

"WORLD - SCOPE"

The Totally NEW B.S.U. INTERNATIONAL STUDENT PROGRAM

everyone invited

1st Session, Saturday, Nov. 4th At The Baptist Student Center (1 Block North Of North Gate Traffic Light) At 10:00 a. m.

The Object Of "WORLD - SCOPE" Is To:
Gain Understanding.
Cultivate Friendships.
Learn.
Gain A New Scope On The World.

Join Us For "WORLD - SCOPE," Won't You.
"You'll Think The World About It!"

The Coaches' Wives

It's Her Choice

By VANCY MANNING
Battalion Staff Writer
"I wouldn't want to be anything but a coach's wife," Mrs. Beth Moore, wife of offensive coach Bud Moore, says.
"I like it because it's always exciting," Mrs. Moore said. "And you're always meeting people," she added.

Because Coach Moore scouted the Baylor team, he received the game ball after A&M's victory over Baylor Saturday. "After he has it autographed, we're going to display it in our den," Mrs. Moore said happily.

The first athletic event she attended at A&M was a basketball game. "I was really impressed by the spirit the students demonstrated," she recalled.

She not only enjoys football, but also basketball and baseball.

She attends all home football games and some basketball and baseball games.

When she doesn't attend out of town games, she joins other coaches' wives in listening to the game on the radio. "Sometimes we get together to listen to a game," she said. "We enjoy rooting for our team together," she continued.

"I know my husband wouldn't be happy doing anything else," Mrs. Moore said. "And I wouldn't trade it for anything," she added.

But Mrs. Moore does find it lonely sometimes. After football season is over Coach Moore begins recruiting and spends a great deal of time out of town. "Everytime Bud starts to pack a suitcase, our five year old son Matt says, 'Daddy you go on too many trips,'" Mrs. Moore said.

"From 5 to 7 p.m. is when the children miss their father most because that is when other fathers in the neighborhood are coming home," she said. "They are always happy to see him and I sometime let them stay up to see him," she added.

She enjoys living in a college town. And she has found Bryan-College Station friendly.

"I feel happy all week after a win," she said. "I feel bad after a loss because I know how hard everyone has worked," she added.

"I know how low Bud feels after a loss," Mrs. Moore said. "I don't like him to feel that he has done badly when he really hasn't," she continued.

She has been impressed by the traditions at A&M. "There is a bond between Aggies," she noted. "They are proud to be Aggies and stick together even after they leave A&M."

Mrs. Moore, who enjoys sewing and playing bridge, graduated from the University of Alabama. She taught junior high school English, social studies and Spanish for a semester.

New Leaders In NFL Stats

NEW YORK (AP)—The halfway point in the National Football League race finds none of the 1966 champions at the top of the 1967 individual tables.

Chicago's Gale Sayers, the 1966 rushing champion, is down in 13th place among the current statistical leaders with Cleveland's Leroy Kelly showing the way with 584 yards.

Bart Starr of Green Bay was the leading passer last season but the current pacesetter is Sonny Jurgensen of the Washington Redskins. Starr is No. 18.

Charley Taylor of Washington, the 1966 top pass receiver, is currently out of action due to injuries but is only one behind the leader, Willie Richardson of Baltimore, who has 36.

Bruce Gossett, the Los Angeles Rams' place kicker and defending scoring champion, is running fourth in a department led by Jim Bakken of St. Louis with 81 points.

Baltimore's Dave Lee, the top punter of last season is No. 11 while Pat Studstill of Detroit is out front with a 45.4-yard average.

Sayers was the kickoff return champ a year ago but rookie John Love of Washington is just ahead of him this year. Johnny Roland of St. Louis, top punt return man in 1966, has given way to Rickie Harris of Washington.

Larry Wilson of St. Louis led the interception department with 10 interceptions in 1966. Currently, rookie Lem Barney of Detroit and the veteran Dave Whitsett of New Orleans are tied with six each.

most potent offense since it was the defense that scored both Rice touchdowns against Texas. They were a 75-yard pass interception and a 90-yard kickoff return.

