Romney Cancels CBS Appearance

LANSING, Mich. (AP) — Gov. George Romney, a presidential aspirant, said Thursday he has canceled a half hour's national television time on the Columbia Broadcasting System because of restrictions imposed by the network.

Dedication Set Next Month For Cyclotron

Texas A&M will formally dedicate its new \$6 million cyclotron complex Dec. 4.

Whitney A. McFarlin, associate director of A&M's Cyclotron Institute, said several top government officials and representatives of the nation's scientific community will participate in the ceremonies.

The Texas A&M Cyclotron—only one in the Southwest—will be used for nuclear particle research and for biomedical and engineering investigations.

Conceived in 1962, the cyclotron project was officially begun in April, 1964, with a \$3 million Atomic Energy Commission grant. The State of Texas furnished \$2 million for construction of the building and the Robert A. Welch Foundation of Houston provided a \$1 million grant for laboratories and equipment.

A&M scientists created the cyclotron's first beam of nuclear particles in August. Additional engineering and testing have proceeded on schedule to put the machine in full operation next month, McFarlin said.

The A&M cyclotron is considered a third-generation machine, evolving from the first successful device of its kind created in 1931.

Incorporating design dictated by Einstein's theory of relativity, the A&M cyclotron can accelerate numerous types of nuclear particles to extremely high speeds. It can accelerate protons, for example, to energies of from six to 60 million electron volts. Other particles can be accelerated to more than 100 million electron volts.

McFarlin explained that it is by bombarding various materials with particles that scientists learn more about the nature of the atom's nucleus.

Deadline Nears In B-CS Vote

Tuesday is the deadline for voting on the Nov. 11 election, remind Bryan-College Station Chamber of Commerce officials who are urging passage of Amendment No. 6.

Don Dillon, the chamber's civic vice president, notes election day is also the opening of deer season. He urges hunters to vote absentee.

Passage of Amendment 6 would allow non-elective state officers and employees, including personnel at state-supported institutions such as Texas A&M, to serve in other non-elective state and federal positions.

Specifically, approval of the amendment would permit faculty members at state-supported schools to accept invitations to serve on non-paying federal and state advisory boards.

A&M President Earl Rudder pointed out that many of these advisory boards control allocation of large research and development grants and are often instrumental in determining location of federal facilities.

Texas, Rudder observed, is at a distinct disadvantage in obtaining such funds and facilities because it has no representation on the boards.

Texas is one of the few states prohibiting service on such boards. The provision against such service dates back to 1876.

tion" of the Republican party for president, Romney said.

ROMNEY ADDED that he would say "in the near future" whether he will seek the nomination, but he did not say when or how he would make his decision known.

The Michigan chief executive had said he intended to use the time on national TV to report to the nation on "a matter of importance." He had indicated this would include his views on violence that wracked some of the nation's urban areas last summer.

There had been widespread speculation that Romney would use the television time which had been scheduled for Nov. 15, to announce his candidacy for the nomination.

"A DECISION whether or not to become a candidate should be conveyed first to all the American people at one time through media simultaneously and equally," Romney said. "This is what I intend to do in the near future." He did not elaborate.

In New York, Thomas H. Dawson, president of the CBS television network, said in a statement: "We wish to make it clear that from the very commencement of our negotiations with his representatives we were told that he desired network television time in order to announce his candidacy."

"WE WOULD NOT otherwise have entertained his request for broadcast time."

CBS also released the text of a letter it said was addressed Oct. 27 to Ralph Davis in the Detroit office of McCann-Erickson, Inc.

The letter outlined a CBS policy that, in the area of controversial issues, only political candidates may buy television time. Otherwise any such programs must be produced under the direction and control of the network.

"Both these policies," the letter added, "would make it impossible for us to sell time to Gov. Romney—or, of course, to Messrs. Nixon, Reagan or any other person—unless his appearance is as a candidate."

Prof To Head Teachers Meet

Dr. Paul Hensarling of Texas A&M University will become chairman of the annual Texas Conference on Teacher Education in San Antonio this weekend.

Hensarling, Education Department head, became vice chairman at the 1966 conference in Dallas. He will succeed Frank L. Williams, assistant superintendent of Dallas schools.

The 20th conference will convene state college and university education personnel with state and federal officials for scrutiny of teacher education problems.

Keynote speakers of the three-day meeting are Dr. Jack K. Williams, commissioner on higher education of the Texas College and University System Coordinating Board; Dr. Wayne O. Reed, associate commissioner for federal-state relations, U. S. Office of Education; Dr. Robert B. Howsam, University of Texas Education Association's Center for the Study of Instruction.

