COLLEGE STATION, TEXAS TUESDAY, MARCH 22, 1966

Number 286

By Glenn Dromgoole

Mr. Larry Jerden Associate Editor The Battalion Dear Larry,

It's come that time of the year again when you will start receiving letters addressed to me from people campaigning for various "positions of leadership" on

You will discover, I am sure, that most of them will say the same things: Class officer candidates will advocate a "greater, stronger, united class" and Student Senate office-seekers will urge "better government and Corps-civilian unity." Very few student candidates in fact, almost none - will advocate any concrete proposals for strengthening or bettering or uniting their class or the student body and its government.

Therefore, I am issuing a new policy concerning our Sound-Off column. This space is reserved for student opinion, and I do not propose in the least to interfere with this philosophy. I don't think, however, that Sound-Off was or is intended as a medium for propagating popularity contests, which as you know is about all our campus elections amount

As of now, and until another Battalion editor issues a contradictory policy, campaign letters will not be printed in Sound-Off unless they advocate positive programs. No more generalities, no more tear-jerkin appeals to end student apathy, no more solutions to Corps-civilian rivalry, no more banner-waving or motherhoodpraising, no more appeals for 'better, stronger" student govern-

Sound-Off will be a voice of student opinion, and I sincerely hope this policy will assist in maintaining such a medium for thought and exchange of ideas.

You will receive an enormous amount of criticism for this policy as you turn away candidate after candidate for their failure to meet our standards. You have my wholehearted support on your decisions, and the choice will be yours whether a letter is acceptable or not. I realize this will be discriminatory, but some dis-crimination is needed if we are to separate the Who's Who-seekers sex? from the dedicated students who can offer something to our stu-

Let's raise our standards, and let the candidates meet them.

# grab | Comic Makes Chemistry Fun

By DANI PRESSWOOD **Battlion News Editor** 

Princeton University's Dr. Hubert N. Alyea may have displayed remarkable skill in the field of chemistry Monday night.

But his scientific abilities were outshined by his superb showmanship as he left a Chemistry Lecture Room capacity crowd rolling in the aisles with his demonstration of "How To Make Chemistry

Actually, his subject was titled 'Lucky Accidents, Great Discoveries and the Prepared Mind," but it was presented in such a way as to make diehard English majors want to switch to chem-

"I'm going to show you the principle of rapid burning," he said at one point.

He then commenced to light a candle at both ends. With this he added a tidbit of knowledge

#### **Bowman Presents Marriage Forum** On Marital Sex

Dr. Henry Bowman will return Tuesday night to give the fourth of five Marriage Forums.

His talk on "Sex in Human Relations-Marital" will be presented in the YMCA at 7:30 p.m.

Bowman spoke to a predominantly male and overflow crowd last week when he spoke about premarital relations.

Bowman utilized audience participation and created a stir when he came out unequivocally against premarital intercourse.

A University of Texas sociologist, Bowman is a nationally famous authority on marriage and

He has served on the National Council on Family Relations and is an educator and author of such books as "Marriage for Moderns." Bowman will discuss:

-How important is sexual compatibility in the total mar-

riage relationship? -Sexual relations in marriage as factors affecting marital ad-

-Complex causes of sex adjustment or maladjustment.

-Planned parenthood. -What does religion say about

-What the sexes need to un-

derstand about each other. Bowman has visited Australia and New Zealand to lecture for the U.S. State Department and is listed in Who's Who in Amer-

undoubtedly gained from many years of experimentation and re-

"If you burn your candle at both ends you live only half as long," he informed. "But it's more than twice the fun."

Singing the Princeton alma mater as he conducted one experiment, Alyea made a jar of liquid turn from blue to orange to black, his school colors, at appropriate places in the song.

Alyea kept the audience enthralled with his eye-raising experiments using previously-prepared chemicals.

At times becoming the typical "mad scientist," the ranting, rambling professor demonstrated with foaming jars, violet smoke and weird flame-throwing mix-

If there was ever to be a dull moment, Alyea kept it well hidden with such antics as spraying the audience with harmless smoke from a fire extinguisher and harassing a frustrated photographer.

