Fish Drill Team Advisors Hope For Another Good Year

The Fish Drill Team — A&M's famous marching unit made up entirely of freshmen — enters its 18th year this fall with a new crop of freshmen.

After sweeping the Louisiana State University and Texas A&M

drill meets last spring, team sponsors are optimistic about grooming another winning unit.

Since 1947 the freshman Class has been represented by its own fancy drill team, led by its own elected officers. Members are

picked on the basis of a competitive drill and satisfactory academic progress. Ribbons are presented to the team members at the end of the year.

Upperclassmen who formerly served on the Fish Drill Team

serve as coaches and advisors for the freshmen.

Notice of tryouts will be given soon.

Browning veal chops in bacon fat gives the meat fine flavor.

Maritime Academy Trains Students For Sea Careers

The Texas Maritime Academy was established Feb. 24, 1962 by the Board of Directors of the Texas A&M University System, by authority of Acts of the 56th Legislature, Regular Session 1959.

The 57th Legislature of 1961, appropriated funds for starting operations and for the development of the Texas Maritime Academy campus at Galveston. An agreement between the Governor of the State of Texas and the Maritime Administrator, Department of Commerce, has been executed.

This agreement, pursuant to the federal Maritime Academy Act of 1958, commits the federal government to provide a suitable training ship, \$75,000 annual funds matching state appropriations, adequate funds for the annual overhaul of the training ship, and a subsistence grant of \$50 per month to each student.

The state on its own part agrees to provide adequate facilities and faculty necessary to conduct a course of training for future officers of the United States Merchant Marine.

The Texas Maritime Academy offers young men the opportunity to continue formal education and, at the same time, to prepare to become licensed ship's officers in the Merchant Marine.

Upon completion of the first semester, the cadet selects one of two areas of specialization: Marine Engineering or Marine Transportation. Thereafter he's known as an Engineer Cadet or as a Deck Cadet.

Upon successful completion of the course of study, three ocean training cruises, and upon passing the United States Coast Guard license examination for a Third Mate or Third Assistant Engineer, a graduate receives a Bachelor of Science Degree in Marine Transportation or in Marine Engineering.

Upon graduation the cadet who has the required qualifications may apply for a commission as Ensign, United States Naval Reserve.

The first school year consists of nine months and the remaining three school years consist of 11 months of instruction and training. The year is divided into two academic semesters and one ocean training cruise. Each sea training period is a required, staff supervised, educational term intended to insure necessary operational training periods and experience for all cadets.

During the three required operational training periods completed, the cadet progresses from the apprentice stage through the artificer level to the junior officer category. In addition to practical experience in ship operations, safety at sea is continuously emphasized and boat drills are conducted in preparation for the "lifeboatmen" examination.

The operational training period includes visits to four to six foreign ports. Different ports are selected each year to provide cadets with a wide range of experience. Ample liberty time is provided in each port, affording cadets the opportunity to visit places of cultural and historic as well as maritime importance.

The Maritime Academy campus is located in Galveston, and forms part of the A&M Marine Laboratory in spacious grounds of the

former Fort Crockett on the shores of the Gulf of Mexico.

The Academy building, a three story, concrete structure, provides messing and living spaces as well as classrooms and administrative offices. These accommodations are very modern and all spaces are air-conditioned.

Galveston's concrete piers and warehouses provide berthing accommodations for 40 modern ships. A large shipyard is nearby. These shipyard facilities will help serve as a laboratory for the students. In addition, NS Savannah, the first atomic powered merchant ship in the world, is to be regularly serviced in Galveston. Galveston promises to become an important center for commercial nuclear propulsion.

During their freshman year, Cadets participate in the Corps of Cadets at Texas A&M. While on the A&M campus the cadets will wear the Corps uniform, with a special designed Maritime Academy patch on the shoulder.

Starting with their first training cruise, the cadets will turn in the Corps of Cadet uniforms and will shift to midshipman type uniforms of dress blues, whites, and khaki.

The primary aim of the Academy is to prepare young men for leadership at sea, eventually as master and chief engineers.

Army, Air Force Summer Campers Win ROTC Honors

Texas A&M senior cadets turned in a performance unmatched by any other university at ROTC camps this summer.

Aggies captured the outstanding cadet awards at both Army and Air Force ROTC camps.

Robert May was named top cadet in the Fourth Army camp at Fort Sill, Okla. John Weber was number two cadet.

Aggies were top cadets in six of 12 companies and 18 of 24 platoons.

Top company cadets were Lloyd Chester, Robert May, John Overton, Arnold Smith, William Ward and John Weber.

John Gay, Danny Gordon and John Shields were rated second in their companies.

Twelve Aggies were named second in their platoons.

Distinguished Military Student designations were tentatively awarded to 101 of 199 Aggies at the camp.

Robert Harcrow was named outstanding cadet at Robins Air Force Base, Ga., to take top honors among the 89 Aggies who attended summer camp at 15 Air Bases.

Five Aggies were chosen top cadets in their flights. They include Kenneth Wille, Hamilton AFB, Cal.; Frank Watson, Fairchild AFB, Wash.; Ronald Schappough, Maxwell AFB, Ala.; Michael Beck, Otis AFB, Mass., and Alton Phelps, Lowry AFB, Colo.

Seventy-two Aggies finished camp in the top half of their flights.

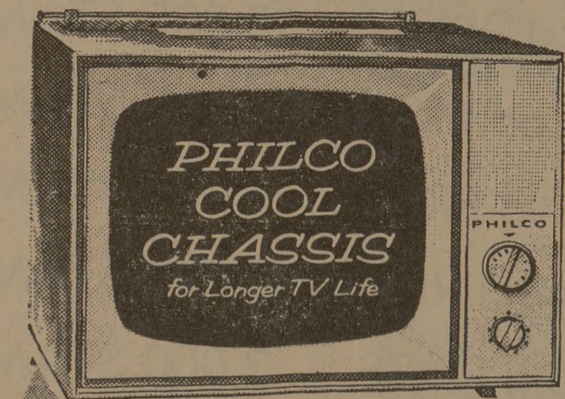

Alan Gray was named second best cadet at James Connally AFB in Waco. David Trifon was named outstanding athlete at Connally and Lonnie Powell won the pistol marksmanship award.
