Campus Briefs

1958 Coed Win Reversed

(Continued from Page 1)
 managing, controlling and conducting the college, granting them full and adequate powers to establish and enforce all proper and needful rules for carrying out their duties," the defendants' brief claimed.
 The brief's concluding argument held that the admission of women would change the basic nature of the college and thus would require radical changes.
 For example, the college would be forced to build dormitories for women and hire supervisors for them, imposing additional burdens on taxpayers.
 The Barron father-son team based their argument on the premise that the women were entitled to the same legal rights as men and to deny them admission to a state school was discrimination.
 John Barron pointed out that A&M was the only one of the 69 grant land colleges that had refused to enroll women.
 He also contended that 68 per cent of the courses offered by A&M were as suitable for women as for men.
 But the heart of the plaintiffs' case was hinged upon the ques-

tion of discrimination and claims of violation of the Constitutional guarantees of due process and equal protection of the law.
 Judge McDonald, like John Barron, ordered the college to admit the Barron A&M former student, two women March 26, 1958.
 McDonald's 11-page judgement found:
 —That the Constitution and state laws did not provide for the exclusion of women from the college.
 —That exclusion of the plaintiffs was in violation of the due process of law clause in the Texas Constitution.
 —That the all-male policy violated the section of the 14th amendment to the federal Constitution regarding separate and equal facilities and equal protection of the law.
 —That the Board did not have the authority to prohibit women from A&M and by doing so had overstepped its power.
 "The Board of Directors of said college has abused its authority . . . has exceeded any and all authority invested in it by the Legislature of this State, and has capriciously and arbitrarily exercised a function contrary to

the public interests of the citizens of the State of Texas," McDonald ruled.
 He also found that the Legislature had not intended to forbid coeducation at the college.
 "If the Texas Legislature had intended to delegate any such authority to said Board of Directors such a simple, basic, uncomplicated legislative function to an administrative board, and the Legislature itself would have spelled out . . . that it was their intent to exclude females, and the Agricultural and Mechanical College of Texas would have been designated as an all-male school," he emphasized.
 McDonald ordered the defendants to "proceed with all reasonable dispatch to enroll, register and accept the relators . . . as students, with the same right of entry as a qualified male student."
 The Barrons' victory was brief, however, as a Waco Court of Civil Appeals reversed the lower court decision October 2.
 The case reached the national Supreme Court April, 1959, and the high court refused to consider the appeal by a one-vote margin.
 But Barron wasn't finished. He immediately began preparations for a new lawsuit and filed it in again McDonald's court Nov. 5, 1959.
 Plaintiffs were Margaret Allred, a student at Texas Tech; Sarah Hutto, student at Allen Academy, and Mrs. Mary Ann Parker, wife of a Bryan businessman.
 After a two-hour session McDonald ruled against the women in the basis of the first case.
 "Although I felt I gave proper interpretation to the law in the previous case," he explained, "the higher court saw fit to reverse my decision. I have no choice but to follow the ruling of the higher court."
 Barron's appeal passed swiftly through state appellate courts and the federal Supreme Court again refused to reconsider the case, by the same margin of a single vote.
 The fight for coeducation had been thwarted once more, yet within five years women would be attending A&M. And John Barron feels the cases, although unsuccessful, may have helped turn the tide against the all-male tradition.
 "The suits brought the problem out into the open," he says today. "The development of all the facts was instrumental in putting the truth on both sides to the public, and it put them to thinking."
 "When it can be done without radical change I think the Board will finally come around to it."
 (Next: Legislative attempts.)

Utilities Firm Exec To Speak Monday

Harold E. Mortimer, assistant to the board chairman of Gulf State Utilities in Houston, will speak Monday at Texas A&M.
 Mortimer will address the A&M chapter of the American Nuclear Society at 7:30 p.m. in room 211 of the W. T. Doherty Building, chapter president Clarence Beck announced.
 The speaker is a member of the Southwest Atomic Energy Association and an electrical engineering graduate of Rice University. His company is working on the Sefor Reactor Project, reportedly the largest "fast" reactor in the world.

3 Staffers Author Highway Article

An article written by three faculty-staff members is featured in the February issue of "Highway Research Record," a National Academy of Sciences publication.
 "Effects of Mineral Fillers in Slurry Seal Mixtures" concerns asphaltic material developed at A&M's Texas Transportation Institute.
 Authors include assistant TTI research engineer William J. Harper, civil engineering Professor Bob M. Galloway, and civil engineering Associate Professor Rudolf A. Jimenez, now on the Arizona University faculty.

