

AGGIE STATISTICIANS IN AUSTIN

The seven-member staff of the Austin USDA Statistical Reporting Service, all Texas A&M agricultural economics graduates, watch automatic data processing equipment produce information for crop and livestock estimates. Left to right are Arlon Scott, Robert McClure, Charles Gore, Douglas Fortune, Allan Marburger, Douglas Spillmann and Dave Elenburg.

Grads Dominate Ag Stat Service

In the relatively short span of 10 years, the number of graduates working in the U. S. Department of Agriculture's Statistical Reporting Service in Austin has jumped from zero to seven.

The Aggies hold degrees from the Department of Agricultural Economics and Sociology. Their job is to provide an objective picture of agricultural production in Texas and the United States.

Farmers, ranchers and persons in allied industries use their findings in making production and marketing decisions.

There were no A&M graduates in Austin's SRS office a decade ago. Through efforts of Dr. Tyrus R. Timm, head of the Department of Agricultural Economics, Wendell Horsley, Placement Office director, and Gary D. Palmer, statistician in charge of the state SRS office, the situation was changed.

Since that time, the office has employed 11 A&M agricultural economics graduates.

The seven now in the agency are Arlon Scott, class of 1959; Robert McClure, M.S. '59; Charles

Gore, '64; Douglas Fortune, '64; Allan Marburger, '60; Douglas Spillmann, '64; and Dave Elenburg, '63.

Agricultural economics and sociology graduates working in other states or in SRS headquarters in Washington are Charles Allen, class of 1965; Doyle Browning, '61; Bob Pfluger, '61, and Brooks Sitton, '61.

Palmer said Aggies in the Austin office traveled more than 65,000 miles last year observing crops and livestock, interviewing farmers, ranchers, processors, warehousemen and others in agribusiness, and serving the Crop Reporting Board in Washington, D. C.

"Texas A&M is now recognized as an important source of trained young agricultural analysts," Palmer said. "These statisticians use subject-matter knowledge in agricultural economics in making official estimates of crop and livestock production."

He said their estimates provide an unbiased picture of the agricultural industry for making farming, business and governmental decisions.

Student Receives Society Award

Joseph R. Norman of Freeport has won the Phi Lambda Upsilon honorary chemical society award.

Norman, son of Mr. and Mrs. J. R. Norman, 1406 West Fifth St., Freeport, received the Royce H. LeRoy Sophomore award. The chemical engineering major was presented a copy of "The Handbook of Chemistry and Physics" and a savings bond.

Newly elected officers installed by the Beta Beta Chapter here are Ben F. Fort president; vice president, Benny R. Russell; secretary, Arvid P. Kudchadker; treasurer, Leo F. Englert; alumni secretary, John B. Beckham, and chapter councillor, Dr. Norman C. Rose.

Campus Briefs

Students Attend Houston Tour

Twenty-eight Texas A&M agricultural engineering students are visiting heavy equipment distributors, fabrication facilities and the Astrodome in Houston today.

William H. Aldred, assistant professor of agricultural engineering, is accompanying the group.

Aldred said the trip is covering five major training points for the students. These are facilities used in steel fabrication, industrial safety practices, steel forging and heat treatment methods, heavy equipment dealership operation, and facilities used to heat and cool the domed stadium.

CS-Bryan Moves

(Continued from Page 1)
than average educational level, he added.

The growth of A&M is vital to area business, industry and agriculture. The Texas A&M Research Annex is dedicated to develop industry with imagination and ingenuity.

The campus has sophisticated computer equipment for industrial management and scientific research.

HUNDREDS of nuclear energy research projects are being carried on, notably in the pure sciences, and computer science. Westmoreland is convinced that A&M will attract more research facilities and companies, and the extensive amount of brainpower will also attract new industry.

The Agricultural Experiment Station is located here as well as the Engineering Experiment Station, both contributing valuable information throughout the country.

In another area Westmoreland said the lack of some recreational establishments would have to wait until the population grew beyond 50,000.

Participants come primarily from the upper echelons of departments, with one student from the National Auto Theft Bureau.

Randall Accepts A&M Math Charter

Dr. Robert S. Randall accepted a charter for the A&M Area Council of Mathematics Teachers at a National Council in New York recently.

The A&M area group was organized last year.

Randall, assistant professor of education and psychology, was a platform guest at the three-day conference to accept the charter. While at the math conference, the professor interpreted, publicized and gathered information for A&M's math education program.

Hensarling Elected Education Group Head

Dr. Paul Hensarling was elected vice president of the Texas Society of College Teachers of Education at an annual meeting in Dallas last weekend.

Dr. Marshall Nagle of Texas Tech was elected president for the 1966-67 term of office.

Hensarling and Dr. William H. Graves attended the two-day meeting.

Head of the Department of Education and Psychology, Hensarling chaired a discussion group on "Advancing Professional Responsibility of Educators." Theme of the meeting was "Changing Opportunities and Responsibilities."

Newman Club Hosts Dance Saturday

The Texas A&M Newman Club's first Annual Spring Dance will last from 8-12 p.m. Saturday at St. Mary's Student Center in North Gate.

Music will be provided by The Finders.

Representatives from nine Texas colleges will attend the dance.
