

Placement Office Plans Interviews

Mrs. Gladys Bishop, Placement Office Secretary, said the Placement Office no longer has employment interview sheets. No more will be printed. For this reason, The Battalion will print one sheet a day for the next nine days to enable all seniors to collect a copy of the Interview Sheets.

Forestry Official Discusses Parks Department Problems

Take a beautiful lake setting and add fishermen, bird watchers, students of nature, swimmers and water skiers, and what do you usually get? Trouble!

Walter S. Hopkins, chief of the U. S. Forest Service's Forest Recreation Research in Washington, D. C., said here Tuesday afternoon that the trouble stems from standardized recreation areas and campgrounds and the tendency to lump people into one category.

The forestry official was one of the main speakers during the two-week Recreation Management Institute (Sept. 24-Oct. 6) at Texas A&M University. A&M's Recreation and Parks Department is conducting the meetings.

The notion that most people behave similarly in recreation areas has led to standard facilities, standard campgrounds with standard spacings and standard designs—"and this may not be the way to do it," Hopkins said.

Campers, he explained, tend to segregate themselves into activity groups, such as fishing, nature study, swimming or water skiing. Requirements of one group seldom jibe with the others, and the situation can create hard feelings toward the area administrator.

Nature people want wide spacing and tranquility, water skiers like lots of company and bustle. What happens? The skiers complain about launching facilities, and the swimmers, fishermen and the nature study group squawk about the noise, danger and confusion caused by the motor boats.

"And the poor forest land manager who has provided a standard campground to serve all these groups is still looking for a friend," Hopkins said. "Seldom are campgrounds specifically planned for the activities to which they are host."

Designing recreation areas to

meet specialized needs should help reduce the conflicts. Carrying out such an arrangement won't be easy, but "some serious thought and study in this area should pay big dividends," the speaker said.

Institute Director Kenneth Butts of the A&M Recreation and Parks Department said the purpose of the meetings is to give recreation managers and technical specialists an updating of recreation knowledge, concepts and skills.

He said the conference is the first of its kind in the United States and involves eight federal agencies and personnel from local and state park departments.

CADETS SWAP OLD FOR NEW
Corps students have until Tuesday to turn in khaki uniforms and old style military blouses to the Military Property Custodian. Cadets will be issued a new blouse, set of pinks, one each long and short sleeve 1193 polyester shirts, and a pair of 1193 trousers.

Dr. Robert Cochran Notes Undergraduate Demands

A demand is developing in the fledgling nuclear power industry for less specialized personnel to handle operational and managerial functions, notes Dr. Robert Cochran, head of Texas A&M's Nuclear Engineering Department.

A&M is helping meet this demand by offering an undergraduate program in nuclear engineering, the first in Texas and surrounding states and one of only a few in the entire nation.

The undergraduate program, now beginning its second year, already has attracted 42 students, including 17 freshmen.

Pointing out that Texas A&M initiated graduate programs in nuclear engineering in 1959, Dr. Cochran says the need up until now has been for highly specialized personnel for research and development.

NOW, HOWEVER, as the industry matures and branches out into commercial aspects, there are definite requirements for many persons who are less specialized but still highly trained.

Needs of the industry already have reached the point, Cochran notes, that some firms have established their own nuclear training programs, varying in length from nine to 12 months, and are converting mechanical and electrical engineers.

Industry needs include men who can install, operate and maintain the nuclear reactors which are being developed by the researchers, emphasizes the former Oak Ridge nuclear Physicist and group leader. He predicts there also will be an increased demand in the industry

for sales engineers and persons engaged in administrative activities.

A PERSON with a B.S. degree in nuclear engineering can fill these positions, Dr. Cochran contends.

While no special prerequisites are required for undergraduate students, they must meet the general academic standards set by the College of Engineering. Most of the students have a solid

background in mathematics and science.

"We require a minimum 17 hours in nuclear engineering, allowing 12 elective hours for a major," Dr. Cochran notes. "Many students take problems courses as electives. Others lean toward business, psychology, mathematics and physics."

The nuclear power industry is an exciting engineering field of the future, he concludes.

A&M Sponsors Horse Course

The Seventh Annual Horse Short Course, sponsored by Texas A&M University, will be held November 10-12 at Texas A&M, announced B. F. Yates, Extension animal husbandman and coordinator of the course.

The program is designed to be of interest to all horse owners. A polo game will highlight the program on November 12, Yates said.

The short course will be centered at the Ramada Inn in College Station and visits and demonstrations will be held at the Animal Science and Veterinary Medicine facilities at Texas A&M.

The program on November 11 will consist of lectures on equine nutrition, genetics and health and panel discussions on the problems involved in hauling horses, recreational opportunities with horses and marketing problems. There will also be demonstrations and discussions on the activities of various groups and breed associations in Texas.

Expected demonstrations are to be on basic horsemanship, cutting horses, early handling and training of race horses, and

types of polo equipment. Also demonstrations on Paint Horse pleasure class, Palomino horse pairs class and Shetland ponies

AN OPEN LETTER!

Hello Aggies—

Welcome back home Aggies! We have missed you.

Well another school year is beginning and it is our hope you do well in all of your endeavors and that you accomplish all of your undertakings.

When you find time for recreation we hope you will visit us and renew old acquaintances. You know we are open 7 days a week 'til midnight and you'll always find some of your friends here.

We've added a brand new 5x10 Carom table to our center and this now gives us 2 - 5x10 pocket tables, 2 - 5x10 snooker tables, 2 - 4½x9 ft. pocket tables, 14 - 4x8 pocket tables, 9 of the latest pin ball machines, Toosball table (the new sensation form coast to coast and a new bumper table. We also have a new supply of jointed cue sticks from \$9.95 to \$95.00.

Let's all join forces and pull a little harder and help put the Aggies back to NUMBER ONE in 1967. It can be done!
