

Wives Enroll In Workshop Course

Wives of students and faculty members in Texas A&M's Industrial Education Department are getting first-hand experience in their husbands' work.

The fairs—15 of them—are enrolled in a Saturday non-credit course in industrial graphics.

"It's sort of a Christmas workshop," pointed out Dick Jackson, the volunteer instructor. "The wives are making personalized Christmas cards, stationery and letters."

"Our objective," he explained, "is to give the wives a little more insight into what their husbands do. Most of them are involved in other wives' organizations, but they don't usually make things."

"Most of the women are already acquainted with each other," Jackson continued. "This is something they decided they wanted to do. They have no knowledge of any of the operations. You might say they are getting a total education in graphic arts."

Jackson said operations include cutting stencils for silkscreen

printing, making offset printing plates, handset type for letterpress printing, and actual operation of letterpress and offset presses.

"A real fun part of the work is washing the presses," Jackson chuckled. "The women caught on to this pretty quickly. They plan two or three press runs in a row before washing the presses."

Mrs. Clint Bertrand and Mrs. Michael Seal are making Christmas cards via a block printing process similar to engraving. They cut away part of the linoleum mounted on a plywood base. The results produce unique, original designs.

Injecting humor into the buzzing classwork, Mrs. Seal commented, "Why did the ladies take up graphic arts?" "To get away from the kids... no, not really," she laughed.

Mrs. Nina Grannis said she became interested in the class "because it is something related with Christmas."

James Hartman inspired his wife to make silkscreen Christmas

cards.

"Jim made our cards last year," Mrs. Hartman smiled. "I wanted to show him I could make them this time."

The instructor, Jackson, is a graduate assistant in industrial education while working on a doctorate in education. He has a master's degree from San Diego and a bachelor's from the University of Minnesota.

"There's a great future for women in industrial education," he noted. "Industrial arts are becoming more widespread in elementary schools, but enrollment in this area in secondary schools is almost 100 per cent boys."

Jackson says he thinks it would be helpful if boys would take home economics and girls enroll in industrial education.

"They could learn things which would be helpful throughout life," he remarked.

A boost for Jackson's Saturday class came from his wife, Hartha, who encouraged him to develop it. Jackson got the green light from Dr. Everett Glazener, the department head, and the wives took it from there.

The class is much like home to the wives. They can dress informally in slacks and there are plenty of aprons available.

CHRISTMAS PROJECT

Mrs. Michael Seal, whose husband is a graduate student in industrial education, locks a form holding her design for a Christmas card. She's among 15 wives of industrial education students and faculty members working on industrial graphics projects at Texas A&M University.

Foreign Students Like Agriculture

Over 40 percent of all the foreign students registered at Texas A&M are enrolled in the College of Agriculture.

Figures released by Robert L. Melcher, International Programs Office, show that the 577 students, graduate and undergraduate, represent 61 countries from A to V... Arabia to Venezuela.

The Dominican Republic, Pakistan and Tunisia have the greatest number of students enrolled in agriculture. Sixty-six of the 73 Dominicans, 30 of the 50 Pakistanis and 19 of the 26 Tunisians are enrolled in the College of Agriculture.

Dr. R. C. Potts, assistant dean of agriculture, explained Texas A&M University has contracts with the Agency for International Development in the three countries mentioned above. He pointed out that agriculture is a major part of their economy.

The Dominican Republic has no steel, oil or coal but it has other good natural resources—soil and water. But out of 3 1/2 million people, not more than 20 have a Bachelor of Science degree or its equivalent in agriculture. Potts said Texas A&M's contract with the Dominican Republic through AID calls for research and education in the field of agriculture.

"Texas A&M's College of Agriculture has always had a good reputation throughout the world in the field of agriculture," Potts said.

Jesse Chisholm was a wandering Indian trader who died in 1868 after eating bear grease that turned out to be toxic. He is the man whose wagon route became the nation's important cattle trail. He never went back.

'Beautify Texas' Say Agencies

COLLEGE STATION (AP)— The Beautify Texas Council officially was formed Wednesday as a group of 25 Texas agency and organization representatives adopted by-laws and elected officers.

O. P. Schnabel of San Antonio was elected president. Jack T. Sloan, resource development specialist at Texas A&M, was named secretary-treasurer.

