

Ags Top Baylor 71-69 On Last-Seconds Trippet Shot

By GARY SHERER
 "You're in the in-crowd now," yelled Billy Bob Barnett to Terry Trippet in a wild Aggie dressing room. The occasion was the aftermath of a tremendous 17-point comeback by the Aggies last night at G. Rollie White Coliseum.

TRIPPETT definitely was in the "in-crowd" as probably the most important shot of his Aggie career went "in" the basket with just six seconds remaining, to give the Maroon and White a 71-69 victory over the Baylor Bears.

Playing before an improved throng of 4,000, the Aggies seemed to have fallen into their second-half cold streak after making a game of it in the first period.

THE HALFTIME count was 43-32, with the Aggies on the short end, as the two teams took the floor for the start of the second twenty minutes.

Seven minutes later, it was Baylor by 56-39 and the Aggies looked out of the ballgame. Then it happened! The Aggies,

in an almost flawless shooting display, treated the fans to eleven minutes of heads-up basketball as they outscored the Bears 30-13 and tied the game up with a Barnett layup with 1:53 remaining.

AT THIS POINT Baylor called time out to set up final strategy. It turned out in A&M's favor as with 50 seconds remaining, John Underwood grabbed an errant Bear pass and the Aggies were in the driver's seat.

The dramatic climax followed

a successful freeze of the ball by the young team. They looked like professionals as they passed the ball back and forth with the seconds ticking away.

WITH THE CLOCK hitting ten seconds, Ronnie Peret flipped the ball to Trippet. The Odessa junior went down the left side towards the basket. It looked like a dead end as two Bears threw their hands up and Trippet seemed to be hemmed in.

Trippet, however, was not to be denied. He raked once and twisted

up between the two defenders and pushed the ball toward the all-important two points.

PANDEMONIUM then broke loose as the frantic Baylor five tried to go for the final basket. Russell Kibbe's final hurried 30-footer was wide to the left and Trippet found himself in a mob of excited and happy Aggie fans.

It was a scene not too familiar this season, but one that was worth it, as there was probably never a more deserved win.

What makes the win the most

satisfying is that the final score marked the only time in the game that the Aggies had the lead. But, it couldn't have been a more right time.

AGGIE COACH Shelby Metcalf was a picture of happiness as he accepted the congratulations of pleased fans. The Aggie mentor hasn't had too many chances this year to be happy, as the inexperienced team has been on the losing side quite a few times. A win like this, however, makes it all worthwhile.

Underwood and Barnett shared scoring honors with 16 each. Peret was next with 15 and Sonny Benefield added 11. Baylor was led by Darrel Hardy with 20 markers, while Jimmy Turner and Steve Bartels added 17 and 16, respectively.

Saturday night the Aggies will be at Austin's Gregory Gym for the rematch with the Texas Longhorns. They return home for their final '66-'67 game on Tuesday night, hosting Southern Methodist.

THIS IS IT!
 Terry Trippet goes up between Baylor defenders Darrell Hardy (44) and Ed Thorpe as he scores the winning basket in Tuesday night's 71-69 victory over the Bears.

Segrest Announces ITS Cancellation

By JOHN FULLER
 The 16th Annual Intercollegiate Talent Show scheduled for Spring Military Weekend has been canceled, according to an announcement Tuesday by Memorial Student Center Talent Committee Chairman Charles Segrest.

Segrest said the show has been running at a deficit for the past several years, and attributed the deficit to "the rising travel expenses of committee auditioning teams to distant schools and the increasing payment of expenses for visiting performers."

The annual event had been scheduled for Saturday, March 3, as one of the highlights of the weekend, which includes the Combat Ball, Military Ball and Military Review. For the past several years, ITS had been a feature of the activities.

"COMPOUNDING the difficulties encountered by the Committee is a flagging university student interest in such productions, and consequently a sparse student attendance," the announcement continued, "plus the competing influences and much greater audience exposure offered by KHOU-TV's widely broadcast television special, 'Campus Talent '67'."

