

Professor Nears Completion On 17 Year Research Project

A Texas A&M professor, Dr. Garland Cannon, is nearing completion of 17 years of research toward publication of two volumes of letters by Sir William Jones.

The recently appointed associate professor of English expects to complete his manuscript by next May. "The Correspondence of Orientalist Sir William Jones (1746-94)" will be published by Clarendon Press early in 1969.

Jones was a famed 18th century orientalist who founded disciplines of comparative law, linguistics and mythology. Among his correspondents were leading English figures of literature, law, drama and politics.

The two-volume edition to be printed by the Oxford publisher

will contain 700 Jones letters, 400 of which are currently unpublished. Dr. Cannon's work involves composing 5,000 footnotes and documenting and explaining references which Jones made to events and times that have since become obscure.

A \$1,200 grant from A&M's Fund for Organized Research makes possible completion of the research on schedule.

The linguistics specialist, who came to A&M Sept. 1 from Queens College of New York City University, visited England, Asia and Europe for field research related to Jones' linguistic interests.

Dr. Cannon, 41-year-old native of Sterling City, has published 11 specialized articles, a bibliogra-

phy and biography. His latest publication concerns a linguistic approach to teaching composition and literature.

The professor studied for bachelor and doctoral degrees at the University of Texas and taught at Texas, Stanford, Hawaii, Michigan, Florida, Puerto Rico and California universities, the American University Language Center at Bangkok, Columbia Teachers University and Illinois Teachers College.

NEW DELHI (AP) — A government wig manufacturing plant will be established in Andhra Pradesh State. The United States topped world buyers of human hair in 1965, purchasing \$436,800 worth.

Aggies Awarded \$50,000 Renewal

Texas A&M University has been awarded a \$50,000 renewal of the Jesse H. Jones agricultural scholarship program.

A&M President Earl Rudder announced the 10-year renewal by Houston Endowment Inc. at \$5,000 per year.

Jesse H. Jones scholarships were initiated at A&M in 1946, when the late Mr. Jones made the first award. Since that time and by June, 1967, 101 students are expected to have received degrees with financial assistance through the scholarships.

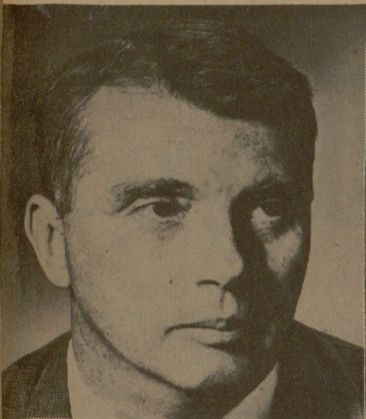

Scholarship winners are selected from applicants who have outstanding scholastic records, excellent character, leadership ability and need for financial assistance.

IS THE WIGGY SCENE FOR YOU?

It's the latest hang-up. The psychedelic Go - Go scene. Soon it will be the big noise on campus. The current issue of The Saturday Evening Post takes you on the rounds of New York's "total - environment" night-clubs. Experience the frantic kaleidoscope of flashing lights, movies, slides, colored smoke and deafening rock 'n' roll that give you an LSD trip with no side effects. Get with New York's "Take-Over Generation" as they Jelly Belly their cares away. Find out what to wear when making the new scene: bust shields, fluorescent mini-skirts, silver motorcycle jackets, aluminum wigs. It this really a new art media as its inventor believes? Is it for your school? Find out in the October 22 issue of the Saturday Evening Post. Pick up on it today, baby.

Texas A&M Probe Highway Problem Of Beautification

Highway beautification is the aim of a research project being probed by the Texas Transportation Institute at Texas A&M University.

Dr. William G. Adkins, research economist for TTI's Transportation Economics division, is principal investigator for the U. S. Bureau of Public Roads-sponsored survey.

The USBPR has awarded an initial grant of \$25,000 for a 15-month study. Surveys involve section 302 of the U. S. Highway Beautification Act. Interstate and federal aid primary roads are included.

Research involves:
A survey of landowners who receive rentals from signs.

Field interviews with junk yard operators regarding the possible effect moving or screening might have on business.

A mail survey of lodging establishments as to their dependence on outdoor advertising and possible adjustments to loss of business through absence of signs.

A computer analysis of more than 60,000 Texas Highway Department signs.

Also planned is a 1967 survey of eating establishments and other industry groups.

Dr. Adkins said some work is planned in reference to the traveling public's dependence on signs for directional purposes.

Co-investigators are H. G. Muth and J. L. Buffington. Five other staff members are assisting. Several graduate students do part-time tabulation work.

A preliminary report will be made to the USBPR later this month. Another report will be made before bureau officials report to Congress in January.

NEW BATT MEN

Left to right Bob Jones, Robert Solovey, Winston Green, John Fuller.

Green Selects Staff To Publish Batt

The new Batt staff assumed its duties Monday with the publication of today's edition.

Assisting Editor Winston Green will be managing editor, Robert Solovey, news editor John Fuller, and sports editor Bob Jones.

Green, from Tyler, is a junior journalism major who transferred to A&M from Tyler Junior College on a \$200 journalism scholarship. At Tyler he was assistant editor and column writer for the junior college newspaper.

Also a junior journalism major, Solovey served on the Batt staff last year. He is a member of Squadron 5 and his home is Silver Springs, Md.

Fuller is a sophomore journalism major from San Angelo, and Jones is a sophomore from Bryan.

Engineers & Scientists:

Campus Interviews, Monday and Tuesday, October 17 and 18

In 1916 The Boeing Company's career was launched on the wings of a small seaplane. Its top speed was 75 mph.

Now, half a century later, we can help you launch your career in the dynamic environment of jet airplanes, spacecraft, missiles, rockets, helicopters, or even seacraft.

Pick your spot in applied research, design, test, manufacturing, service or facilities engineering, or computer technology. You can become part of a Boeing

program-in-being, at the leading edge of aerospace technology. Or you might want to get in on the ground floor of a pioneering new project.

You'll work in small groups where initiative and ability get maximum exposure. And if you desire an advanced degree and qualify, Boeing will help you financially with its Graduate Study Program at leading universities and colleges near company facilities.

Often it will be sheer hard work. But we think you'll want it that way when you're helping to create something unique — while building a solid career. Visit your college placement office and schedule an interview with our representative. Boeing is an equal opportunity employer.