While using his various attention-getters, Alyea's basic theme was the exposition of how great discoveries have come about through lucky mishaps.

"A fantastic number of accidents changed the role of science," he explained.

"And when the lucky accident occurred there was always a prepared mind."

Alyea cited the prime examples of Alfred Nobel's accidental discovery of dynamite and Alexander Fleming's perchance encounter of penicillin.

He described the unusual circumstances surrounding the development of atomic energy and the ping pong ball, the mouse trap conception of the atomic

Turning to the subject of "Why Instructors Demonstrate," Alyea aimed his discourse at the chemistry teachers in the audience.

He said demonstration is 15 per cent to arouse curiosity, 15 per cent observation, 15 per cent illustration and 55 per cent making students think.

"If you're really going to train the mind to make discoveries, you must have quality learning and quality living," he declared.

Alyea also advised instructors to maintain their research while teaching. He exemplified this with the demonstration of his home made, self-invented projector which enlarges images of experiments on a screen while they are carried on.

Alyea has lectured in 40 foreign countries including six months each at the World's Fair in Brussels and Seattle.

COMIC CHEMIST CONVULSES CROWD

# 350 Expected For Saturday **Drill Contest**

Battalion Staff Writer Thirteen top college drill teams will participate in the second annual Texas Invitational Drill Meet Saturday on the main drill

Visiting teams from Louisiana, Oklahoma and Texas will compete for \$400 worth of trophies.

Approximately 350 ROTC cadets and cadre officers will begin arriving on campus Friday afternoon. At 6 a.m. Saturday they will breakfast in Duncan Dining Hall and, after a welcome by Col. D. L. Baker, will have a commander's conference.

Following an assembly and a short welcome address by Dean of Student James P. Hannigan, they will undergo the inspection and basic drill phase of the meet. In the afternoon, the drill teams

as research progresses."

Marching Saturday will be the A&M Fish Drill Team, the Buccaneer Drill Team from the University of Texas, the Lowman Rifles from Sam Houston State College, the Kings Rifles from Texas A&I College, the Cougar Rifles from the University of Houston, Company L-17 (the Pershing Rifles) from Hardin-Simmons University, the Minutemen and the Pershing Rifles from Oklahoma State University, the Marion Guard from St. Mary's University in San Antonio, the ROTC Drill Team from Arkansas Polytechnic College, the Keathley Rifles from Cameron State College of Oklahoma, the Pershing-Ware Rifles from Mc-Neese State College of Louisiana, and the Sam Houston Rifles from

West Texas State University. Performances will be graded on a scale of 1,000 points. The inspection phase will count for 150 points, the basic drill for 150 points, and precision drill for 500 points. The precision portion of the contest will be graded on intricacy, precision, and originality of movement.

The master trophy is awarded to the best overall unit. It is a rotating trophy that is presented to the winner for one year, but if one unit wins it three consecutive years, it will be awarded permanently to that unit.

Warren Matthews, president of the Association of Former Fish Drill Team Members, expects "an interesting afternoon, with real varied performances . . . no two teams alike."

"There will be a high level of performance," he continued. "All the others (except the Fish Drill Team) are four-year teams and several hope to go to the Cherry Blossom Festival in Washington, D.C., the top drill meet in the

tended until noon Wednesday. writing for a column on the Tickets may be picked up from all dorm counselors. The Battalion won second in the

Weekend festivities include a barbecue, invitational drill meet, Town Hall performance by Bren-DeFrank was elected parliada Lee, baseball game with the University of Texas, presenta-tion of "The Time of Your Life" mentarian of the SWJC Student Press Club for the 1966 congress, scheduled next March at East by the Aggie Players and a civilian dance

## A&M, Tech, UT Establish Water Research Program

Texas A&M is one of three State's water resources needs. state institutions of higher education joined in a cooperative program of water resources research in Texas.

Through an agreement with the University of Texas and Texas Technological College, A&M will work in planning longrange research and academic programs to meet the Lone Star

### Literary Festival Activities Open With Replacement

The 3rd annual Literary Festival opened Monday but minus its first scheduled speaker, Dr. Stewart S. Morgan.

