

BEAUTY AND GRACE Harkness Ballet **Coming To A&M**

The Harkness Ballet, one of the ballets is scheduled for a Thursday performance at Bryan's Municipal Auditorium.

Sponsored by the Town Hall Committee of Texas A&M's Memorial Student Center, the "Extra" is set for 8 p.m., announced Town Hall Chairman Sammy Pearson.

Newspaper reviews invariably comment about the emphasis of youth in the Harkness Ballet. In fact, one of the featured works of the performance is "Youth."

"Koshare," a spectacular ballet dealing with the Hopi Indians' story of the creation, is another spotlighted event on the program. tickets.

The founding of Harkness nation's youngest but greatest Ballet in 1964, fulfilled one of the major goals of its patron, Mrs. Rebekah Harkness. The company gave its first per-

formance in the White House in 1964 before President and Mrs. Lyndon B. Johnson and a distinguished audience assembled to honor the Philippine President. Tickets are on sale at the MSC Student Program Office, Carnegie Library and Jarrott's Townshire Pharmacy. Reservations

may be made by telephoning the Student Program Office. Reserved seats are \$3 and \$2.50,

general admission \$2. A&M students, student wives and public school students may buy \$1

Education Society Meets, Hears Address By Bemis

Secretary Dr. Maynard Bemis ers. warned members of the professional educators fraternity Thursday of problems that need creative leadership in the education field.

Bemis addresed 70 persons attending a Delta Nu chapter initiation banquet of the national organization. Members of the fraternity from Nacogdoches and Prairie View A&M attended the event, at which 17 new members were initiated.

Dr. Walter Varvel of the Education and Psychology Depart- the upper elementary level for ment chairs the area chapter.

Dr. Bemis took issue against the power struggle for control of education, found fault with categorical aids that necessitate federal government controls and the national assessment program.

He propounded complete separation of church and state and commended an interstate compact proposing professional-collective

New York State Prof Accepts Post

At Texas A&M

Dr. Eirik G. Furubotn, chairman of the Economics Department at New York State University, has accepted a professorship in Texas A&M's Economics Department.

Dr. M. L. Greenhut, department head, said Dr. Furubotn will join the A&M faculty Sept. 1. and will teach graduate courses in production functions, mathematical economics and related fields.

Furubotn has taught at Lafavette College, Emory University, Wesleyan University and Tulane University. He has written numerous scientific articles, several of which have been published in the "Southern Economic Journal" and "American Economic Review," professional journals.

Current research by Furubotn includes "Manufacturing Production Functions and the Elasticity of Substitution" and "A Critical Note on the Theory of the Multiproduce Firm."

Furubotn's Ph.D. and M.A. degrees are from Columbia Univercum laude from Brown University with the A. B. degree and was elected to Phi Beta Kappa.

The official of 10 years tenure enumerated organization programs designed to assist educators.

A Research Service Center is being set up under Phi Delta Kappa auspices to collect, store and index innovative educational material. "This center will be for local school systems' use, providing a superintendent a source of information, for example, for innovative math education means at gifted students." Bemis explained.

On

A commission on strengthening the teaching profession, chaired by Dr. Tim Moore Stinnett of A&M, is compiling a bibliography for professional negotiations and, in cooperation with national Teacher Education and Professional Standards planning, is studying the "teacher dropout"

"Teachers formerly worked an

average of 13 years," the national officer commented. "They are leaving the teaching field after **History Prof Attends Meet**

Dr. Allan C. Ashcraft, associate professor of history and government, will attend the History Media Institute, Feb. 19-24, at Syracuse, N. Y.

Ashcraft is one of 15 persons selected for the institute which emphasizes teaching strategies and new types of educational media. He will direct a National Defense Education Act Summer History Institute June 5-July 14 at Texas A&M.

Forty high school history teachers from over the nation will participate in the institute at A&M. Theme of the institute is 'From One Nation to One World: The United States in Perspective Since 1933.'

Ashcraft said the NDEA Institute traces development of internationalism in the United States during the past third of a century. Another aim is to determine how orientation change has been resity. He was graduated magna flected in agricultural policies, science, technology, labor, industrialization, urbanization, and foreign affairs.