Hensarling will preside at general assemblies Monday and participate in Tuesday business and planning committee meetings.

Also involved in the conference are A&M education professors Dr. Roger L. Harrell and Dr. Lester S. Richardson. Harrell is chairman, Richardson consultant of round table discussions.

Mansfield Plans Fort Worth Talk

W. B. Mansfield, chief instructor for the Supervision Development Division of Texas A&M's Engineering Extension Service, will be in Fort Worth Wednesday to address the Safety Council of Fort Worth and Tarrant County.

Mansfield's talk, scheduled during the council's 23rd annual Industrial Institute, is titled, "The Importance of Continuous Training Programs in Industrial Safety Departments."

Adams Announces Plans For Work On '67 Bonfire

FOREIGN STUDENT ADVISORS

Mrs. Earl Rudder greets foreign student advisors from colleges in the South and Southwest at a reception Thursday afternoon at the Rudders' home. The advisors are at A&M in connection with the regional meeting of the National Association for Foreign Student Affairs, which continues today.

Foreign Students' Problems To Be Discussed Tonight

Problems of foreign students in American Universities and colleges will be probed Friday at Texas A&M by delegates attending a regional meeting of the National Association for Foreign Student Affairs and the Institute of International Education.

The three-day conference opened Thursday at the Ramada Inn with a talk by Marita T. Houlihan, coordinator for student activities, Bureau of Education and Cultural Affairs, U. S. State Department.

Miss Houlihan praised university and college officials throughout the nation for sharp evaluation of needs of foreign students. She noted that only four per cent

of support granted foreign students is used for administration.

DR. GEORGE W. Kunze, associate dean of A&M's Graduate College, traced the growth of foreign student enrollment at A&M from 63 in 1950 to 602 in 1967.

Dean Kunze predicted continued growth of foreign student programs in the United States and praised A&M's foreign student advisor, Robert L. Melcher, as one of the most efficient and capable men in the profession.

Forty-five persons participated in the opening session, but the registration total was expected to climb to 75 by Friday.

Delegates were honored Thursday evening with a reception at

the home of A&M President and Mrs. Earl Rudder. They also were the honorees at a barbecue later in the evening at Shiloh Hall.

FRIDAY'S SPEAKERS include Kendrick N. Marshall, Student Financial Aid Division, U. S. Department of Health, Education and Welfare; Dr. Howard A. Cutler, executive vice president, Institute of International Education; and Dr. Lannes H. Hope, counseling psychologist, Texas A&M.

A Friday buffet luncheon will feature a talk by Tracy S. Park Jr., research director for Tennessee Gas Pipeline Company, David H. Gillard, director of programs at American Friends of the Middle East, will speak during an afternoon session.

Friday's slate also includes a banquet with entertainment by the Singing Cadets of Texas A&M.

A series of panels concerning immigration, admissions, community participation and U. S. study programs abroad are planned Friday afternoon.

A workshop will close the conference Saturday morning.

'Streetcar Named Desire' Set For Six-Night Guion Hall Run

The major fall production of the Aggie Players, "A Streetcar Named Desire," opens Wednesday for a six-night run in Guion Hall.

Performances are set for 8 p.m. Wednesday through Saturday and Monday and Tuesday, announced C. K. Esten, director.

Leading roles in the Tennessee Williams' play belong to Sandra Rose, senior education major of Bryan; Kirk Stewart, graduate English major from Axtell; Ruth Reeves, freshman psychology major from Bryan; and Jim Weyhenmeyer, a sophomore education major from Livingston, N. J.

Others in the cast are Roger Killingsworth, senior architecture major from Chattanooga, Tenn.; Cynthia Smith, senior physical education major from College Station; Rene Saenz, senior education major from Austin; Ronald Becker, sophomore physical education major from San Antonio; Thelma McGill, freshman education major from Bryan; Randy Teipel, senior English major from Bryan, and Kathleen Heaton, a teacher in College Station Schools. Miss Heaton also is stage manager for the play.

The play centers around activities of the Kowalski family which lives on a street named Elysian Fields in the French Quarter of New Orleans.

Blanche DuBois, central character of the play, comes to the home of her sister, Stella Kowalski, after being fired from her teaching position in Laurel for moral misconduct. A stereotyped

Southern Belle, Blanche lives in a world of illusion. The hard reality of the Kowalski household coupled with Blanche's already shaken emotional and mental condition, lead to her ultimate downfall.

