GRADUATING STUDENTS —

IT IS NOT TOO EARLY TO BE THINKING ABOUT PROFESSIONAL EMPLOYMENT AFTER GRADUATION.

I AM PREPARED TO DISCUSS SPECIFIC OPPORTUNITIES WITH SEVERAL EMPLOYERS.

A PERSONAL INTERVIEW WITH MR. W. R. HORSLEY MAY BE ARRANGED THROUGH THE PLACEMENT OFFICE.

What's The Answer?

By GARY SHERER
"What kind of a day was it? A day like all days, only . . ."

This is part of the sign off of a television program of the late fifties but it could have been applied to Saturday's college football games.

THE ENDING of the statement could read "everything went wrong" or "the oddsmakers took a bath" or "what happened?"

The last day of September, 1967, will go down as the most surprising Saturday of the season; that is, until THIS week. In a day of surprises, the Aggies added to the list as they dropped a 17-6 decision to LSU before 66,000 screaming Baton Rouge fans. The Tiger victory wasn't the surprising part, as they were 1-3 point favorites. The shocking thing about the loss was the way the Aggies looked.

A week before, the Maroon and White had come back at halftime, carried the fight to a huge Purdue aggregation and fell just two minutes short of licking the Big Ten power. How good is Purdue this year? By now, most of the world knows what team the Boilermakers topped 28-21 Saturday afternoon.

WHY THEN, could the Aggies gain a moral victory over Purdue and then turn around and suffer a letdown against LSU? One of the answers is the Aggies' extensive injury list from the Purdue loss, but possibly a truer answer is an unpredictable element—the college football player.

This element makes up all the college football teams in the nation. The age of this element runs from 18-23. This one thing can be blamed for the surprises that occurred Saturday.

Unlike the professional players, collegiate players don't play for money—only for the thrill of victory. Because of this, strange things can happen on a given day.

SATURDAY night, the Aggies

and LSU showed why college football is so unpredictable. LSU got the kickoff and in five plays were at the A&M 37-yard line. After the Tigers stalled and a 54-yard field goal try was unsuccessful, the Aggies took over. In two plays, the Aggies had a first down, then a fumble and LSU had the ball again.

This was the story of the first quarter, up and down the field but no score. With only two minutes gone in the second quarter, the situation changed. LSU marked 80 yards for a score and the beginning of the end had started for the Aggies.

The rest is now history. LSU put ten more points on the scoreboard and the Maroon and White finally broke the ice when Charlie Riggs hit Bob Long with a 7-yard aerial with just 70 seconds remaining.

WHAT IS surprising about this loss? The Aggies had piled up 336 yards offense against Purdue, but they fell 111 yards short of that figure Saturday night. Quarterback Edd Hargett, author of 17 pass completions in the Purdue game, fell to 4 of 14 against the Tigers.

It wasn't that the junior passer was inaccurate, but rather that he was throwing for his life. The LSU defensive line spent most of its time in the Aggie backfield as Hargett took some all-too-frequent trips to the turf.

But wait, this was the same line that Rice quarterback Bobby Shelton had riddled with some 300 yards of total offense the week before! Was it the Rice offensive line blocking, or was it that the Tiger defense wasn't ready?

What is the answer? That unpredictable element again.

AS MENTIONED, the Aggies were hurting physically but the LSU defense was ready this week where it wasn't the week before. The Aggies, ready against Pur-

due, weren't against LSU. The comparisons can go on and on, but what is more important, the Aggies lost their third game in as many played.

What will happen this Saturday night at Kyle Field? This is anybody's guess. The Aggies' competition this week is the Florida State Seminoles, 0-2-1. The Seminoles were clobbered by Houston and then scored 37 points on Alabama.

