. He and Professor James Bay, chairman of the mechanical engineering laboratory, were on the A&M campus this week.

The A&M Department of Industrial Engineering is among the select few being visited by GMI faculty gathering ideas for their own industrial engineering laboratory.

Professor Burgess said it is impossible to buy industrial engineering lab equipment the way it can be purchased for other fields.

Texas A&M's College of Engineering is the only Southwestern school participating with GMI in a "Bachelor-Master Plan." This provides advanced training in research, design, development and manufacturing for GMI students who finish in the upper 10 percent of their class.

The chosen student receives a fifth year of instruction and may come to Texas A&M. He will receive a BS degree from GMI and an MS degree from A&M. All expenses of the program are paid by General Motors.

- Outside house paint gal. \$1.98
- Latex interior paint gal. \$2.69
- Mufflers—Chevy, others many models \$5.98
- 50 ft. plastic hose \$9.98
- Seat covers low as \$3.98 full set.
- See the new Nylon covers
- Original equip. seat belts \$3.98
- Brake shoes — most cars exchange \$2.90

ry. He has received the Doctor of Philosophy degree in business administration from the University of Texas.

Dr. Cherry teaches finance and investment courses at A&M and his graduate work was in this area.

His dissertation entitled "Small Bank Liquidity" is a study in investment management.

The Houston native received the BA degree from A&M in 1951. He originally entered with the Class of 1949 but left for service with the Marine Corps.

In the 1950s he served in Berlin as a criminal investigation agent in the army. He was a special student in 1955-56 at the Free University in West Berlin.

Dr. Cherry received the MA degree in economics and finance from the UofT in 1959. He taught at Lee College and Lamar State College and then returned to Austin as a lecturer in finance.

Dr. Cherry joined the Texas A&M faculty in 1962.

Dr. Bardin H. Nelson of the Texas A&M Agricultural Economics and Sociology Department left this week for a three-month tour of duty in Syria as consultant for the Ford Foundation.

The professor of Sociology returned from Syria last fall after two years in that country studying socio-economic problems and helping strengthen the University of Aleppo's agricultural program.

One of the purposes of the current trip is to help develop a Socio-Economic Research Institute at the university.

Nelson recently received a \$14,400 grant from The Agricultural Development Council to provide

American and Syrian graduate students research experience in Syria. The Council is a privately endowed organization which encourages national and international agricultural improvement.

Six members of the Texas A&M Department of Dairy Science will attend a Kentucky meeting this month which will attract an estimated 2,000 persons from all over the United States and from other parts of the world.

The session is the 60th annual American Dairy Science Association meeting June 20-23 at the University of Kentucky at Lexington.

Association members are engaged in technical and scientific research, teaching, extension, and commercial applications in both the production and the manufacturing phases of the dairy industry.

Texas A&M personnel who will be participating are Dr. R. E. Leighton, acting head, Department of Dairy Science, Dr. M. A. Brown, Dr. I. I. Peters, Dr. Carl Vanderzant, Dr. Paul R. Shellenberger, and A. M. Meekka. Drs. Brown, Peters, and Vanderzant will present scientific papers based on research conducted by them at Texas A&M.

Dr. Brown's paper is entitled "Techniques for Measuring Evaporation Rates in Dairy Cattle;" Dr. Vanderzant will present a paper on "The Influence of the Temperature of the Plating Media on the Viable Count of Psychotropic Bacteria;" Dr. Peters' paper will deal with "Cheese from Concentrated Milk Products."

Meekka, for the past year, has served as chairman of the As-

sociation's De Laval Extension Award Committee and will read the citation for the winner at the Association's honor award banquet.

Dr. John G. Mackin, head of the Department of Biology at Texas A&M, has been awarded a \$12,823 grant by the Department of Health, Education and Welfare for oyster research.

Receipt of the grant was announced by A&M President Earl Rudder. The grant is for three years of research.

Architecture Class Ends Recent Prison Project

A third year landscape architecture class at Texas A&M has completed a special project for the Diagnostic and Treatment Center of the Texas Department of Corrections.

Located near Huntsville, the Diagnostic and Treatment Center is a relatively new facility for the processing of prisoners before they are assigned to a specific prison unit.

A&M came into the picture when Assistant Warden Paul F. Jacka, Jr., asked the School of Architecture to make a landscape

development study to improve the exterior appearance of the unit.

Robert F. White, professor of landscape architecture at A&M, headed the project involving six students.

"We feel the project was successfully handled," he commented. "There seemed to be more student interest because of the social problem involved."

The study took about three weeks. Students visited the center to make a preliminary sur-

vey. Later they made general design studies, and the end result of their work was finished drawings and a report.

Jacka said it is the intention of the Texas Department of Corrections to follow the suggested plans of the students in future development of the Diagnostic and Treatment Center.

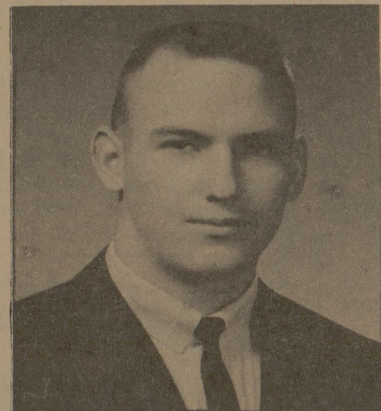

The students were almost totally restricted, for security reasons, from using plant materials within the compound itself.

THESE ARE FOUR FAMILIAR FACES —

Your AggieLand Representatives for FIDELITY UNION LIFE the Leader in Sales to the College Man

AND NOW, We proudly announce the addition of a NEW FACE.....

W. K. (Bill) ALTMAN '65,

an Outstanding Aggie with an outstanding achievement record:

- Who's Who Among Students in American Colleges and Universities.
- Distinguished Student.
- Wall Street Journal Student Achievement Award.
- Sophomore Class President.
- Student Senate — two years.
- Handball team.
- "Aggie Ex" as of May 22, 1965.