The production staff includes Harry Gooding, set design; Kirk Stewart, set construction; Chick Rose, sound; Jean Reyna and Cynthia Smith, lights; Thelma McGill and Jean Malone, properties; Linda Bloom, costumes, and Nancy Wick, house.

'American Dream' Casting To Begin

Casting for an Aggie Players production of "The American Dream," a comedy by Edward Albee, is set Monday and Tuesday in the Guion Hall Fallout Theater.

Director Robert H. Archer, instructor in English at A&M, said parts are open for two men and three women, with jobs available for persons interested in working on the technical crew. Bryan-College Station residents and A&M students are invited to audition, Archer added.

The play will be produced Dec. 7-8-9 in the Fallout Theater.

Preliminary Cuts Set Next Week

By JOHN MCCARROLL

Once again, the Aggies are out to build one of the most impressive stacks of spirit that has ever hit the Southwest Conference.

This year, thousands of Cadets and gung-ho civilians will meet in the woods east of Bryan to cut and begin hauling millions of board feet of logs to the Bonfire site on the Air Force Drill Field.

BECAUSE OF the A&M-Rice game scheduled for the weekend preceding the Bonfire, work will begin early on the huge stack. Cutting and hauling will begin on Saturday morning, Nov. 11.

"Last year we had a 65 foot stack—this year we hope to have one at least 85 feet," Neal Adams, head yell leader, said.

The centerpole will arrive at the stacking site on Nov. 4, and will go up on the following day. Actual stacking will begin at noon on Nov. 16, and will continue until the night of the Bonfire on Nov. 22.

"UNDERCLASSMEN will be permitted to work on the Bonfire for four days only. They can work only on Nov. 11, 12, 19, and 20," he continued. Juniors and Seniors who do not have classes on the afternoons of Nov. 9, 10, 16, and 17 may go to the cutting area to perform preparatory

work including some preliminary wood cutting.

On Nov. 11, 12, 19, and 20, at 6 a.m. Cadets will meet in the stacking area behind Duncan Mess Hall to board trucks to travel to the cutting area. Meals will be served on these days at 5:30 a.m., 11 a.m. to 1 p.m., and 7 p.m.

ACCORDING TO Adams, outfit jobs have been assigned as follows:

Cutting area—A-1, B-1, C-1, D-1, E-1, F-1, G-1, B-2, D-2, E-2, Sqd. 1, Sqd. 2, Sqd. 4, Sqd. 5, Sqd. 7, Sqd. 8, Sqd. 10, and Sqd. 11.

Loading area—Sqd. 3, Sqd. 6, and Sqd. 9.

Stacking area—A-2, C-2, and F-2.

Unloading will be handled by the Maroon and White Band.

For the first time the civilians will be an integral part of the Bonfire. While the Corps makes the trip to Houston for the game with Rice, the "non-reggs" will continue with stacking and security measures under the supervision of Tommy Osburn.

"We need everybody we can get this year," Adams said. "This is the year the civilians can make a name for themselves; we are expecting about five or six hundred to show up."

Air Force Display To Be Moved To Campus Sites This Month

An Air Force display depicting development of air power through models and pictures will be exhibited at various locations at Texas A&M during the next month.

Assembled by Aerospace Studies 300 class, the exhibit has been in the Memorial Student Center and is scheduled for the Military Science Department annex next.

"We plan to set it up in other locations on campus," noted Paul Mebane of San Antonio, project student chief.

"It's a motivational display and we won't mind if it has some recruiting value too," commented the junior aerospace engineering major.

Models and photographs in the display are contributed by students and the Trigon. Development from the Wright brothers' ship to the B-70 is portrayed. The display includes a leather World War I flying helmet. Models of the era simulate a "dog fight."

A flying suit, models of the U. S. missile arsenal and the Titan II, Gemini spacecraft booster, peg the other end of the development spectrum.

Working with Mebane in arranging and moving the display are John Williams of San Antonio, Doug Vasilichin, Tampa, Fla.; Bob Sikes, Fort Worth; Dan McCauley, Brookshire; Miles Sawyer, Burnet; Don Linnen, Longview, and Bud Welch, Sheppard AFB.

They are AS 300 cadets of Maj. Charles W. Haney.

TTI Staffer Goes To Florida Meet

Dr. Bob M. Gallaway, Materials and Construction Department head of the Texas Transportation Institute at Texas A&M University, is in Ocala, Fla., today for a professional meeting.

Gallaway, who spoke this week at the University of Illinois in Urbana, will join in committee meetings of the American Society of Testing Materials.
