THURSDAY

Ablene Hometown Club will meet Thursday at 7:30 p.m. in Room 206 of the Academic Building.

Bay Area Hometown Club will meet Thursday at 7:30 p.m. in Room 108 of the Academic Building. Aggie football films will be shown.

Bellaire Hometown Club will meet Thursday at 7:30 p.m. in the Fashion Room of the YMCA. Party tickets will be given out.

Biology Graduate Wives Club will have a rummage sale Saturday behind Orr's downtown at 8:30 a.m.

Brazoria County Hometown Club will meet Thursday in Room 25 of the Academic Building at 8:00 p.m.

Corpus Christi Hometown Club will meet Thursday at 7:30 p.m. in Room 205 of the Academic Building.

Dallas Hometown Club will meet Thursday at 7:30 in Room 1-C of the Memorial Student Center.

Deep East Texas Hometown Club will meet Thursday at 7:30 a.m. in the Leggett Hall Lounge.

El Paso Hometown Club will meet Thursday after Yell Practice in Room 2-B of the MSC. Bids will be arranged for Thanksgiving.

Fort Worth Hometown Club will meet Thursday at 7:30 p.m. in Room 3-C of the MSC.

Galveston Island Hometown Club will meet Thursday after Yell Practice in Room 3-C of the MSC.

Houston Hometown Club will meet Thursday at 7:30 p.m. at the Main Desk of the MSC. The Club picture will be taken. Class A uniform or sports coats should be worn.

Laredo Hometown Club will meet Thursday at 7:30 p.m. in the Fountain Room of the YMCA. The club picture will be taken.

Mason - McCulloch County Hometown Club will meet Thursday at 7:30 p.m. in the Reading Room of the YMCA.

Rio Grande Valley Hometown Club will meet Thursday at 7:30 p.m. in Room 204 of the Academic Building. Plans for the Christmas Party in Mexico will be made.

San Angelo-West Texas Hometown Club will meet Thursday at 7:30 p.m. in the MSC.

Semper Fidelis Society will meet Thursday at 7:30 p.m. in Room 104 of the Biology Building.

South Louisiana Hometown Club will meet Thursday at 7:30 p.m. in Room 106 of the Academic Building.

Texarkana Area Hometown Club will meet Thursday at 7:30 p.m., in Room 203 of the Academic Building.

Waco-McLennan County Hometown Club will meet at 8 p.m. Thursday in the Anderson Room of the YMCA.

Wichita Falls Hometown Club will meet Thursday at 7:30 p.m. in the Bio-Sciences Building.

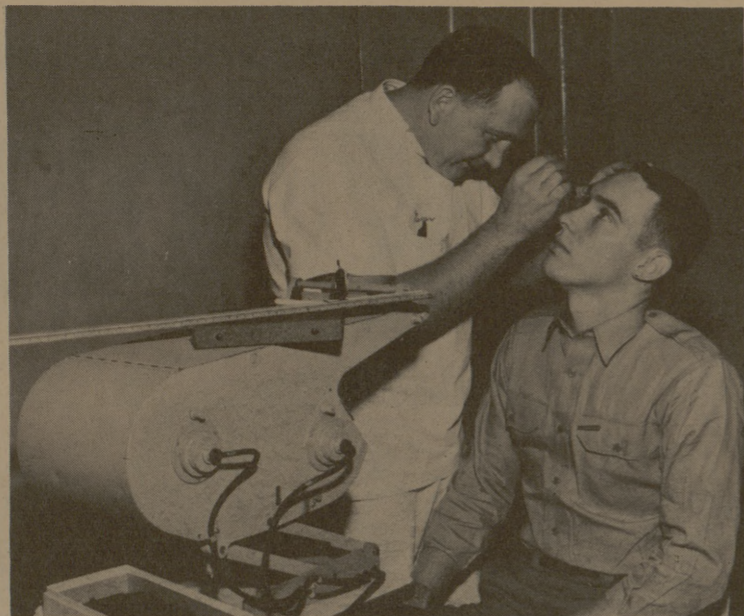

**Whooping Cranes Arrive At Aransas**

WASHINGTON (AP) — Thirty-eight whooping cranes have arrived at the Aransas National Wildlife Refuge on the Texas coast, their winter home.

The Interior Department received a report that three more adult whoopers had been spotted on a lake west of Panhandle, Tex.

The birds — 31 adults and 7 young — were counted in an aerial survey Tuesday.

A record 42 cranes left the Texas refuge last spring for nesting grounds in Northern Canada.

**AIR FORCE PHYSICALS**

Ralph Stevener of Bryan gets his eyes dilated for visual tests administered with Air Force physicals being given sophomores at Texas A&M. Staff Sergeant Darold Meyer from Carswell Air Force Base gives the tests. Stevener is the son of Mr. and Mrs. Arnold Stevener who lives in the Tabor community.

**Peking Attacks Moscow Again**

By WILLIAM L. RYAN

(AP) Special Correspondent

The latest propaganda salvos exchanged by Moscow and Peking suggest that Red China, dismayed by the mauling inflicted on Viet Nam Communists, fears that without significant help, the tide may have turned against the Red cause.

This would explain the boiling anger in new Chinese attacks on Moscow which already may have brought the dispute between the two Communist giants beyond a point of no return.

