## More Spaces Due Within Year

# Parking Fee Increase

Mounting parking problems at Texas A&M are being countered with new parking accommodations.

The administration hopes to have 1,100 additional paved parking spaces available within a year, and 900 more spaces within two years.

A&M now has 6,495 paved parking places and approximately 7,200 cars.

University officials are gently discouraging campus parking by increasing parking fees. Students and faculty-staff members will pay higher rates this fall.

Students rates are \$10 for 12 months, \$9 for nine months, \$5 for fall and spring semesters, and \$4 for summer school.

Faculty-staff car owners face a one-third increase in parking rates, from \$7.50 to \$10. Reserved parking fees rose from \$8 to \$11. Duplicate auto stickers increased 100 per cent, from 50 cents to \$1.

The story is sadder for man-wife combinations working on campus. Use of two cars will require payment of two fees. In the past duplicate stickers were permissible.

Dean of Students James P. Hannigan said some additional parking will be available on campus in time for the home football season opener Oct. 1 against Texas Tech.

"We expect to have paved spaces this fall for 500 cars southeast of Kyle Field," he explained. "However, the other third of the area will be used for parking heavy equipment for use on the stadium expansion."

Hannigan said fee collections will be used to help pay for new parking areas, adding that the university by law cannot use state funds for parking areas.

Other parking spaces soon will be added in the area near the old College Station Railroad Depot. A&M has worked out a property exchange agreement with Brazos County officials whereby the county will construct a four-lane highway near the remaining railroad track. In turn, A&M will use the current strip of Wellborn Road and adjacent property for paved parking areas.

Just how soon that project will be completed, Hannigan would not predict. Construction crews are grading in the new highway area this week.

Other expansion plans call for enlargement of Hempstead and Navasota parking lots. Thus labeled by freshmen student required to park near the southeastern edge of the campus, the paved parking areas are due enlargement within two years.

Six hundred new parking spaces will soon become available near the \$6 million Cyclotron Institute on the north side of the main

campus. Actually, the parking area is not completely new. It was a graveled parking lot until 1964, but has been out of service for the past year while being used as a storage area for Cyclotron construction equipment and supplies.

Other parking eventually will be added near the railroad tracks in the new dormitory area on the northwestern edge of the campus.

"Our aim is to promote the campus more and more as a pedestrian center, with large parking lots on the perimeter," Hannigan noted. "We prefer to add new parking areas in this manner rather than by tearing up islands of grass in the middle of the campus."

Parking predicaments brought on by football fans will not be ended this year. Hannigan said

the overflow of cars will be parked on the grassy areas near Kyle Field and Cain Swimming Pool.

The dirt lot east of G. Rolie White Coliseum, likely will be unavailable this season. Contractors for the Biological Science Building addition and White Coliseum air conditioning are using the area to store dirt and equipment.

TO PRESENT CONCERT ON AUG. 19  
The "Lickin' River Singers", a popular folk-singing group, left, Donna Files, Nancy Hewitt, Marcia Mallard, Jerry Holbert, Randy Wilson, Rick Landman, David Landman and Gordon Hill. Tickets are \$1.

### NSF Lecture Set Monday

A National Science Foundation Summer Institute lecture by Dr. Guy A. Franceschini is slated Monday at Texas A&M.

"The Antarctica — A Challenge to the Earth Sciences" is set for 8 p.m. in Room 113 of the Biological Sciences Building.

Franceschini, associate professor of oceanography at A&M, has made studies of the hydrologic balance of the Gulf of Mexico and participated in trajectory studies of the atmosphere.

## Child Behavior Due To Parents

Fort Worth (AP)—If a child has a high IQ, it's probably because of his parents' background.

But if he gets along well with others of his age group, is free of health worries and has a good "self-concept," it's probably because there is love in the home, regardless of whether his parents are particularly intelligent or well off.

These are some findings of Samuel H. Cox, a research associate at the Institute of Behavioral Research at Texas Christian University.

Cox, a psychologist, recently completed an in-depth study of 100 school children and their parents in the Castleberry School District of Fort Worth, an average middle-income area.

Through tests and interviews over a three-year period, Cox concentrated on family background, child-rearing attitudes, child personalities and how well the child is accepted by his fellows.