Government Prof Will Speak On Communist China

"Proletarian Cultural Revolution in Communist China" will be discussed when Dr. Kwang Hai Ro, assistant professor of government, speaks at A&M Methodist's Student Center at 7 tonight.

Ro will speak on the political development in China from the beginning of the Communist regime through the present time. He will emphasize the political change in terms of Mao Tse-tung's revolutionary ideas compared with the present conflict of anti-Mao factions.

Ro is a native of Korea who received a Ph.D. from Oklahoma University in 1966. He specializes in international politics, with emphasis on Asian affairs.

Also at the Methodist Student Center, beginning Sunday at 5:30 p.m., will be a discussion of the musical-drama, "For Heavens Sake."

This will be a study of the play which is a satirical and serious study of the contemporary church and its methods.

The play contains such songs as, "Failure at 33." This is a song between two modern businessmen who are discussing that Jesus was a failure when looked at through the eyes of a modern man and using modern man's measures of success.

On next Wednesday night will be another talk at the student center, with the topic being "LSD." The speaker has not yet been announced.

Groneman Writes For Encyclopedia

Dr. Chris H. Groneman, Industrial Education Department head, is author of a six-page article in the 1966 edition of Encyclopedia Americana.

Groneman's "Historical Development of Woodworking," is a treatise on man's early use of wood, and recent developments and fabrication of wood.

Two other articles by Groneman will be used in the encyclopedia series. One pertains to veneering developments, the other to species of mahogany.

Marriage Forum To Discuss Love

By NEAL COOK
 Battalion Special Writer
 "How Can You Tell It's Love" will be the topic of Dr. Sidney Hamilton, of North Texas State University, in the YMCA's "Marriage Forum", tonight at 7:30.

Road Is Marked As Parking Lot For Student Use

Only vehicles with Texas A&M University parking permits may be parked along the portion of FM 2154 (Old College Highway) recently closed.

"That section is no longer a public thoroughfare," Ed Powell, campus security chief, said, "and because it is part of the main campus, university traffic and parking regulations apply."

The closed section has been phased out of use by completion of new overpass and interchange facilities between FM 2154 and FM 60.

A parking lot with space for more than 500 vehicles has been proposed. It would extend from the baseball field to the Agriculture Building and will be considered at the February meeting of the board of directors, Powell added.

Hamilton will discuss such topics as:
 —"How can I be sure of marrying the right person?"
 —"Has sex desire influenced my choice?"
 —"Personality factors - courtship — infatuation vs. love."
 —"Am I socially adequate?"
 —"Relationship of freedom to romance."
 —"Should time and distance interfere with true love? What am I doing in Texas if my girl is in Tennessee?"

Hamilton received B.A. and M.A. degrees from North Texas and a Ph.D. from New York University where he specialized in psychology, projective techniques, adolescent development, guidance and marital psychology.

He is one of five persons in Texas who have been given the rating of "professional marriage counselor" by the American Association of Marriage Counselors and he has appeared several times at A&M as a speaker, discussion group leader, and counselor for married student groups.

This is the second of the forums in the programs sponsored by the YMCA and these forums (See Marriage, Page 3)

A&M Architecture Profs Place Second In Contest

Two Texas A&M School of Architecture assistant professors are winners of the \$1,000 second prize in national competition for design of a civic plaza for Kirkwood, Mo.

Landscape architect John Exley and architect Chartier Newton assembled ideas and built a model to develop ways Kirkwood's downtown area may be revitalized in order to continue as the economic and visual core of the St. Louis suburb.

Their entry was among 101 entered. First place went to a St. Louis architectural firm. Third was captured by a firm in Webster Groves, a St. Louis suburb.

Exley and Newton's scheme, which took two and one-half months to develop, features use of land and plant forms to create a park-like setting for the city hall in conjunction with other public buildings. Their plan emphasizes the city's positive features and makes recommendations for improving deteriorating commercial areas.