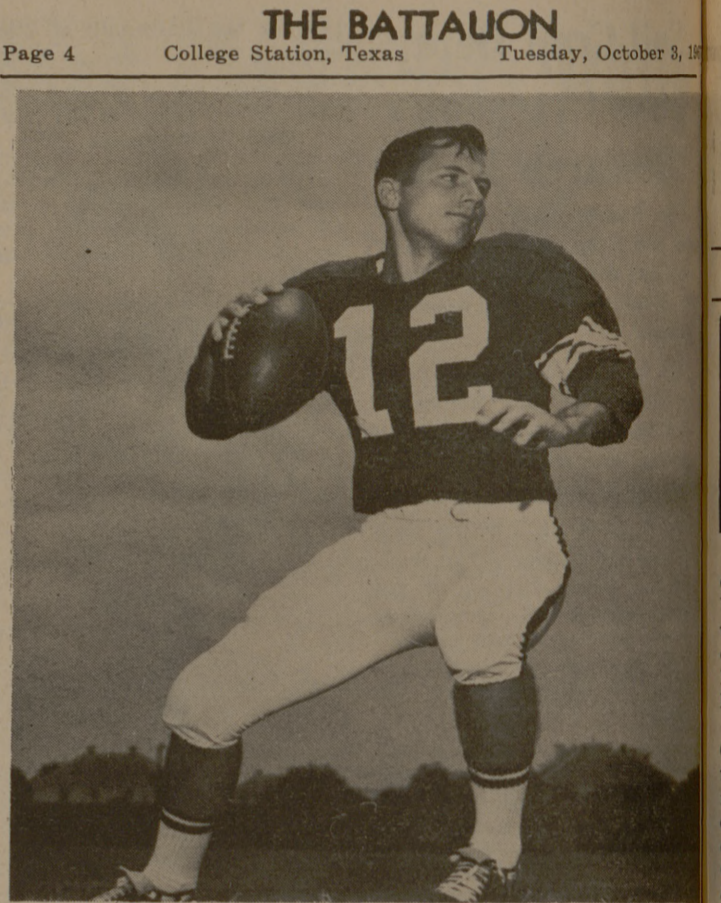

Why the difference? You know the answer!

Abilene Cooper Tops HS Ranks

CHARLIE RIGGS
The Galena Park junior quarterback was responsible for the only Aggie score Saturday night in the 17-6 loss to LSU.

Injuns And Army Battle Saturday

By JERRY GRISHAM
What will happen this Saturday night when the Seminole Injuns from Florida State tangle with Ole Army of Texas A&M in Kyle Field?

It could be the biggest massacre since The Little Big Horn or it could put the Seminoles back on the reservation and give new life to the battered troops of the Aggies.

In other words—who knows? Both teams are winless, the Aggies losing to SMU, Purdue and LSU, and the Florida State squad dropped one to the University of Houston, 33-13, then tied mighty Alabama, 37-37, and last weekend lost to North Carolina State, 20-10.

Injuries could play an important role in the contest. The Aggies are reeling from injuries received in the Purdue and LSU games. Florida State's junior quarterback, Gary Pajcic, will be out because of injuries received in the opening Houston game. But an able replacement, Kim Hammond, is a do-everything quarterback and has demonstrated that he can lead the Seminoles.

Hammond, a 190-pound senior, is no stranger at the position. He was the starting man-under for the Seminoles last year until Pajcic took it away. Florida State has demonstrated that it has the offensive punch with Hammond in. The Crimson Tide of Alabama is noted for its stingy defense, but the Seminoles racked up an impressive 37 points against them, striking primarily by the aerial route.

On the receiving end of Hammond's bombs is the duo which made Florida State fourth in the nation last year in passing offense. At the flanker back is Ed Sellers, a 194-pound junior who was All-American last year at that position. He caught 55 passes for 874 yards last year before a shoulder separation sidelined him. Thurston Taylor, a big 235-pound tight end, snared 28 passes for 366 yards and also averaged 40.9 as the punter late in the season. The Seminole offense is good, but defense is the big problem. Last year's platoon yielded 30 points in 11 games. Three games deep in this season they have given up 80 points. At the present rate, it appears they will surpass last year's mark.

Royal Report: 'I Told You So'