His study is perhaps the first to try to link all four variables together.

To find child backgrounds, he sought such items as the educational, economic and social level of the parents. He also tried to pin-point "potential sources of family tension" such as illness, separation or divorce, and indications of an unhappy marriage.

- Cox came up with these results:
1. Family background had had 2½ times as much influence on a child's IQ as did family attitudes.
  2. Attitudes had 3½ times the influence as did background on the child's self-concept—how well he thought of himself.
  3. A child's health was influenced 2½ times as much by family attitudes as by background.
  4. Attitudes were three times as important as background in predicting peer acceptance or rejection—how well a child gets along with persons his own age.

Cox found that disagreement between parents on how to raise children was one of the largest factors in parents' attitudes. He was led to suspect that the very fact that parents agree may be more important in the child's life than what they agree upon.

Cox also found that "psychosemantic disorders may be associated with parental rejecting" of the child. Again, this would be more of a factor of the parents' attitudes than their background.

Perhaps not surprisingly, he also said, it is very difficult to separate the total family influence into such headings as background and attitudes.

Dr. Saul B. Sells of TCU said of Cox's work: "It shows that delinquency and some other problems of behavior could best be solved by changing family influences, by bringing more enlightenment into attitudes of some parents. And that implies more education."

## Fallout Sets Three 'Fun' Productions

Three "pure fun" shows are scheduled in the Fallout Theater-Workshop Monday and Tuesday, and two more will follow Aug. 19-20.

Jan Gannaway will direct "If Women Worked As Men Do," by Ellen Goodfellow, and "If Men Played Cards As Women Do," by George S. Kaufman.

Roger Williams will present "The Great Western Melodrama," by Florence Huntington Morris.

The cast of "If Women . . ." includes Cyndy Smith as Mrs. Carew, Jean Reyna as Mrs. Dowling, Nancy Hill as Miss Arnold, and Jody Worsham as Miss Smith.

Appearing in "If Men . . ." will be Bill Hamilton as John, Herky Killingsworth as Bob, Scott Manning as Marc, and Charles McGinnis as George.

Marie Crook is in charge of lighting.

Williams' cast is made up of teenagers from Briarcrest Country Club's Teen Canteen.

The Aug. 19-20 shows are "The Bed," by Jack Adler, and "The Spineless Drudge," by Richard Harris, directed by Robert W. Wenck, with a cast made up of members of the Premiere Players and the Aggie Players.

## Dallas Company Awards Grant

Magnolia Pipe Line Company of Dallas has established a \$500 scholarship at Texas A&M in honor of W. W. Lynch, president of Texas Power and Light Company.

Lynch, a 1922 electrical engineering graduate of A&M, was cited by Magnolia for outstanding service to Dallas and the Magnolia Company.

First Bank & Trust now pays 5% per annum on savings certificates. —Adv.

HOWARD GOLDSMITH

WILLIAM TIDBALL

## Civil Defense Adds Tidball, Goldsmith

Howard F. Goldsmith of Bryan and William C. Tidball of For-dyce, Ark., are new Civil Defense Training instructors for Texas A&M's Engineering Extension Service.

Dr. Willis R. Bodine, chief instructor of Civil Defense Training, announced the additions to his staff.

Goldsmith retired from the U. S. Army last months as a lieutenant colonel. He earned the Silver Star with Oak Leaf Cluster, Purple Heart with Oak Leaf Cluster, Army Commendation Medal with Oak Leaf Cluster and other citations. His last assignment was Army Reserve advisor in Bryan.

A member of the Bryan Lions Club, Bryan-College Station Chamber of Commerce and St. Thomas Episcopal Church.

Tidball recently completed two years' service as a first lieutenant in the Army Air Defense Artillery at Fort Bliss, where he was assigned to the Visitors Bureau. He earned the Army Commendation Medal.

## Math Dept. Names First Lady Prof

Appointment of two professors in the Mathematics Department at Texas A&M has been announced by Dr. Morris Ostrofsky, department head.

Drs. Ruth E. Goodman and Arthur C. Segal have been named professor and assistant professor, respectively.

