

SCIENCE SCHOLARSHIPS

Awarded scholarships on the basis of National Science Foundation engineering science program work at Texas A&M University were, left to right, Tom Henry Sathre of San Antonio, Walter L. Young of Wharton and Tom C. Kelly of St. Cloud, Minn. The young men will be high school seniors this fall and attended the six-week course with 30 high-ability scientifically motivated students.

Seminar Scheduled At A&M Aug. 3-5

The fourth annual Right of Way Educational Seminar convenes at Texas A&M Aug. 3-5.

Planning, surveys, legal, negotiation, zoning, acquisition and eminent domain aspects will be studied by 250 participants from five states in lectures, panels and workshops.

Region 2 of the American Right of Way Association presents the seminar sponsored by the Texas Transportation Institute. The region includes Texas, Louisiana, Arkansas, Oklahoma and New Mexico.

W. S. Clark, land division chief of San Antonio, will preside over the seminar including speakers from industry and state agencies. He is Region 2 chairman.

Dan Williamson, past president of the National ROW Association and vice president of Transcontinental Gas Pipe Line, will speak during opening ceremonies in the Memorial Student Center Ballroom.

Among outstanding seminar session leaders is state engineer Archie H. Christian, right of way engineer of the Texas Highway Department. He will lead one of four workshops Friday that conclude the three-day program. Workshops cover highways, utilities, pipelines and land evaluation.

Luncheon speaker will be Arthur Rutrough of the Tennessee Gas Transmission industrial relations department.

ROBINSON . . .

(Continued from page 2)

right and two more cars appeared, both heading in my direction. I was trapped. There was only one way to go and they probably had a roadblock there.

Finally, I gave in. I pulled over to the side and turned off the ignition. I jumped from my car, flattened my hands against the top, and waited for the big search. As my hands grew sweaty, I told myself I'd take it to court. I'd hire Perry Mason if necessary; maybe even Percy Foreman. They couldn't pin anything on me. My hand quickly went to my pocket for my wallet as the bright red Ford pulled up next to me, and a man leaned out the window and asked directions to the Fireman's Training School. I don't remember getting home. I do remember saying something about Easterwood Airport . . . and as seven more bubble-topped cars passed by I remember laughing, long and loud.

I don't remember much after that, but as I write this and look about the clean, padded walls, I wonder what went wrong, and how. I've always been such a nice guy.

Campus Security Recovers Auto But Keys Missing

Texas A&M Campus Security police found a student's auto less than two hours after it was reported stolen, but the key may take a bit longer.

William L. Hamilton, senior industrial technology major from Houston, parked his 1957 Chevrolet station wagon near Dorm 21 around 3 a.m. Monday. He discovered it was missing on his way to register for the second summer session.

Campus Security located the black auto near a North Gate church at 8:45 a.m.

"Someone may have moved it to get his parking place," commented Chief Ed Powell, who was dusting the vehicle for finger prints.

Hamilton left the key in the ignition. It was the only item missing from the undamaged car.

"I wish they would return the key," remarked the student manager for Houston Chronicle campus deliveries. "It's the only one I have and I need the car to deliver papers."

RUDDER HONORED

Texas A&M President Earl Rudder, left, and Mrs. Jud Collier of Mumford, Texas, admire a plaque presented to Rudder for services as the 1966 March of Dimes campaign chairman in Texas. Mrs. Collier is a volunteer state advisor for the March of Dimes. Looking on is S. C. Wilson of Houston, regional director for the National Foundation. Under Rudder's leadership, Texas showed an increase in campaign receipts.

3 District Reservists Enter National Rifle, Pistol Meet

Three shooters from the VIII U. S. Army Corps area are among the 39 members of the U. S. Army Reserve selected for the All-Army USAR squads entered in the National Rifle and Pistol Matches at Camp Perry, Ohio, July 28-Aug. 26.

The 21 marksmen on the rifle squad, as well as the 18 named on the pistol squad, will participate in the "world series of shooting" in addition to squads representing the Army Reserve from each of the five Army areas in the nation.

The USAR awards are the Maj. Gen. W. J. Sutton Trophy, a personal contribution of Sutton, who is a Distinguished Rifle Marks-

man, and the Chief Army Reserve Trophy, in the rifle division; and the USAR Pistol Team Trophy and the Army Reserve Champion (individual).

VIII Corps members of the rifle squad are 1st Lt. Franklin Loudermilk, Comanche, and Sgt. First Class Ribert A. Griffin, Albuquerque, N. M. The pistolman is Sgt. Roy A. Plumlee of Dallas.

In addition to competitors in the National Matches, 1,653 members of the Army Reserve will receive valuable training by providing site support. The remainder of the 2,081 persons required to support the matches will come from the Active Army and other military services.

Engineers Add 5 To Staff

Five new faculty members in Texas A&M's Department of Civil Engineering have been announced by Dr. Charles H. Samson Jr., department head.

They include Dr. Robert D. Turpin, Vergil G. Stover, Richard H. Gunderson, Louis J. Thompson and Ayhan Cetiner. Turpin and Stover are teaching in summer school. Gunderson and Thompson will join the staff Sept. 1.

Turpin will direct a new program in geodesy, photogrammetry and surveying. Also working with him are Professor Joe Orr and Assistant Professor Richard Mayer.

Turpin, who earned his Ph.D. in photogrammetry from Ohio State University, has been a member of the University of Texas Civil Engineering faculty since

1949. He is listed in American Men of Science and was a visiting Ford Foundation professor at the University of Wisconsin in 1960-61.

Stover also will serve as associate research engineer for the Texas Transportation Institute under Executive Office C. J. Keese. Stover has a Ph.D. in transportation engineering from Purdue University. For three years he has been on the transportation engineering staff at South Carolina University.

Gunderson will specialize in structural engineering and mechanics. He will work part-time in an Office of Civil Defense cooperative program with A&M's School of Architecture. Gunderson earned his doctorate at the University of Arizona and has

been on the University of Houston Civil Engineering staff since 1964.

A 1966 graduate of the University of Virginia with a Ph.D. in science, Thompson will specialize in soil dynamics at A&M. He was an assistant professor at the University of New Mexico from 1961 to 1964.

The new faculty members are affiliated with numerous professional societies and fraternities. All have published technical papers in their fields.

Cetiner will specialize in structural engineering and mechanics. He earned a Ph.D. in applied mechanics this year at the University of Virginia. Cetiner works as a graduate research assistant in highway research, engineering and applied sciences at Virginia
