Ed Veloz and Locke are the only bank employe Democrats in favor of local op are given little tion choice, while Republican Sisk is in favor because he "believes ERS, John Trice it could be controlled and the law Wallace Sisk of clarified better as the liquor laws allenge Eggers in desperately need clarification."

Smith, Whittenburg, Yarborough, and Eggers feel the people of Texas must make the decision on the referendum vote.

Hill, Mrs. Hackworthe, Carr, O'Daniel, Briscoe and Trice are against the proposal, but only Mrs. Hackworthe and O'Daniel would veto such legislation if it were passed by the legislature.

EDUCATION is another subpect high on the list for proposed changes by almost all the candidates. Most have endorsed the Texas State Teacher's Association proposed salary increase of \$1. 000. Locke, who told the TSTA legislative committee that he would not commit himself to such an increase, has since acknowledged that an increase in teacher's salaries was certainly needed but setting of a certain amount now, before taking office, would not be a prudent measure.

Yarborough, at College Station last week, said that he favors mandatory tenure for teachers. His proposal would protect teachers from arbitrary dismissal after a probationary period. During this period, the individual teacher's competence is considered but tenure would be granted only where justified by performance.

MINIMUM salary, poverty programs, reduction in crime, fouryear terms for governor and other state office holders, amending the penal code to provide for more severe penalties for crimes of violence; all are issues that most of the candidates have voiced their approval on.

Another issue that has arisen is whether or not the legislature should hold annual sessions rather than the present biennial session. This means that the legislature meets once every two years.

O'Daniel, in answering a Hous ton Post questionnaire, said:

"It is my belief the legislature is currently holding annual sessions, but if they are not, they certainly should."

More than 500,000 g the approval have uted to Texas resels and clubs.

he drink is the issue ught out the most opinion among the

Governor

sociation, which has led support in recent years for sale of liquor by the drink.

"THIS MAY be a good way to get the referendum passed . this ruling will hurt a good many legitimate private clubs and it will drastically affect eating places that also have a club," Price said.

"The HemisFair is already in trouble and this will just hurt even more our efforts to get tourists to come to Texas. People in California or Washington State or some other states are going to hear about this and say 'Hell, I'm not going to Texas where I have to carry around a bottle in my car all the time if I want a drink before a meal.""

THE MANAGER of an Austin private club said he planned to cancel all entertainment contracts "because with this we couldn't pay the light bill."

The TRA is one of several organizations urging approval of the voter opinion poll on liquor

**A&M** Junior Gets \$300 Scholarship

Robert D. Manny of Fort Worth, junior architecture stu-dent at Texas A&M, has been awarded a \$300 scholarship by the American Institute of Architects.

Manny, son of Mr. and Mrs. H. M. Manny, 2536 Timberline Dr., Fort Worth, was one of ten students across the nation to receive awards provided by Blum-craft of Pittsburg, designers and manufacturers of railing and grille systems. The scholarship winner is a

juste of Fort Worth Poly Tech High School.

**EXPLAINS USE OF POLICE ON CAMPUS** President Grayson Kirk of Columbia University tell a news conference at the New York school that he called city police to evict students barricaded in five buildings because "the university has been paralyzed by the illegal acts of a mi-nority of its students, aided and abetted by an unknown number of outsiders." At right is David Truman, a Colum-bia vice-president. Sit-in was by 500 to 600 demonstrators at a school whose enrollment is 27,500. (AP Wirephoto)

## Airborne A&M Meteorologists **Use Radar To Study Clouds**

clouds this month over South at the University of Chicago. Central Texas.

A&M Geosciences Dean Horace R. Byers said the university will make daily flights throughout May to learn more about the manner in which rain is initiated and to check the ability of radar to "see" through great depths of clouds.

The university will be using an electronics - laden Beech "Queenair" furnished by the Na-tional Center for Atmospheric Research at Boulder, Colo. The twin-engine aircraft will operate from A&M's Easterwood Airport.

Dean Byers, who also holds the rank of distinguished professor of meteorology, will conduct the initial test, with subsequent flights directed by Dr. Vance E. Moyer, Meteorology Department head, and approximately six other university meteorologists. "VERY LITTLE study of cloud

regime has been done in Texas," noted Byers, who conducted simi-

Airborne Texas A&M meteor- lar aerial research in Florida. ologists will be exploring the Arizona, Ohio and Missouri while

He said one of the principal questions is whether precipitation originates from the subfreezing portions of clouds.

"Previous theories predicted that rain comes from the subfreezing areas," the dean added, "but our earlier investigations in this area point to warm clouds."

HE OBSERVED this information will be vital if weather modification is attempted. The dean is chairman of the Texas Water Development. Board's weather modification advisory committee.

The current series of flights will concentrate on cumul clouds with 4,000-foot bases and 12.000-foot tops.

Byers said the Federal Aviation Agency office in Houston has given the university clearance to operate specific blocks of airspace, primarily between College Station and Houston.

Chief pilot for the flights will be William Bullock of NCAR.