Moscow, its patience with Peking close to the cracking point, claimed this week that it sought "unity of action" on Viet Nam and that Peking spurned it. The article in the Soviet Communist party paper Pravda did not explain what it meant by "unity of action," but there have been hints.

What Moscow wanted, according to sources who should know, was a "Communist summit" meeting on Viet Nam to coordinate world Communist policy. Peking would have no part of it.

Evidently the Russians argued that some sort of settlement in Viet Nam might in the long run benefit world communism. Peking saw this as back-stage plotting to accommodate the Americans and end the fighting.

China may see Viet Nam — and Southeast Asia — slipping from its grasp. Victory for the Americans might be far off, but for the Communist side winning is becoming a dimmer prospect all the time, barring more powerful outside help.

Prudently, the Chinese have not wanted to provide this help on their own and leave themselves vulnerable to the consequences, but there is a sound of desperation in their propaganda which indicates they may even now be thinking in terms of "volunteers" in the style of Korea.

Up to now, the Soviet Union has given North Viet Nam "defense" aid. In effect, China says this is a poor way to run a world revolution.

In a long article hailing the 48th anniversary of the Bolshevik Revolution, People's Daily of Peking said the October revolution pointed the only road to Communist triumph and all must follow it.

"The road of the October revolution was the road of revolution by violence. Seizure of political power by armed force is the central task and highest form of revolution. This is a universal law," it said.

**Sophomores Undergo Physicals**

Sophomores are being thumped, spun and sent through all manner of contraptions at Texas A&M this week. But it isn't a form of hazing.

Around 265 cadets are undergoing physicals at the University Hospital. An Air Force detachment of 18 from Bergstrom and Carswell Bases are giving examinations.

Among sophomores who hope to enter A&M's professional officers course is Ralph Stevener of Bryan. The son of Mr. and Mrs. Arnold Stevener of Tabor community is majoring in agricultural engineering.

Stevener is scholastic corporal of Squadron 13 and has a 2.0 grade point ratio. He is a graduate of Stephen F. Austin High School in Bryan where he was active in FFA work.

Physicals given by Air Force personnel under command of Lt. Col. Robert H. Frey is one of a series of requirements freshmen and sophomores in aerospace studies must pass in order to enter the officers course.

Students must have a GPR of 1.1, pass an Air Force Officer Qualifications Test and physical to go into contract and studies that lead to a commission in the Air Force.

**Earle Authors National Article**

Dr. James H. Earle, associate professor of engineering graphics at Texas A&M, is the author of an article in Graphic Science, a national publication.

"Industrial Consultation for Graphics Instruction" stresses the need for close relationships with industry to maintain up-to-date course offerings in engineering graphics.

**Moon May Contain Water, Diamonds**

By RALPH DIGHTON  
AP Science Writer  
LA JOLLA, Calif. (AP) — A scientist says the moon, generally believed to be a dry and barren chunk of rock, may have water and diamonds in its crust.

Nobel Prize-winning chemist Harold C. Frey told science writers Tuesday that the heat and

pressure he believes created the moon from space gas and dust also would have formed diamonds on or near its surface.

The same theory of the moon's origin leads to the possibility that water, condensed from gases, may lie beneath the moon's surface.

Upward seepage of this water,

Dr. Urey said, may explain the broad flat plains on the moon which resemble dried-up ocean beds.

Ancient astronomers thought the plains were large bodies of water and called them maria, the Latin word for seas.

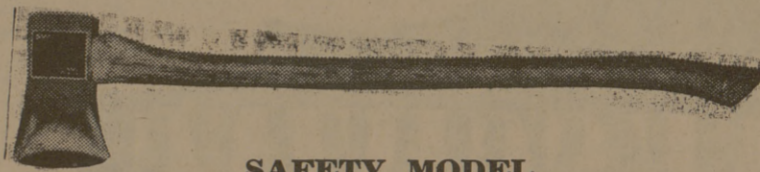

Dr. Urey won the 1934 Nobel Prize for discovering deuterium,

an element of the hydrogen bomb.

He said some of the craters on the moon's surface may not be volcanoes, but the openings of tubes through which water has gushed to the surface.

Urey spoke at the third annual briefing on new frontiers of science.

**How to make a holiday last all year long**

"How often do you call Long Distance to friends or members of the family?"

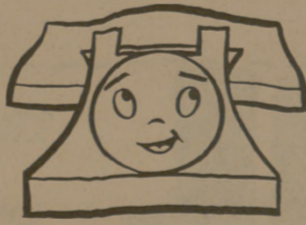

"Well, I expect to make some calls on Thanksgiving and maybe on Christmas."

"Why wait for a holiday or special occasion to call — that's the old fashioned way!"

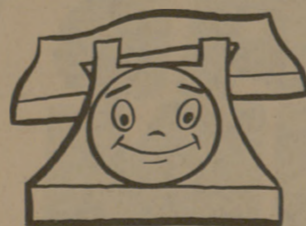

"How come? Is the phone company having a sale just now?"

"No, not that. New low-cost long distance rates are now in effect **all day Sunday** and every night after eight — so now for a dollar or less, you can keep in touch more often."

"Say! That's a good idea! Tonight I'll make some important calls I've been putting off."

"Fine! Thanks to new low rates, you can call anywhere in continental U. S.\* station-to-station and talk three minutes for \$1.00 or less. This is the big communications bargain — the modern way to keep in touch at all times."

\* Except Alaska.