"Kirkwood has a railroad and a main highway bisecting the downtown area, problems being experienced by many cities," Exley noted. "One of our suggestions was to screen off undesirable areas such as the railroad unloading yard."

Other recommendations included closing of a street to provide a more spacious setting for the city hall, a village green, a pedestrian walkway over the railroad for better access to both sections of the city, creation of an arboretum and playground for downtown shoppers and children, reorganized parking for more convenience to the shopping district and tree-lined walks connecting parking areas with the shopping district.

Consolidated Students Stage Wedding For Lab Project

By DON R. JANACEK
 Battalion Special Writer
 Scientists have done many things in lab experiments, but would you believe a lab experiment in marriage?

Last Friday, under the guidance of the Home and Family Life class of the Homemaking Department, A&M Consolidated students staged a wedding as a lab project. Miss Celia Stark "Falls" became the bride of Steve Watkins "Logan" in a ceremony which was complete with bridal gown and flowers.

Purpose of the experiment was to teach the students the ritual involved in getting married. After the wedding, the students held a reception for the wedding party which included four bridesmaids and four groomsmen. The reception included cake and punch and the usual activities surrounding the big day.

Following the reception, the happy couple left for Sam's on a brief honeymoon and then returned to classes at the high school.

Even the newspaper got in on the act by writing a column not unlike those found in larger newspapers on the society page concerning the wedding of a famous person.

Faculty-Staff Set Third Program

Texas A&M's third faculty-staff dinner dance of the academic year is set for 7:30 p.m. Thursday in the Memorial Student Center Assembly Room.

Committee Chairman Don Young of the Texas Forest Service said the dinner will be a costume affair. Informal dress may be worn, if preferred, he added.

Young urged season ticket holders and other faculty-staff members to bring guests. Individual-event ticket sales are available at the main desk in the MSC through noon Wednesday.

Dick Baldauf's Aggieband Combo will provide dance music.

Senior Awarded \$500 Scholarship

Ericson Berg, senior accounting major, has been awarded a \$500 scholarship grant from Ernst and Ernst, a national certified public accounting firm, Dr. Jack W. Coleman, head of the accounting department, announced Monday.

The firm made the grant in recognition of Berg's superior performance as an accounting major.

Upon graduation Berg will take a job with Ernst and Ernst in the firm's Washington office.

Arts, Sciences Publication Gets First Female Editor

By BOB BORDERS
 The first woman editor of a student publication in the history of A&M is now heading the A&M Review, the magazine of the Colleges of Liberal Arts, Sciences, and Geosciences.

She is Judy Franklin a junior journalism major from Bryan. Miss Franklin took over the

Review Feb. 1, and the first issue is now being printed. Plans call for another three issues this semester.

The new staff, besides Miss Franklin, includes Steve Korenek, managing editor; Mike Plake, features editor; Russell Autrey and Scott Harvey, photographers; and Mark McNeel, advertising

manager.

REVIEW managing editor in the fall, Miss Franklin moved to the editor's desk with the resignation of John Hotard in January.

Miss Franklin and her staff welcome contributions from students, not just from the Colleges of Liberal Arts, Sciences and Geosciences, but from all students of the university.

"The new policy is to include articles written only by A&M students," she said. "This includes fiction as well as features."

She said the new policy would also be to concentrate on a format directed to students. This will include all parts of the magazine, even jokes.

MISS FRANKLIN said even though this is the first instance of a woman editor at A&M, it does not mean a woman's touch will be evident.

"The jokes will still be a little dirty to interest Aggies," she confided.

She made it clear that the magazine was to be a service to the university.

"We realize it is impossible to satisfy all students, but we feel the magazine will be a definite improvement over previous editions," Miss Franklin said.

Although the printing schedule calls for two issues each semester, the first did not appear until last month, and the staff is working hard to put out the remaining issues.

NEW REVIEW STAFF
 Looking over the proofs of the first issue are (left to right) Mike Plake, feature editor; Steve Korenek, managing editor; and Judy Franklin, editor.
