

# A&M Scientist To Study Ocean Currents Off Brazil

A Texas A&M research scientist will combine forces with the Argentine Navy to study ocean currents off Argentina and Brazil.

Funded by a National Science Foundation grant of \$44,500, work begins Sept. 1 for a period of one year.

Capt. Luis A. Capurro, Department of Oceanography research scientist, will direct efforts of several Argentine scientists, Argentine Navy ships and other facilities.

"Four major cruises will be made," Capurro said. "There will be others of secondary nature."

Studies of "Currents and Water Masses in the Southwest Atlantic" will include infrared thermometer measurements by aircraft, current profiles from 100 to 3,000 fathoms utilizing a Richardson-type meter built by Geodyne of Boston, other special current meters and parachute drogues for synoptical ocean coverage. Data analysis will be by

IBM.

"We will design an experiment to see the degree of reliability of the current meters," Capurro noted.

Atlantis I, a specially designed research vessel, has been acquired by the Argentine NSF for use in the work, he revealed. The former Woods Hole Oceanographic Institute ship is being fitted at Boston and may not be ready until February, 1967, cruise.

The A&M scientist said the September cruise will examine the warm Brazil current, polar Falkland current and the distinct boundary between them.

Argentine scientists cooperating in the NSF research include bachelor degree holders trained with the U. S. Navy in Washington and the Norway Geophysical Institute at Bergen.

Capurro is a native of Buenos Aires and officer of the country's Navy. He commanded oceanographic vessels and an icebreaker and was Argentine Navy hydrographer four years.

The 45-year-old scientist has participated in numerous research cruises in the Antarctic.

A NEW TWIST

Fourteen-year-old Judy Reeve of Weymouth, Mass., finds herself twisted into a knot and apparently can see no way out as she has a go at a game called, appropriately enough, "Twister." The object of the game is to place hands and feet on different colored dots after a wheel is spun and keep your balance. The action took place at a teen-age fair in Boston. (AP Wirephoto)

## Campus Briefs

### Police Institute To Draw About 60

Sixty persons are expected to participate in the ninth Police-Community Relations Institute Aug. 21-25 at Texas A&M.

Police officers from Texas, Louisiana, Arkansas and Oklahoma are pre-registered for the A & M Engineering Extension Service sponsored seminar.

Wallace Beasley, chief of A&M's Police Training Division, said the institute encourages police to place more emphasis on promoting good will and understanding between themselves and the public.

The speakers will include Noel McQuown, deputy chief commander of personnel and training, Los Angeles Police Department; Dr. John T. Holbrook, chief psychiatrist, Beverly Hills Sanitarium, Dallas; Dr. George Killinger, director, Institute of Correctional Studies; Sam Houston State College, Huntsville; Dr. Robert J. Gallati, New York Central Intelligence Service director; John Neibel, University of Houston Law School dean; District Judge John Onion of San Antonio; Houston Attorney Clyde Woody; and Glen H. McLaughlin, chief, Personnel and Staff Services, Texas Department of Public Safety, Austin.

E. R. McWilliams, director of the National Conference of Christians and Jews, Houston, will give the institute summation at the closing luncheon.

### Shelton To Join Economics Division

B. R. (Bill) Shelton, executive vice president and general manager of Industrial Development, Inc., Wichita Falls, will rejoin Texas A&M's Industrial Economics Research Division Monday.

Shelton was an assistant research economist for eight years before becoming assistant executive director of the Texas Industrial Commission in Austin. He moved to Wichita Falls in 1964.

James R. Bradley, Industrial Economics Research Division head, said Shelton will direct projects conducted under the State Technical Service Institute. Bradley said his department has been awarded \$56,000 to establish a model for dissemination of scientific and technical information to the electronic and primary metal industries.

Shelton earned a BBA in marketing at the University of Texas in 1955 and has done graduate work at A&M.

A major in the U. S. Army Reserve, Shelton has membership in Texas, Southern and American Development Councils. He has written magazine articles for "Texas Town and City" and "West Texas Today."

### Nelson To Lecture At Danforth Confab

Dr. Bardin H. Nelson, professor of Sociology in the Texas A&M Department of Agricul-

tural Economics and Sociology, is one of 12 lecturers in the United States invited to lead a seminar at the Danforth Associate Conference Monday through Aug. 21 at Estes Park, Colo.

Nelson's seminar will be entitled, "Social Change, Profiles and Projections."

Other seminars include "Ethics and Foreign Affairs," by Dr. W. C. Olson, Dean of the School of International Affairs, Columbia University; "Innovations in Higher Education," by Dr. W. David Zimmerman, Assistant Director of the Danforth Foundation; "The Art of Federico Fellini" by Dr. Donald Costello, University of Notre Dame.

Danforth Associates from the colleges and universities of the nation will be in attendance at this conference.

### Kunze To Leave On Trip Saturday

Dr. George W. Kunze of the Texas A&M Department of Soil and Crop Sciences will leave here Saturday on a trip to Alaska and Japan.

He will teach a three-day short course in X-Ray diffraction methods and techniques to members of the Institute of Marine Sciences and the Geology Department of the University of Alaska during the first phase of his tour.

Next, he will travel to Japan to participate in meetings of the Pacific Science Congress in Tokyo and will take part in a related scientific post-Congress tour. He also will present a research paper on glacial and channel bottom sediments.

The professor's special research field is soil mineralogy. Kunze will return to College Station on Sept. 11.

### Accident Control Seminar Scheduled

A three-day seminar, ABC's of Industrial Accident Control, is scheduled Sept. 12-13-14 at Texas A&M.

Twenty-five participants will study techniques for setting up or improving accident prevention programs. Supervisory Development Division staffers will teach the Engineering Extension Service sponsored course.

Topics include accident causes and costs, principles, investigation, inspecting, reporting, records analysis, effective safety programs and meetings.

## McGuire Receives Ph.D.

Delbert McGuire, Texas A&M's Department of Journalism head, received his Ph.D. in mass communications from the University of Iowa in absentia Wednesday.

McGuire was named head of A&M's Department of Journalism in 1963 after 11 years on the journalism faculty at North Texas State University. Previously, McGuire edited "The Southern Florist and Nurseryman" and "The Automatic

World" in Fort Worth. McGuire earned bachelor and master degrees in journalism at the University of Texas.

"Performance of the Presidential Press Conference" is the title of McGuire's dissertation. It covers presidential press conferences since Woodrow Wilson, and includes a personal interview with former President Eisenhower. President Johnson's views were expressed by Press Secretary Bill Moyers, a student of McGuire's at North Texas State.

# THE TIME OF JOY

THE CHURCH FOR ALL... ALL FOR THE CHURCH

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.
