

Teachers Taught To Explain Program

School teachers and officials in a Texas A&M institute are developing guides for explaining to the public a federal program for disadvantaged children.

Mrs. Lorene Roby, Education and Psychology Department director of the institute for Title I program directors, said individual

public relations plans will be bound into a 30-chapter workbook. In some cases, several participants of one school district are working together on a plan for that system.

Each plan, tailored to the participant's home school situation, is expected to furnish a different

attack on the problems of publicizing public school programs.

"The 30 plans will have one thing in common," commented Dr. Clayton Rose, institute visiting professor. "Each plan must expand on PR programs in the school district, leading to public understanding of Title I and be-

coming an integral part of the district's PR set-up.

The unprecedented institute is stirring wide interest, noted Dr. Paul Hensarling. Guidelines for the dissemination of Title I program information will be prepared and submitted to the Texas Education Agency for use in the

state. It may attract U. S. Office of Education attention, the department head added.

Institute participants include superintendents, principals, federal program coordinators, guidance counselors and college professors from all over Texas.

Class sessions include discussions of Title I itself, legislation affecting the federal education act, public relations approaches and message construction.

Instruction by Dr. Rose, public relations director of the New Work State Teachers Association, and Mrs. Roby, department PR coordinator, is amplified by addresses by Mrs. Elizabeth D. Kooz, newly elected president of the National Education Association, and TEA officials.

"The format of each participant's plan is entirely up to the individual," Mrs. Roby explained. "But it must be a practical approach usable in his own school district. The planned method must be what he thinks should be done, and what the district can do."

Roby and Rose stress that ideas must fit into the school district's regular public relations program.

The Title I PR programs should not only fit into existing channels, but open up possible avenues of telling the whole school story," Dr. Rose commented.

He said federal support to education administered locally is a fact of life. Fitting disadvantaged children into the broad educational programs is an absolute must.

"We have our chance now with the four to six-year-olds," Rose declared. "We must do whatever is necessary to equip these people of the next generation."

Girl Watchers' Corner

MODERN LANGUAGE MAJOR
Sarah Giensenschlag is a modern language major at A&M this summer from College Station. She is a sophomore and a student at A&M during the regular term, also.

Schools Set For Campus Security

Two training schools for campus security officers will be hosted in August by the police training division of Texas A&M's Engineering Extension Service.

Wallace Beasley, coordinator of police training at A&M, said the new course was established to fulfill requests of university and college presidents in Texas.

Emphasis, Beasley said, will be on new responsibilities and authority of campus security officers as provided through action of the last session of the Texas Legislature.

The initial school, set Aug. 14-19, is expected to attract 65 men. Fifty persons are anticipated for the second school Aug. 21-25.

Universities and colleges expected to send officers include Sul Ross, Lamar State, Southwest Texas, Pan American, Texas A&I, Angelo State, East Texas State, West Texas State, Texas Southern, Texas at Austin, Texas at Arlington, Texas at El Paso, Midwestern, North Texas State, Tarleton State, Houston, Sam Houston, Texas Tech and Texas A&M.

Beasley said interpretation of new laws regarding campus security officers will be made by J. A. Amis Jr., attorney for the Texas A&M System.

Among other speakers will be Bill Daniels, Texas Tech security chief; Ed E. Powell, A&M security chief; and Dr. Green received the Ph.D. this year from Louisiana State University where he specialized in cosmic ray physics. He did undergraduate work at Southwestern, Memphis, Tenn.

Dr. Pearce earned his Ph.D. this year from Rice where he also did undergraduate study. His graduate study was in the field of Ohmura method of potential deduction.

ity chief; Sgt. Paul Allen, Texas Department of Public Safety, Bryan; W. E. Naylor, Narcotics Bureau chief, TDPS; Brazos County Judge Bill Vance, and Texas Ranger O. L. Luther of Bryan.

Wiedmann To Give Graduate Lecture On Friday Night

Dr. Hans Wiedmann, visiting professor at Louisiana State University, will give a graduate College lecture Friday at Texas A&M.

A&M Academic Vice President Wayne C. Hall announced Dr. Wiedmann's talk for 3 p.m. in room 229 of the Chemistry Building.

Topic is "Preparation of Amino Sugars From Uronic Acids."

Wiedmann received his Ph.D. at the University of Mainz, Germany, in 1955. He was a research assistant at the university until 1957 when he began work on a post-doctoral fellowship at Texas A&M University.

After four years at A&M, Dr. Wiedmann joined the Institute of Technology at Graz, Austria, as lecturer. He advanced to full professor of organic chemistry there in 1965.

Dr. Wiedmann is a member of the German, Austrian and American Chemical Societies. He has written numerous research concerning alkaloids, organoboron compounds and carbohydrates.
