68,495,454 mark far outnumbers the 39,390,000 for auto racing which was second highest.

Another reason is the money made available to the state from horse race betting. In 1966, New York took in \$77 million in revenue from pari-mutuel betting on thoroughbreds alone. A combination figure which includes the above plus harness and quarter horse racing in New York came to \$148,173,782.

It can be noted from these figures that New York does not face the revenue problems that Texas does. We think its time that the people of Texas recognize the money-making advantages of pari-mutuel betting.

If they would quit listening to those dark-side opinions and finally face the true facts of pari-mutuel betting—with out emotional overtones—the answer would be evident: Vote for pari-mutuel betting!

We join with the TRA in the support of pari-mutuel horse racing for Texas. Lets make Texas a place where not only cowboys ride horses for a living.

Stallings Praises Maroon Squad

Coach Gene Stallings has some good words for his "maroon" squads as the second week of spring football training works toward completion.

The offense and defense first teams, which wear the maroon jerseys, have performed to expectations, according to the Aggie mentor.

However, he was not happy with the second and third teams. He noted that some of them looked at times like they were letting down in effort.

The spring game is still more than two weeks away, so Stallings and his staff will be searching hard for those candidates they will call back for fall practice.
