

# Among The Profs Officials Visiting At Air University

Twelve Texas A&M officials will fly to Maxwell AFB, Ala. Tuesday to tour the Air University.

A two-day visit will include briefings on Air University activities throughout the world and the new Air ROTC program.

Guests for the trip include Dr. Wayne C. Hall, academic vice president; Dr. John C. Calhoun, vice president for programs; Dr. William J. Graff, dean of academic administration; Dr. Frank W. R. Hubert, dean of liberal arts; Dr. Charles F. Squire, associate dean of science; Dr. C. H. Ransdell, assistant dean of

engineering; Dr. A. E. Cronk, head of aerospace engineering; Dr. J. G. Potter, head of physics; Dr. A. F. Isbell, professor of chemistry; and Joe Buser, assistant director of information.

Escort officers include Col. Raymond C. Lee Jr., professor of aerospace studies, and Maj. Bobby Dudley, associate professor of aerospace studies.

## Russell Certified As Vet Diplomat

Dr. L. H. Russell of the Texas A&M College of Veterinary Medicine has been certified as a diplomate of the American Board of Veterinary Public Health.

Russell is an associate professor in the Department of Veterinary Public Health.

The ABVPH, an affiliate of the American Veterinary Medical Association, was organized to encourage development, practice and advancement of veterinary public health and to recognize outstanding contributions in that field.

Dr. A. A. Price, dean of the College of Veterinary Medicine, said diplomates are not certified for proficiency in veterinary public health until they demonstrate to the board's satisfaction that they possess special knowledge and skills.

## THE PRINCE AND THE ACTRESS

Prince Philip chats with actress Dianne Cilento and appears oblivious of her daring gown as he meets the stars of "The Agony and the Ecstasy" at the Royal premiere in London. The actress, who is also the wife of Sean Connery, wears a backless dress with a bare midriff. (AP Wirephoto)

# Housewives Start Crusade For Nuttier Peanut Butter

By RAYMOND J. CROWLEY  
WASHINGTON (AP) — Housewives crusading for more peanuts in peanut butter won a preliminary round Monday, but the real crunch is yet to come.

Led by grandmotherly Mrs. Ruth Desmond, president of the Federation of Homemakers, they persuaded federal examiners to at least let them argue that any par containing less than 95 per cent peanuts should be labeled peanut spread, not peanut butter.

Peanuts butter tycoons sent their attorneys to battle such a change, which would alter the labels on much of the peanut butter now on the market.

They said, in effect, that the women were pulling a fast one; that before now in the proceedings the idea of a government decree mentioning spread had never been mentioned and was now out of order.

The Peanut Butter Manufacturers Association objects that the order would turn back the clock of science; that without modern stabilizers, derived from vegetable oil and other materials, peanut butter would turn rancid quickly.

"Moreover, it would stick to the roof of your mouth; it would

tear holes in your bread when you tried to spread it," said James Mack, the association's managing director.

## The Young Man in the Know Knows "Dacron".

Feels great, looks great in his classic shawl-collar tuxedo of 55% Dacron\* polyester, 45% worsted wool. Wrinkles haven't a chance. At fine stores everywhere.

# Grants Given For Summer Of Researching

National Science Foundation grants totaling \$97,020 for three summer programs at Texas A&M have been renewed, President Earl Rudder announced.

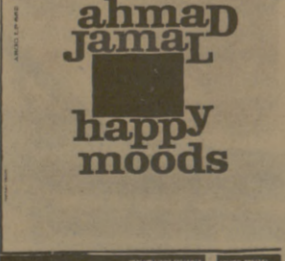

The three programs for junior and senior college teachers in physical science are institutes of activation analysis, physics and radioisotope technology.

Largest of the programs is the Institute of Physics for 36 teachers from junior colleges and smaller senior colleges.

Next summer 24 persons start their second year of study toward a master's degree and 12 teachers return for the fourth summer. C. M. Loyd, NSF coordinator for A&M, said a few qualified teachers may enter the program at the second level.

Grants also include an \$11,740 allocation for the six-week institute in activation analysis for 16 teachers.

Going into its fifth summer under a grant of \$14,680 is the six-week course in radioisotope technology. Dr. Donald R. Emon, head of the nuclear engineering department, directs this course for 20 teachers with Neil Poulson, A&M instructor, as associate director.
