

Additions To Bolton Hall Will Be Completed Soon

A \$40,000 senior electrical machinery laboratory for Texas A&M's Electrical Engineering Department is scheduled for completion during the Fall term.

Funds for the project are being provided by the university, Texas Power and Light Company, and through the cooperation of the General Electric Company.

John Denison, associate professor of electrical engineering, said the laboratory will have equipment of the latest design, including transfer panels, machine sets and control tables.

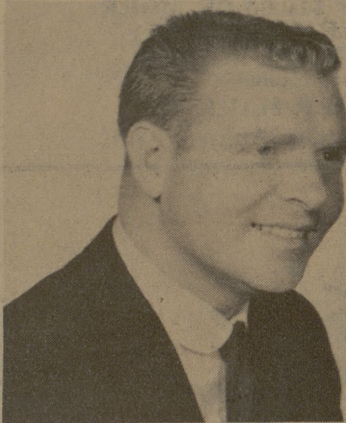

The 50 by 35-foot laboratory is located in the basement of Bolton Hall. An estimated 55 to 60 senior electrical engineering students will use the laboratory each semester.

★ ★ ★

A new student lounge and area is being made from a classroom in the electrical engineering department at Texas A&M University.

Funds for the installation, including furnishings and lighting, were donated by the Texas Power and Light Company.

LSU Photographic Specialist To Join Journalism Faculty

JACK BOGGAN

Jack D. Boggan, administrative assistant to the director of the school of journalism at Louisiana State University, will become an instructor in Texas A&M's Department of Journalism in September.

Boggan replaces Robert P. Knight, an assistant professor on leave to pursue doctoral studies at the University of Missouri.

A 1960 graduate of Northeast Louisiana State College, Boggan for the past year has been assistant director of the Louisiana Scholastic Press Association in addition to regular duties. He

will receive a master's degree in journalism this summer at LSU.

The new instructor taught journalism and supervised publications in the New Orleans public schools for three years. He also served as assistant state editor for the Columbia Broadcasting System during the 1964 presidential election.

Photography will be one of Boggan's special teaching areas, announced Delbert McGuire, head of A&M's Journalism Department.

While in the Army, Boggan compiled two filmstrips on the geography and culture of Korea.

CAMPUS BRIEFS

MSC Programs Adviser Named

Harold (Hal) Gaines, a retired Army Lt. Col., has assumed duties as student programs adviser for the Texas A&M Memorial Student Center.

The native of Fort Worth, his wife and four children, will live at 119 Lee St., College Station. They are Episcopalians.

Colonel Gaines' most recent military assignment was in the office of the deputy chief of operations and training for the 4th Army in San Antonio. Among his tours of duty during the past 25 years were Germany, Turkey and China-Burma-India.

★ ★ ★

Dr. James H. Earle of Texas A&M's Department of Engineering Graphics was elected to the executive committee of a national engineering organization.

The associate professor's appointment was announced this week by Howard Porch, president of the Division of Engineering Graphics, American Society of Engineering Educators.

Earle will serve a three-year term as treasurer of the 1,500-member national group and as circulation manager for their three-times-yearly publication.

★ ★ ★

The first of two short courses this month on theory and application of symmetrical components will be held Aug. 16-20. Professor Lewis M. Haupt Jr. of the electrical engineering department will direct the sessions. The second, the advanced unit is scheduled Aug. 30-Sept. 3.

Approximately 20 engineers are expected for the first course. Registrations have been re-

ceived from engineers with utility firms, oil and petrochemical firms and the Army Corps of Engineers from six states.

They will study a mathematical method of analyzing electrical circuit conditions.

★ ★ ★

Thirty-five security officials of the Gary Job Corps Training Center in San Marcos will participate in a 4-week school taught by Texas A&M's Public Training Staff.

The 40-hour school will begin August 23 at Camp Gary.

The curriculum will include juvenile control, factors in perversion, crowd control, criminal and traffic law and procedures and procedures.

★ ★ ★

Patrick T. McCoy of Ames, Iowa, has been appointed a search assistant in the Transportation Institute.

Charles J. Keese, TTI executive officer, said McCoy will work on highway illumination cooperative research for the Texas Highway Department and the Bureau of Public Roads.

McCoy received the B.S. degree in civil engineering and the M.S. degree in transportation engineering from Iowa State University. He is a member of the National Honor Society, Tau Beta Pi and Phi Kappa Phi.

★ ★ ★

B. R. Lofgren of Houston has joined the Texas A&M Engineering Extension Service as instructor in the Heavy Equipment Operators School.

Lofgren will teach safety, preventative maintenance and operating procedures to heavy equipment operators in counties throughout Texas.

Meteorology Project Directing Project

Dr. William H. Clayton of Texas A&M works on a "jigsaw puzzle" with pieces that continually change their shape.

This describes his approach to understand the parcels of air which form our atmosphere. "Such understanding is necessary for push button weather forecasts," Dr. Clayton said.

He directs a research project at developing mathematical formulas for electronic computer-produced weather forecasts.

"This development is years in the future, he stressed, "but we're working on it. We know a whole lot more than we did 10 years ago."

The A&M associate professor in the Department of Oceanography and Meteorology is using detailed weather records as an aid in developing formulas.

The jigsaw puzzle comes from a concept of the atmosphere as masses of air with different qualities. Dr. Clayton and graduate students working with him ponder such questions as: The thermometer registered 94-degrees at 10 a.m., but actually how much of the air had a temperature of 94 degrees? How far did this formed?

Detailed weather records used for mathematical models were

made by a highly sophisticated system at Cedar Hill, 10 miles south west of Dallas. This part of the study is ended, and data is recorded on reels of tape.

The Army Signal Corps and National Science Foundation sponsor the A&M research project. Funding averages \$100,000 annually with about half going for electronic computer time.

Chinese Wedding Here Next Week

What may be the first Chinese wedding ever to be held in the All-Faiths Chapel is scheduled for August 18 at 10 a.m.

David Yang, A&M graduate student in civil engineering and Theresa Tien-Cheng, a graduate student in education at Indiana are the betrothed couple.

Both are natives of National China and they met at the University of Taiwan. Miss Tien-Cheng attended summer school one session at A&M.

A western ceremony is planned but a pre-nuptial dinner will feature the traditional red and gold color scheme of traditional Chinese weddings.

Bulletin Board

The Indian Students Association will present a full length film from India with English sub-titles at 6 p.m. in the MSC Assembly Room Saturday.

Its title is "Hum Dono" and stars Dev-Anand, Sadhana, and Nanda. Admission will be \$1, and children will be admitted free.

The Memorial Student Center Directorate will hold its last dance for the summer Monday in the MSC ballroom. It is a

Bohemian dance featuring the Brothers Seven. Admission price is \$1 and a door prize will be given.

Charles R. Cargill has announced a dinner to be held at 7:30 p.m. Friday in the MSC Assembly Room in honor of Carl Birdwell, retiring manager of the Exchange Store.

The store manager ends 10 years service in the college field on Sept. 1. Cargill will then assume the manager's responsibility.
