

Phillips Exec To Lecture In Chemistry Feb. 17-24

Dr. Gerard Kraus, a manager for Phillips Petroleum Company Research Laboratories in Bartlesville, Okla., will be visiting professor of chemistry Thursday through Feb. 24.

Dr. Clarence Zener, dean of the College of Science, announced Kraus as the first participant in the new industrial-academic lectureship in chemistry.

The visiting professor will head two polymer chemistry technical seminars, at 4 p.m. Thursday and 4 p.m. Feb. 23. A general talk: "New Synthetic Rubber" is

scheduled for 8 p.m. Feb. 21 in room 231 of the Chemistry Building.

Kraus, author of more than 60 publications and patents, is editor of a new book, "Reinforcement of Elastomers". He is a past chairman of Gordon Research Conferences and 1963 tour speaker for the American Chemical Society.

Dean Zener said outstanding industrial scientists will lecture periodically at A&M to further cooperation between the university and industry.

PATRIOTIC DECAL MARKETED

A decal designed to demonstrate that most Americans support the efforts of U. S. soldiers in Viet Nam has been introduced by a New York firm. The decal features the colors of red, white and blue and is suitable for transfer to any surface. Proceeds from sales will benefit armed forces USO clubs throughout the world. The decals may be purchased in packages of three for \$1 from the Duplex T Sales Company, 475 Fifth Avenue, New York City, N. Y.

People-to-People Sets Foreign Student Trip

The Student Affairs Office is accepting applications from foreign students who wish to stay with families in San Antonio Feb. 19-20.

Don Dietz, senior from Corpus Christi and chairman of the People-to-People program, said 25 students can participate in this program, which is sponsored by the A&M Club and the A&M Mother's Club of San Antonio. He added that students must sign up and pay \$2 for transportation at the Student Affairs Office by Tuesday.

Activities will include a Saturday evening meal and Sunday breakfast at the families' homes. Dietz said the group will visit the Alamo, San Jose Mission, the San Antonio Zoo, La Villita, the Spanish Governor's Palace, the Sunken Gardens and the Job Corps Center at Camp Gary.

Students will meet in front of the YMCA at 8 a.m. Saturday and will return Sunday afternoon. Cars for the trip will be provided by U. S. students.

12 To Complete Training School

Twelve participants in a pioneer specialty contractors project training school will receive cer-

tificates Feb. 25.

R. L. Patrick, coordinator for the Engineering Extension Service-sponsored school, said the graduates will work as job superintendents or project managers at salaries up to \$12,000 annually.

Most of the men have completed apprentice training in mechanical construction jobs. They spent 21 weeks taking instruction in mathematics, engineering graphics, counseling and other subjects. They also heard lectures by 45 representatives of Texas industry.

A second session of the school begins March 14. It lasts 20 weeks, ending July 29, Patrick announced. Enrollment will be limited to 20 men.

A&M Home Manual Translated To French

A Texas A&M University self-build manual for adobe, rammed earth, and soil block homes has been translated into French for further use in underdeveloped countries of the world, according to Prof. Bob M. Gallaway, head of the materials department of the Texas Transportation Institute.

The publication, entitled "Handbook for Building Homes of Earth," was written by Lyle

A. Wolfskill, Wayne A. Dunlap and Bob M. Gallaway after research by the Texas Transportation Institute for the Office of International Housing, Housing and Home Finance Agency, to develop and adapt construction methods for practical application by unskilled natives in countries faced with housing problems. The work was conducted under a contract of the Texas A&M Research Foundation.

The teachings of the manual were applied extensively in foreign countries through guidance of the U. S. Agency for International Development. Greatest emphasis has been in building homes of soil blocks pressed in Cinva ram presses which TTI proved out in experiments for successful AID use, Gallaway said.

The translation is announced in AID's Techniques Americanas, No. 88, and is entitled "Bater en terre." It will be used in countries where French is the official language.

HUMPTY DUMPTY CHILDREN CENTER

Now taking applications for enrollment in Bryan's only facility built for children.

Watch That THUMB!

Peter loves to "fix things," even though he sometimes gets hurt in the process. Yesterday he pinched his finger with the pliers. Today, he'll probably end up by banging his thumb with the hammer. But tomorrow he'll be right back at it again... learning the hard way!

From childhood, we learn best by personal experience. Our natural curiosity makes it difficult for us to accept advice from others. We want to find out for ourselves... and life has some hard lessons to teach us. Among other things, we have to discover that material possessions are no guarantee of happiness... and that money can't buy love, or health, or peace of mind.

Religious faith is another aspect of life that must not be left unexplored. Christianity has been tested by time... and it stands ready to be tested by YOU. Don't miss the greatest experience of all. Visit the church of your choice this Sunday.

THE CHURCH FOR ALL... ALL FOR THE CHURCH

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.
