

Teague Gets War Medal

WASHINGTON—A young Air Force captain, who is learning to fly jet aircraft, holds one of the Infantry's most coveted medals, earned for ground action in the Far East.

Capt. John O. Teague of Col-

lege Station, Texas, was awarded the medal for outstanding and exceptional valor during action against enemy forces.

Teague, who is in flight train-

ing at Webb Air Force Base at Big Spring, Texas, received the Bronze Star medal with "V" device for exceptional valor.

He is the son of Congressman and Mrs. Olin E. Teague of College Station, the congressman is a former infantry battalion commander and a much-decorated veteran of World War II.

The citation accompanying the Bronze Star award to Teague reads:

"Capt. John O. Teague distinguished himself by heroism and meritorious service as a combat controller while engaged in ground operations against an opposing armed force from 23 June 1965 to 1 Oct. 1965. During this period, Captain Teague operated clandestinely as an Air Liaison Officer and Forward Air Controller for close air support missions in a predominantly hostile area. On 13 Sept. 1965, a refugee village of some 5,000 population was attacked by hostile forces. Captain Teague, disregarding his own personal safety, remained in the village and amid hostile fire, called for air support.

"Despite poor weather and overcast conditions, Captain Teague successfully directed tactical aircraft on target, repulsing the hostile forces and thereby saving from capture, a vitally strategic area. By his heroic actions and unselfish dedication to duty, Captain Teague has reflected great credit upon himself and the United States Air Force."

ROUGH CAMPUS DUTY
Cadet Col. Eddie Joe Davis of Henrietta smiles approval as he escorts the 1966 Texas Peach Queen over the Aggie campus. The queen is Kathy LaFollette of Seminole.

Ministers Set Hospital Calls

The A&M Hospital and the Campus Religious Workers Association have begun a program in which one of the campus ministers will make a daily visit to the patients.

The Rev. Ron Birk, president of the Campus Religious Workers Association, said this is one of the first times campus ministers have joined in such a program.

All major denominations in College Station have a campus minister who will visit the hospital, talk to the patients and see if there is anything needed. However, Rev. Birk stressed that this is a program to comfort the patient, not to convert him.

Each church will have charge for a week in which the minister plans to visit the hospital daily and talk with patients.

Institute Of Statistics Announces Lecture Series

Dr. Marvin Zelen of the National Cancer Institute will present a series of five lectures at Texas A&M University's Institute of Statistics Oct. 31-Nov. 3 and a Graduate College lecture Nov. 2.

The five connected lectures, entitled "Operational Methods in the Design of Experiments," are primarily intended for faculty and graduate students of the Institute but may be attended by representatives of other departments, and Institute spokesman said.

Dr. Zelen's Graduate College lecture, "The Use of Probabilistic Models and Problems of Cancer Research," will be presented in Room 145 of the Physics Bldg. at 8 p.m. Nov. 2.

Beginning Oct. 31, the one-hour Institute lectures will be conducted daily at 2 p.m. in Room 112 of the Plant Science Bldg., with two exceptions. There will be a second lecture Nov. 1 in Room 304 of the Physics Bldg. at 8 p.m., and the Nov. 2 session is set for 4 p.m., Room 112, Plant Sciences.

Dr. Zelen received his bachelor's degree from New York City College, his master's from the University of North Carolina and Ph.D. (in statistics) from American University. He has taught

at the University of California and University of Maryland.

He joined the Mathematical Statistics and Applied Mathematics section of the National Cancer Institute in 1963. During 1965-66 he was awarded a Fulbright Scholarship and visited most of the statistical centers in England and Europe.

EE Student Earns Top NASA Award

Sidney W. Novosad, a 21-year-old junior electrical engineering student at Texas A&M, has received a sustained performance award from NASA's Manned Spacecraft Center in Houston.

Novosad, son of Mr. and Mrs. John Novosad of Edna, received a certificate for "initiative and determination in completing a computer program for automating circuit margins for the Apollo Program."

A cooperative employe of NASA during alternate semesters, Novosad was cited for "performance usually expected of a junior engineer."

The award is for the second cooperative period of last year. A&M Assistant Engineering Dean J. G. McGuire said it is believed Novosad is the first non-permanent NASA employe to receive the distinguished award.

A&M has approximately 100 cooperative students working in industry and for government agencies, including 16 at NASA. Under the arrangement, students go to school a full semester and work a complete semester.

"This program makes education more complete," Dean McGuire noted. "It gives students opportunities to obtain experience as undergraduates and helps them determine the field they

would like to enter following graduation."

Novosad expects to earn his bachelor's degree at A&M next August. He hopes to continue his studies as a graduate student.

The sea supplies only three minerals in large quantities — common salt, magnesium and bromine.

ENGINEERS SCIENTISTS...

WOULDN'T YOU RATHER BE WITH NO. 1? SEE US ON CAMPUS NOV. 1, 2 and 3.

Come see how you fit in with the company that gives your career all the room in the world to grow. Come have a close look at Humble — the company that provides more petroleum energy to this nation than any other domestic oil company — the one that's literally No. 1 — America's Leading Energy Company!

Let us tell you about the specific opportunities we have for you. Humble and its affiliated companies* offer a variety of rewarding careers to engineers at all degree levels. Our activities include oil and gas exploration, production, manufacturing, transportation and marketing — and the management of all these. In addition, our affiliates are engaged in both pure and applied research. The latter encompasses the entire field of petrochemicals and other petroleum products and processes.

You can always take a smaller job. But only now... when you are just starting... are there so many opportunities for a lifetime career with No. 1.

Why not try us on for size — make a date with your placement office for an interview!

*IMPOSSIBLE NOTE: We are also interviewing for these affiliates:
Enjay Chemical Company
Esso Production Research Company
ESSO RESEARCH AND ENGINEERING COMPANY

HUMBLE OIL & REFINING COMPANY... THE PEOPLE WHO "PUT A TIGER IN YOUR TANK!"
A PLANS FOR PROGRESS COMPANY AND AN EQUAL OPPORTUNITY EMPLOYER

SLOW SHAVING UNFAIR!

ACT NOW!
Join the new Norelco march on whiskers! Finish shaving nearly 40% faster than ever before.

Free yourself from shaving's tyranny with the new Norelco Tripleheader Speedshaver 35T. It has more features than any other shaver on the market. 18 rotary blades whip away whiskers at 77 miles an hour! And so close, we dare to match shaves with a blade. Yet comfortable. Rotary blades and very thin Microgroove floating heads can't nick or cut. With pop-up trimmer, on/off switch, 110/220 volts and coil cord, this new Norelco gives you all you need to ban the beard!

Eyes right for the economically priced 'Flip-Top' Speedshaver® 20. Two heads give you the famous rotary blade shave. Easy flip-top cleaning too.
