FREEMAN MEETS PRESS

Agriculture Secretary Orville L. Freeman speaks at a press conference Wednesday afternoon. The government official later addresseed AIBS delegates on "Sciences in the Service of Man: Agriculture 2000." From A&M, Freeman leaves on a two-day tour of Texas cities, including Hearne, Rosebud, Waco, Temple, Huntsville and Houston, Thursday and Friday.

education students will be em-"Notice I said 'capacity.' surplus of grain depends on how

turn depend on production and trade prospects and government policies."

He said only if the less-developed nations could somehow increase their agricultural productivity to 4 percent annually-a rate reached by only a few countries-could they achieve a high enough rate of economic growth to reach desirable minimum calorie production for he people and break their dependence on food

"Our economists view such radical rise in productivity as extremely unlikely," Freeman said.

He added that "history clearly shows that no nation has moved from chronic stagnation into sustained economic development unless it first achieved a substantial In short, he said U.S. policy is gain in agricultural productivity.

Civil Defense Aide Named

Robert C. Schnatterly, deputy director of Bexar County Civil Defense, has been named an instructor in A&M's Civil Defense Training Division.

Dr. Willis R. Bodine, coordinator of Civil Defense Training for A&M's Engineering Extension Service, said Schnatterly will join the staff Sept. 1.

Schnatterly has extensive teaching experience in radiological monitoring, much of it during 18 years as a sergeant in the U.S. Air Force. He also has taught adult education courses in Civil Defense.

Bodine said Schnatterly will specialize in teaching radiological defense courses. He noted the new instructor was a class leader in two courses taught by A&M staff members.

Schnatterly teaches marksman-Whether or not there is an actual ship for the National Guard in San Antonio.

ployed in weeklong studies of the community in depth, as well as pre and post-assessment. September 1. The decision was At All-Faiths Chapel Moslem Wedding Held

"I am honored to accept the presidency of an organization which is the major society representing all biology."

Dr. McElroy related that one of the prime areas in which the Institute is going to increase its efforts is that of biological educatino. He said, "There is a great need for upgrading the quality

Seminar Planned For Reservists

Navy and Army reservists from all areas of the nation are expected for a seminar on electronic computers Sept. 4-15 at A&M.

Sponsors for the seminar are the Office of Naval Research, Naval Reserve Research Company 8-3 of Bryan-College Station, and the University.

Computer programming and applications will be the main subject areas for 43 Navy reservists. three Army reservists and five staff members.

Seminar chairman is Capt. Walter H. Thames Jr., USNR, associate professor of plant physiology and pathology at A&M. Commandant's representative is Capt. Richard H. Ballinger, USNR, A&M professor of Eng-

Richard Wilcox, acting director of the Mathematical Sciences Division, Office of Naval Research, Washington, D.C., will address seminar participants during a Monday luncheon in the Memorial Student Center.

President Earl Rudder will velcome seminar participants during the luncheon.

University National Bank "On the side of Texas A&M" -Adv. **Awarded Barnard** Dr. Herbert M. Barnard, asso-

ciate professor of electrical engineering at Texas A&M, has been awarded a \$13,425 research contract by the Sandia Corporation of Albuquerque, N.M.

The contract calls for Barnard to conduct an eight-month theoretical study for a digital instrumentation scheme.

Aiding in the project is Don Todd of Quanah, Ph.D. candidate in electrical engineering. Todd is writing a doctoral thesis in

for the Journal of Bacteriology, Journal of General Physiology, Archives of Biochemistry and Biophysics and was science editor for Prentice Hall, Inc., from 1961

> to 1964. He is a member of the President's Science Advisory Committee and serves on a number of scientific societies, educational and government advisory panels. This is the first time AIBS has met in Texas.

director Oct. 1, 1966, joined the Service in 1948 as a forest prod-

ucts technologist. In 1955 he was promoted to head of the Forest Products Laboratory at the Cudlipp Forestry Center, Lufkin.

The new director received his bachelor's degree from Washington State University and has done graduate study in wood technology at the Graduate School, Yale University. He has published numerous articles on forestry and wood utilization.

He is current chairman of the Gulf States Section of the Society

The first Moslem wedding in pus chapel Sunday afternoon. A&M's All-Faiths Chapel was performed Saturday evening.

J. Gordon Gay, A&M religious life coordinator, said the ceremony wed Miss Nehad El-Khatib and Mahmoud Kased of Jordan.

Three hours after the Mosiem wedding, Kuo-Yao Tsa and Miss Sue-Fuay Lin of Formosa were married in a service conducted by Rev. R. L. Brown of College Station. Another Chinese couple was married by Epscolap minister Rev. Wesley Seeliger in the cam-

They are Hung-Chih Yu, studying for a masters in English, and Miss Jui-Chao Yeh, both of Taiwan. Formosa. Tsai, also from him. Taiwan, is in graduate petroleum engineering studies.

The Moslem wedding was unusual, although Gay has directed ceremonies for Australians, Germans and Chinese. He said the Tsai-Lin and Yu-Yeh ceremonies were the third and fourth Chinese couples to wed in the All-Faiths Chapel

Officers Needed **For Active Duty**

Bryan and College Station area US Army Reserve officers may qualify for active duty as- riage. signments in the Fourth Army area

Headquarters, Eighth Corps, announced reservists will be used to augment the active army mission of the Fourth Army area, including Texas, Arkansas, Louisiana, Oklahoma and New Mexico.

Qualified personnel will be ordered to active duty voluntarily, with their consent.

Vacancies exist in the grades of captain through lieutenant colonel and sergeant through sergeant major. Active duty assignments are with the Army, reserve components and reserve officers training corps (ROTC) through June, 1969.

Interested Ready Reservists, including those assigned to control groups, may obtain further information from the nearest Army Reserve Center or by writing the Commanding Officer, VIII US Army Corps, ATTN: AKVIII-AA, Austin 78701, concerning specific vacancies at in-Fourth Army area.

who usually averages directing two weddings a week during the summer, said the Moslem wedding was a learning experience for

General arrangements were made by El-Khatib. Hamed El-Keky, an A&M education graduate student who graduated from a Moslem Theological school in Jordan, conducted prayers.

The ceremony consisted of separate meetings with Miss El-Khatib and Kased. The bride's brother, who served as her guardian, two witnesses and El-Feky met first with the bride.

"Essentially, I asked my sister for the authority to give her hand in marriage," El-Khatib said. "Myself, the witnesses and minister then went into another room to the bridegroom and made a written document of the mar-

"After it was affixed with our five signatures, the bride was presented to her husband. They then entered the chapel where people were listening to portions of the Holy Koran being read. After greeting friends, the couple went for the reception."

The bridegroom is a business man in Puerto Rico. El-Khatib said the ceremony follows the format of wedding rites in Jordan, but will lack several details usually included.

Requirements will considerably lighten Gay's preparations. In A&M student weddings at the chapel, he often arranges for an organist, soloist, photographer and other details.

The Saturday evening wedding required only that Christian symbols be removed from the chapel and the Koran placed on the pulpit. One centerpiece of flowers was set.

First Bank & Trust now pays stallations of activities in the 5% per annum on savings certificates. -Adv.

many of the varied aspects of the biological sciences. Highlight of the week-long convention was a major scientific address by United States Secretary of Agriculture Orville Freeman.

AIBS EXHIBITS

More than 100 commercial exhibits are on display at Texas A&M for the 18th annual meeting of the American Institute of Biological Sciences. In addition to the exhibits, more than 1000 scientific papers will be presented, covering