Phi Delta Kappa Executive negotiations for classroom teach- 11 years now. Men average only eight years in the profession, considerably less than women."

He said industry and business are making inroads into teacher supply because of higher salaries.

he Convair Division of General Dynamics Corporation is one of the life sciences, information sciences, sci-

systems, systems analysis, space sciences,

problem.

largest and most sophisticated aerospace and research firms in the country. It was formed in 1965 through the merger of two divisions of General Dynamics: the old Convair Division and the Astronautics Division, both in San Diego.

The heritage of Convair dates back to aircraft production prior to and during World War II. In recent years the former Convair Division produced the Air Force F-102 and F-106 jet interceptors, the 880 and 990 jet transports, and the Little Joe solid rocket booster. The Astronautics Division was the home of the Atlas, the first free-world ICBM, and the subsequent development of the Atlas as one of the nation's major space launch vehicles; many other aerospace and research programs were undertaken by Astronautics including Centaur-the first U.S. space rocket powered by liquid hydrogen.

Company Description

Convair is primarily involved in research, development and production connected with the aerospace industry. Its primary efforts are in complete systems and programs. The spectrum includes space launch vehicles, electronics systems, maneuverable re-entry vehicles, commercial and military aircraft and oceanographic research.

Major programs include the Atlas space launch vehicle; the Atlas/Centaur booster program used to put the Surveyor spacecraft on the moon; the design and installation of complete telemetering stations; conversion programs on Convair military and commercial aircraft; satellite research; manned space systems, and oceanographic telemetering buoys.

Opportunities

The variety of Convair products requires engineering graduates at all degree levels with majors in aeronautical, slectrical, electronic and mechanical engineering, set engineering mechanics and engineering physics.

Engineering or science graduates will be assigned to the following areas: advanced

GENERAL DYNAMICS

Convair Division

San Diego, California An Equal Opportunity Employer

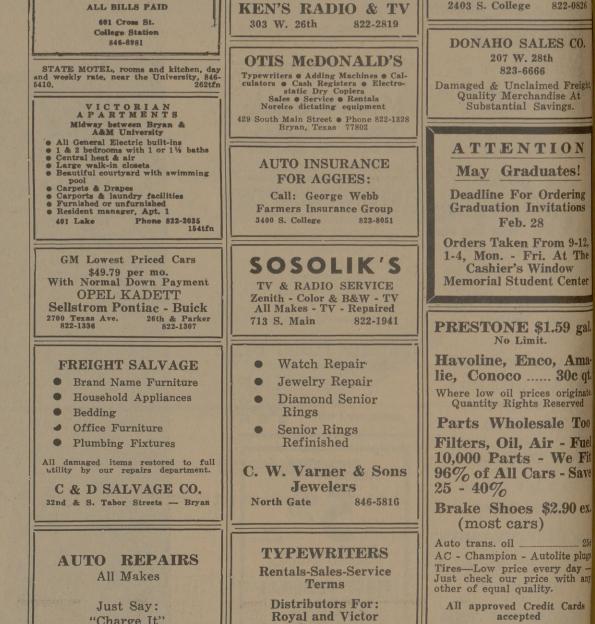

Special Features and Attractions

Convair offers outstanding fringe benefits including an Employee Savings and Stock Investment Plan to which the Company contributes as well as a Retirement Plan and Tuition Assistance Programs. Convair engineers can select from many companysponsored educational assistance programs and determine for themselves which is best suited to their particular requirements. These programs, held in conjunction with four highly rated local colleges and universities, include a tuition refund plan, an irregular work week to permit college attendance, an advanced-degree workstudy program, special courses and seminars, and Doctoral Fellowships, among others.

One of the nice things about working at Convair is living in San Diego ... one of the country's truly great resort centers. With only 10 degrees difference between January and July highs, the sunny San Diego climate is pleasant throughout the year.

Two great bays and 70 miles of ocean beaches provide all year aquatic sports and fishing. Exciting Mexico is just a few miles away. Nearby mountains, a worldfamous zoo, and a marine park add to the fun ... plus 64 golf courses for year 'round play. San Diego is an ideal family city with excellent schools. As the country's 16th largest city, San Diego offers the best in cultural attractions, performing arts, professional sports, and other entertainment.