Suggestions Needed For Senior Gift

Senior class officers are asking for suggestions from all seniors for a gift to be given to the university in the class's name. About \$1,000 is available, according to class president Norris Cano.

Baker To Speak At Last Lecture

Col. D. L. Baker, professor of Military Science and Commandant of the Corps of Cadets, will speak at the third program of the "Last Lecture Series" at 6 p.m. Feb. 21 at the YMCA.
 The native Texan received a diploma and commission from A&M in 1933. He entered active duty in 1941 and in 1941 joined the Third Army Headquarters. Baker served as a staff officer with that command in the European Theater until the end of World War II.
 In 1949 he assumed command of the 2nd Battalion, 17th Infantry Regiment, and held that post through 1951, the unit's first years of combat in Korea. During 1956-1957 the colonel commanded the 27th Infantry Regiment.
 Baker has attended several schools, including the Advanced Infantry Officers' Course, Command and General Staff School and the Army War College. His decorations include the Combat Infantryman's Badge, Silver Star with Oak Leaf Cluster and Bronze Star with V device and two Oak Leaf Clusters.
 He started work at A&M in 1963 as professor of military science and Commandant of the Corps, following his assignment as chief of the Special Review Division in the Office of the Deputy Chief of Staff for Personnel (Army) Headquarters in the Pentagon.

Suggestions should be turned in to the officers or John Moore, Glenn Dromgoole, Andy Cronk or Tom Murrach.

Students Attend Games Tournament

Bowling, billiards and pool delegates from Texas A&M will compete in the Association of College Union Games Tournament Friday and Saturday at Louisiana State University.
 Richard Rassmussen, Bob Brandt, Perry Kinder, Fred White and John Taylor will compete in singles, doubles and team bowling events.
 Leo Montalvo will represent Aggieland in three-cushion billiards, and Mike Brown will shoot straight pool.
 They will be accompanied by Larry Ringer, a graduate student.

Job Calls

MONDAY
 Xerox Corporation — business administration, marketing.
 Mead Corporation — agricultural economics, business administration, economics, industrial distribution.
 Liberty Mutual Insurance Company — agricultural economics, business administration, economics, industrial education, industrial distribution.
 Kerr - McGee, Corporation — chemical engineering, civil engineering, electrical engineering, mechanical engineering, petroleum engineering.
 California State Government — civil engineering.
 Continental Can Company — chemical engineering, electrical engineering, industrial engineering, mechanical engineering, business administration.

MONDAY and TUESDAY

Goodyear Aircraft Corporation — chemical engineering, chemistry, industrial engineering, mechanical engineering.
 Goodyear Tire and Rubber Company — chemical engineering, chemistry, industrial engineering, mechanical engineering.
TUESDAY
 Continental Oil Company — chemical engineering, chemistry, petroleum engineering, physics, geology, mathematics, agronomy, civil engineering, electrical engineering, industrial engineering, mechanical engineering.
 Continental Pipe Line Company — chemical engineering, civil engineering, electrical engineering, industrial engineering, mechanical engineering, petroleum engineering.
 Employers Casualty Company — accounting, economics, finance, management, marketing, mathematics.
 Texas Employers Insurance Association — chemical engineering, civil engineering, electrical engineering, industrial engineering, mechanical engineering, petroleum engineering.
 Caterpillar Tractor Company — agricultural engineering, chemical engineering, civil engineering, mechanical engineering, industrial engineering, electrical engineering.
 Goodyear Aerospace Corporation — aerospace engineering, civil engineering, electrical engineering, mechanical engineering, mathematics, physics.

A Great Leader Still Leads

It has been said that a man is tallest when he is on his knees. The familiar picture of George Washington kneeling in prayer at Valley Forge reminds us that the "Father of our Country" was a man who walked close to God and who taught his soldiers to pray.
 Washington recognized that human frailty is not a sign of weakness—that it is the first step toward finding the needed strength. To call upon God for the resources we lack is to supply our deepest want.
 The example of our first President still points men to God. Just as George Washington found God's strength available, so do men in our time when they call upon Him in faith. Discover Him in your own life. Worship God in your church next Sunday.