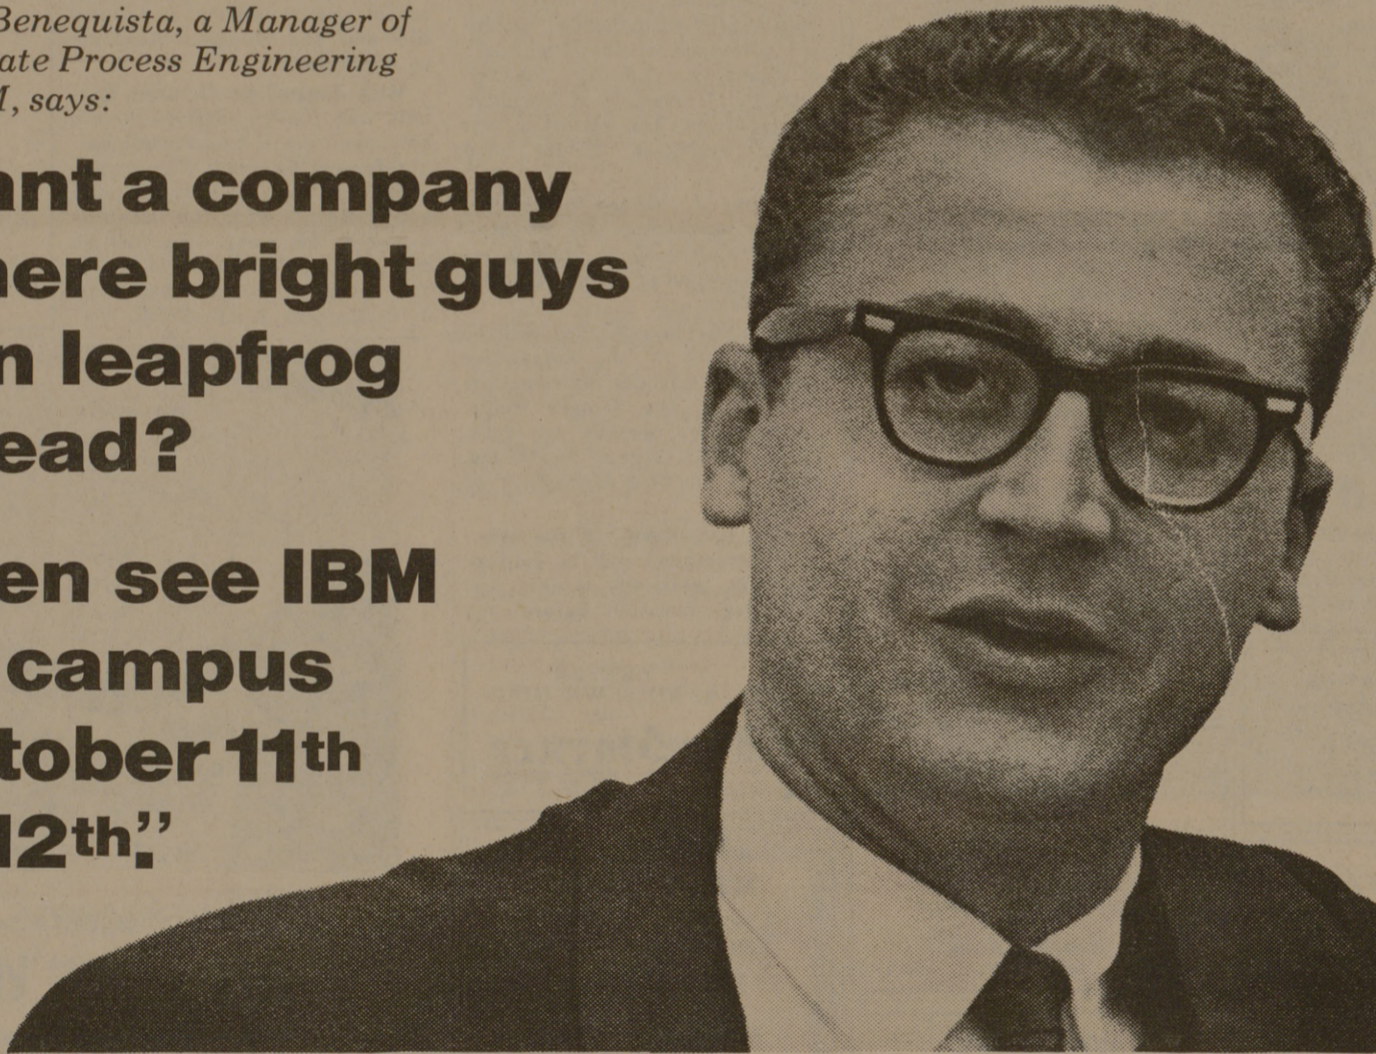

AUSTIN. (AP)—Darrell Royal surveyed the probable wreckage of Texas' dreams of a Southwest Conference football championship—even a national championship—as many had predicted—and said "I've tried to tell you folks I didn't have all those great players."

Texas, overwhelming favorite for the conference title and ranked third nationally in some polls, took a 19-13 licking from Texas Tech for its second defeat in a row—the first time Texas had dropped its two opening games since 1938.

Peter Benequista, a Manager of Substrate Process Engineering at IBM, says:

"Want a company where bright guys can leapfrog ahead?"

Then see IBM on campus October 11th or 12th."

Sign up for an interview at your placement office—even if you're headed for graduate school or military service.

Peter Benequista graduated with a B.S. in Mechanical Engineering in 1964. He started in IBM's Systems Development Division as a Junior Engineer. Less than two years later, he was promoted to Manager of Substrate Process Engineering at a major IBM plant.

Join IBM and you'll launch a career in the world's fastest growing, fastest changing major industry—information handling and control. This growth is one of many reasons young people can move ahead at IBM. (We have over 5,000 more managers today than we did less than four years ago.)

You'll work individually or as part of a small team (two to six people) no matter how large your project. That means you get quick recognition of achievement and also a strong sense of

personal contribution.

You can stay technologically hot. You'll have an opportunity to do state-of-the-art work in many different technologies or computer applications.

IBM makes it easy to continue your education. One program, for example, pays tuition and fees for qualified applicants while you work on your Master's or Ph.D.

Where would you like to work? We have 19 plants, 21 laboratories, and over 250 offices throughout the U.S.

We'll be on campus to interview for careers in Marketing, Computer Applications, Programming, Research and Development, Manufacturing, Customer Engineering, Finance and Administration. Come see us.

P. S. If you can't see us on campus, write to Mr. C. F. Cammack, IBM Corporation, 1447 Peachtree Street N.E., Atlanta, Georgia 30309.