Ten vice presidents were chosen to represent various parts of the state. They included Mrs. E. O. Barton, president of the Texas Garden Clubs in Houston; Theron Carroll, Texas Parks and Wildlife Department in Austin; W. L. Colegrove, Freeport; Mrs. John Godby, Neighborhood Improvement Program, Dallas; Emil Huber, Department of Housing and Urban Development, Fort Worth; Henry L. Kirk, Texas Howard W. Lick, Texas Landscape Association, Austin, and W. D. Oliver, Texas Forestry Association, Carthage; Roy F. Rodman, landscape architect with the Texas Highway Department, Austin; Mrs. Henry Shaper, Texas Federation of Women's Clubs, San Antonio.

The council was formed to coordinate efforts of existing groups to bring together ideas and information.

The group plans a statewide meeting in February at a site still not selected.

Lt. Governor Says Responsibilities Tied To Freedom

ODESSA (AP)— With freedom goes responsibility, Lt. Gov. Preston Smith told the Odessa Scottish Rite Association and DeMolay Chapter Wednesday night.

"To the draft card burners and the hate mongers of every stripe who scream with voices of venom while hiding behind Americans' freedoms, let me warn you that freedom and responsibility go hand in hand," Smith said. "You cannot have freedom without responsibility. Nor can you maintain without an honest love of America and the cherished principles which have directed her destiny for these many, many years."

"So, those who preach civil disobedience and engage in a distorted practice of freedom by breaking laws, should know that they are tying their own noose. They are violating the very thing they rely on for protection—the law," he said.

Smith will address the first state convention of the Texas Fertilizer Association at 11:30 a.m. Thursday in Lubbock.

His speech is entitled "Tooting the Horn of Plenty."

Final Respects Paid To Garner

UVALDE (AP)— Scuffed cowboy boots and petite high-heeled slippers slowly shuffled past the casket of former Vice President John Nance Garner Wednesday as neighbors and friends paid him farewell.

Garner died quietly Tuesday 15 days before his 99th birthday.

Brief, formal funeral services are scheduled Thursday afternoon.

But Wednesday was the time for person goodbys from the South Texans who knew him before he went to Washington in 1903 and after he returned in 1941, swearing never to cross the Potomac again following his break with President Franklin D. Roosevelt on the third-term issue.

Iranians Set First Tea

The Society of Iranian Students at Texas A&M has announced its first faculty-student tea for 4 to 6 p.m. Saturday in Room 2-A of the Memorial Student Center.

Rooh Partovi, society president, said the tea is designed to help develop an informal atmosphere for exchange of ideas on subjects of mutual interest.

Partovi noted exhibits will include a display of Iranian handicrafts provided by the 20-member society.

Methodists Host Supper

Friday evening from 5:30 until 8:00 the women of Oak Grove Church will serve in Fellowship Hall of A&M Methodist Church a Mexican dinner complete with enchiladas, tacos, tostados, rice and beans.

Tickets are \$1.25 for adults and \$.75 for children. They can be obtained at the door or by calling 846-6189. A free nursery will be provided.

C of C Supports Amendment Six

Emphasizing support for Texas Constitutional Amendment 6, Brazos County Chamber of Commerce officials have issued a reminder that Saturday is election day.

Polls will be open from 8 a.m. until 7 p.m. at 19 locations throughout Brazos County, the pointed out.

While taking no official stand on the five other amendments of the Saturday ballot, the chamber publicly endorsed Amendment 6 and urges area citizens to vote for it.

Passage of the amendment would allow non-elective state officers and employees to serve in other non-elective state and federal positions.

Specifically, the amendment would permit faculty members from state colleges and universities, such as Texas A&M, to accept invitations to serve on non-paying federal and state advisory boards, explained Rex Bailey, chairman of the chamber's Public Affairs Committee.

Bailey, also a member of the statewide Citizens' Committee for Amendment 6, said many of these advisory boards control allocation of large research and development grants and are often instrumental in determining location of federal facilities.

Texas, he added, is one of the few states prohibiting service on these boards.

"The state is at a distinct disadvantage in obtaining federal funds and facilities because of its lack of representation," Bailey stressed.