Dr. Goodman came to A&M with the department head from Westinghouse in Baltimore, Md. The "first lady mathematics professor" at A&M taught at several colleges after taking degrees at Ball State, Indiana and Pennsylvania Universities. Dr. Goodman joined Westinghouse in 1953, serving as advisory mathematician and section manager of digital computing techniques.

The 28-year-old Dr. Segal was awarded the Ph.D. at Texas Christian this summer, coming to A&M from Arlington State University. The new A&M assistant professor received bachelor and master degrees at the University of Florida.

Russian-born Dr. Ostrofsky, 57, became a U. S. citizen in 1934. He held several managerial executive positions in industry after graduating from the University of Pittsburgh. He acquired the Ph.D. at Wisconsin University in 1937.

Dr. Ostrofsky chaired math departments at Duquesne and Rose Polytechnic Institute, going with Westinghouse at Pittsburgh in 1952. He installed Westinghouse's math department and became director of math sciences in the firm's Defense and Space Center at Baltimore in 1963.

## Ward To Preach At 8-Day Revival

Dr. R. P. Ward of Houston will preach during the eight-day revival opening Sunday at the First Baptist Church.

Ward is pastor of Braes Baptist Church, a post he has filled for four years. Previously, he was pastor of Houston's Woodridge Baptist Church for 14 years and at Fort Stockton's First Baptist Church for five years.

"The Abundant Life" is the revival theme announced by the Rev. Lloyd Elder, pastor of the College Station church. Services are scheduled for 7:30 p.m. nightly.

"One purpose for the revival is to involve the church members in experiencing 'The Abundant Life' offered by Christ," Elder said. "The public is invited because many of us share a common interest in spiritual values and church loyalty."

Ward, who earned a Doctor of Divinity Degree at Howard Payne College, Brownwood, in 1959, is a member of Howard Payne's Board of Trustees. He served six years on the Baptist General Convention's Executive Board and two years as Union Baptist Association moderator.

C. Allen Collier, program direc-

DR. R. P. WARD

tor of Houston's First Baptist Church, will lead revival singing. A former minister, Collier has served churches as minister of education and music since 1950, including five years at Huffman Baptist Church in Birmingham, Ala.

Collier has been a conference and clinic leader in Sunday School and Training Union leadership. He has written programs and articles for the "Sunday School Builder."

DR. LEE J. MARTIN

## Dr. Martin Selected As English Head

Texas A&M Professor Dr. Lee J. Martin has been named head of the Department of English, effective Sept. 1.

Appointment was announced by Liberal Arts Dean Frank Hubert.

Professor of English since 1963, Martin was appointed associate dean of the Liberal Arts College in 1965. He also directs the Educational Television Center, a post the 50-year-old professor will retain as department head.

Martin came to A&M in 1946 as English instructor. He earned bachelor and master's degrees at the University of Texas in 1941 and 1948, acquiring doctoral status study of dramatic literature and English at Stanford in 1956.

"The Department of English head is one of the most important administrative duties on the campus from the standpoint of the essential nature of the discipline and its importance in the growth of A&M," Hubert said. "Dr. Martin's proven leadership as a scholar and administrator make him a natural selection for this post."

Author of several articles in theatrical, language and educational publications, he wrote the Freshman English Bulletin used in A&M courses.

Martin is a member of numerous professional and scholarly societies, including the National Conference of Teachers of English, Texas Joint English Committee of Schools and Colleges, American Society for Theatre Research, American Educational Theatre Association and American Association of University Professors, of which he is former secretary-treasurer.

## Roach Gets New Position

Dr. Arthur J. Roach, a New York education counselor coordinator, has been named assistant professor of education and psychology at Texas A&M.

Roach, coordinator of counselor training in the Education Department of Canisius College's Graduate Division at Buffalo, joins A&M Sept. 1.

Announcement of Roach's employment was made by Dr. Paul R. Hensarling, Department of Education and Psychology head. He said Roach will teach educational psychology and work in the counselor certification program.

Roach received his Ph.D. in educational psychology and counseling at Notre Dame in June. He also has a master's degree in that area from Notre Dame and an A.B. degree in English from St. Michael's College, Santa Fe, N.M.

Roach's additional teaching, counseling and research background includes posts at Notre Dame, Santa Clara University and St. Michael's.
