

Tuesday Declared Dewitt Greer Day

HIGHWAY MAN HONORED
Dewitt C. Greer will be honored Monday for his 40 years of service to the Texas Highway Department by the people of Bryan-College Station and Texas A&M.

Tuesday has been proclaimed "Dewitt C. Greer Day" by officials of the Bryan-College Station community and Texas A&M University in recognition of the state highway engineer's 40 years of Texas Highway Department service.

The special tribute to Greer coincides with the opening of the 40th Annual Texas Highway Short Course which will be conducted at A&M Dec. 13-15. The entire meeting will be dedicated to the veteran highway leader.

Greer joined the Highway Department in 1927, four years after receiving his civil engineering degree from A&M, and for the past

26 years has served as state highway engineer, the department's top administrative post.

The proclamation officially designating "Dewitt C. Greer Day" states in part:

"The Texas Highway Department, under his (Greer's) administration, has enjoyed the full confidence and respect of the citizenry while more than doubling the state's mileage of highways and expanding almost five billion dollars of public funds."

Also noted in the document is the fact that Greer administers the largest highway department in the world and directs an employment force of more than 17,000 persons.

The proclamation was announced Wednesday by Brazos County Judge W. C. Davis, Bryan-College Station Chamber of Commerce President James D. Ingram, Bryan Mayor Jack Conlee and College Station Mayor David A. Anderson.

A resolution passed by A&M's Board of Directors states that Greer "through his devotion to duty, his dedication to service, his engineering acumen, and his outstanding ability as an administrator, has made a major contribution to highway development in Texas and this nation . . . and is today universally recognized by other highway officials in this nation as the dean of highway administrators . . ."

Earlier this year, Greer was named a distinguished alumnus of A&M.

The program objective is to train engineers in research, development and design of new weapons systems in order to minimize maintenance burden costs.

The new discipline in engineering will include 75 college semester hours in maintainability engineering, reliability engineering, quality assurance and control, metrology, operations research, dynamic instrumentation, computer science, statistical analysis and prerequisite courses in probability, statistics, applied mathematics, management and logistics.

The first class of 19 began graduate study in February, 1966. The second class started last July. The third class — presently being recruited from the nation's colleges and universities — begins instruction in July, 1967.

This program will cover material from the cradle to the grave," Dr. Wortham explained. "Maintenance costs, acceptance criteria and early-stage design are a few of the areas to be studied."

Aggie Ex Is Recipient Of Army Citation

Army Maj. Joe V. Wagstaff of Henderson, former A&M student, was presented the Bronze Medal at Nha Trang in Vietnam.

Member of the Class of 1955, Maj. Wagstaff was decorated at Field Force Headquarters for meritorious service in combat operations against hostile Vietnam forces.

The intelligence officer has since returned to the United States with assignment at Fort Lewis, Wash. Wagstaff's wife Judith and two children reside at Spanaway, Wash.

The son of Mrs. Alma McCormack, Route 4, Box 8, Henderson is a graduate of Henderson High School.

meeting of the don't minds

If you don't mind having all the details of planning a banquet or convention taken care of for you, call Ramada Inn. We'll make sure your meeting is trouble-free . . . no matter what size your group!