MRS. BUD MOORE

Visiting Fish Seek First Win At Injured Owlets' Expense

The winless Texas Aggie Fish try to break their two-game losing streak tonight as they play the Rice Owlets in Houston.

The Fish have dropped two close ones, a 17-15 loss to the TCU Wogs and a 14-7 decision to the Baylor Cubs, while the Owlets stand at 1-1 with a 15-0 victory over the SMU Colts and a 36-12 trouncing at the hands of the Texas Shorthorns.

The Rice Freshmen are severely hampered going into this game due to injuries. Against Texas both Rice quarterbacks were out with injuries, first-stringer Gary Thomas with an ankle injury and his backup Terry English with a bad knee. Larry Caldwell, a converted tailback handled the quarterback duties in the Texas game.

During the game the Owlets' fullback, Tommy Peel was taken out with a shoulder dislocation and he will be on the sidelines tonight.

Against the Shorthorns the Owlets could generate almost no offense. They gained 47 yards on the ground and Caldwell's one for 17 in the passing department netted only 10 yards in the air for an offensive total of only 57 yards. They also had five aeriels swiped by the Texas defense and could make only three first downs to Texas' 20.

The Owlets' defense is their

I won't go into business when I graduate because:

- a. I'd lose my individuality.
- b. It's graduate school for me.
- c. My mother wants me to be a doctor.

Can't argue with c), but before you check a) or b)—pencils up! There have been some changes. Drastic changes in the business scene. But changes in the *vox populi* attitude regarding business... especially on campus... just haven't kept pace.

Take the belabored point that business turns you into a jellyfish. The men who run most of the nation's successful firms didn't arrive by nepotism, by trusting an Ouija board, or by agreeing with their bosses. Along the way, a well-modulated "No" was said. And backed up with the savvy and guts today's business demands.

In short, individuality is highly prized in much of the business world—the successful much. Even when the business is big. Like Western Electric, the manufacturing and supply unit of the Bell System.

We provide communications equipment for

our Bell System teammates, the Bell telephone companies. This takes a lot of thought, decisions, strong stands for our convictions, (and sometimes some mistakes... we're human, every 160,000 of us).

Individuality pays off. Not only in raises, but in personal reward as well. Like an engineer who knew deep down that there was a better way to make a certain wire connector—and did. Or a WE gal who streamlined time-consuming office procedures, and saved us some \$63,000 a year.

Rewards and accolades. For saying "No." For thinking creatively and individually. For doing.

Not every hour is Fun Hour, but if you've got imagination and individuality—you've got it made. With a business like Western Electric. We'll even help you answer b) with our Tuition Refund program. Come on in and go for President!

Engineers:

Help yourself to an enriching career in exciting Houston!

WHAT'S HAPPENING IN HOUSTON?

Plenty. Major league baseball and football... year-round golf... soccer... ice hockey... hunting... fishing. And you and your family can enjoy sunny Gulf beaches... the Astrodome... Astroworld (a Disneyland-type amusement center now under construction)... fine art galleries... opera, symphony, ballet, theater in Jones Hall... great restaurants... vibrant downtown and thriving suburban areas... low-cost housing—all the excitement of living in the nation's sixth-largest city!

WHAT'S HAPPENING AT HL&P?

Growth—to serve America's most dynamic growth area! We're already one of the nation's largest electric power companies, and we're carrying out an expansion program that will increase by 70% the power available to the Houston-Gulf Coast area. Every working day we

invest \$270,000 in this program that includes a revolutionary computer-controlled Electric Energy Control Center... new generating and distribution facilities... and a new skyscraper headquarters building now nearing completion in Houston's downtown Civic Center area.

HOW FAR CAN YOU GO WITH HL&P?

All the way to the top. Our president began his career as a transmission engineer for HL&P. Because an electric utility is built on engineering skills, engineers can realize rewarding careers with us. Right now our Engineering Department,

Power Department and Sales Divisions offer growth positions to BS, MS or PhD candidates in Electrical Engineering. There are also excellent opportunities in Mechanical and Chemical Engineering.

MONDAY & TUESDAY, NOVEMBER 6 & 7

Our representatives will be on campus on this date. So, for an interview appointment with one

of these men, please contact your placement office now!