Morgan suffered a heart attack Saturday night and is convalescing at St. Joseph's Hospital in Bryan. On short notice Dr. Fred Ek-

felt, substituted and presented a

talk entitled "Tom Jones - The Novel and the Movie." Ekfelt first reviewed the story plot with Fielding's characters,

Molly and others. He praised the vitality of the movie and the excellent reconstruction of 18th century scenes such as the taverns, the fox hunt,

rural England, the classic dinner scene and the vice and drunken-Ekfelt said critics especially praised the characterizations of the heroic and sexual Tom and

Western. He said the movie could be termed burlesque, earthy and funny, but actually possesses a serious theme underneath.

the crude but humorous Squire

Wednesday's speaker will be Dr. Harry P. Kroiter of the Department of English, who will present "Noble Savagery in The Last Civilized Age" at 4 p.m. in room 3B-C of the Memorial Student Center.

The agreement calls for A&M's Water resources Research In-

stitute to be the agency through which state-supported universities will present proposals to the U. S. Department of Interior's Office of Water Resources Research and the Texas Legislature for funds to support research. Dr. Ernest T. Smerdon, director of the Water Resources Insti-

tute, said the first group of re-search proposals for matching grant supports at the three institutions will be submitted to the OWRR, Department of the Interior, on April 1. "We look forward to development of greater strength and cooperative efforts among the uni-

versities for research in water resources . . . research extremely important to Texas," Smerdon ommented.

"The program has been in operation less than a year," he noted. "Research projects thus

### U.S. To Hear Tom, Sophie, Squire Western, Rudder on TV

Texas A&M President Earl Rudder will discuss his trip to best single issue competition for South Vietnam at 7:30 a.m. Wed- its Nov. 5, 1965 issue. nesday on the NBC television program "TODAY." The show can be seen in the

Bryan-College Station area on KCEN-TV, Temple-Waco (Chan- Texas State University. nel 6) and KPRC-TV Houston (Channel 2).

Rudder was one of two Texans appointed by President Johnson to extend the battle against hunger, ignorance and disease in the war-torn Southeast Asian country. He returned to Washington, D. C., Monday after the inspection visit to Vietnam.

The TV special will be broadcast live from Washington over the full NBC network. Rudder plans to return home Wednesday.

### Freeloading Sparrow Foils Hayride Ushers

The country and western sounds of the Louisiana Hayride filled G. Rollie White Coliseum Saturday night but the Bird was the word for a few minutes before showtime.

Seems that a sparrow had somehow gotten inside the building and was hopping around somewhat confusedly between the floor-level seats. Early arrivals called it to the attention of a volunteer usher from the Department of Journalism, who briefly chased the bird and then relayed the information to Sigma Delta Chi president, Glenn Dromgoole, quipping "There's somebody here who got in without a ticket and I can't get him to leave.

After further attempts at removing the feathered freeloader failed, the journalists adopted a "watchful waiting" policy, hoping the bird would find an exit or at least behave itself. Someone voiced concern that Hayride star Little Jimmy Dickens' famous curse "May the Bird of Paradise Fly up Your Nose" might produce a violent reaction under the circumstances.

But such fears proved to be groundless as the sparrow was not noticed again during or after the performance. Apparently it decided that, contrary to some opinions, country and western music isn't really - ouch - for the birds.

A MOST UNHAPPY FELLA

An unhappy youngster finds a cow not to his liking and moves to safer ground during the Youth Livestock Show at the Texas A&M Pavilion. The tenth annual affair, sponsored by the College Station-Bryan Chamber of Commerce, ends tonight with a 7:30 p. m. auction.

"TIME OF YOUR LIFE" OPENS RUN his scene is taken from "Time of Your bar in the low-rent district. Actors shown Life" which began its six-night run Monday include, from left to right, Kirk Stewart, Tim Lane, Roger Williams, Don Carter, wening. Setting for the play, written by William Saroyan in 1939, is a San Francisco Allan Pierce, Willie Cook and Bud Franks.
