Chemical Engineers Challenge UOP to Challenge You

UOP is what professional people have made it... a leader in:

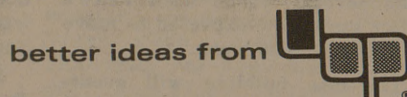

- petroleum process development
- process plant construction
- air and water management
- specialty organic chemicals
- plastic laminates
- fragrances, flavors and food products
- aircraft seating and galleys
- truck and tractor seating
- control instrumentation
- metals and alloys
- fabricated metal products

We have room for you to grow in all these areas.

With UOP, you can apply professional talent in research, development, engineering, design, manufacturing, marketing and technical service.

Be sure to talk with a Universal Oil Products Company representative at your Placement Office on November 14.

Challenge him to challenge you.

THUY SPEAKS IN PARIS

North Vietnamese chief negotiator at the Paris peace Talks Xuan Thuy smiles widely as he addresses newsmen in Paris. He said that the "unconditional halt of American bombing of North Vietnam "constitutes a great victory for the Vietnamese people in both zones." (AP Wirephoto)

Woman Stricken By Fly Disease

MISSION, Tex. (AP) — Officials at the southwest screwworm eradication laboratory said Thursday they have found the first documented cases of screwworms in a human in the United States.

A laboratory spokesman said a 41-year-old Mission woman was admitted to a San Antonio hospital several days ago for treatment.

The woman was in a coma-like state when admitted, a laboratory spokesman said.

A physician who was treating the woman discovered that she was suffering from "high infestation of larvae in the nose, mouth and throat."

The physician sent samples of the larvae to the Mission laboratory where they were confirmed Thursday as true screwworms.

Officials from the Mission laboratory rushed to San Antonio immediately to confer with the hospital staff and to suggest treatment.

Laboratory officials said that

the screwworm fly feeds on all warm-blooded animals.

It was the first documented case in the United States since the massive eradication program got underway eight years ago.

Officials cautioned that other persons may become infected by the screwworm fly in any area where a patient becomes ill and is in a home where the flies cannot be closed out.

Laboratory officials did not identify the woman and did not immediately disclose the name of the hospital where she is being treated.

Officials at the Mission laboratory said 8,333 cases had been confirmed in animals in Texas so far this year, but that the confirmed case count had been dropping for the past few weeks.

Screwworm fly cases have been confirmed in recent years in Mexico and South America and other countries where climatic and environmental conditions are ideal.

U.S. To Install Cameras

WASHINGTON (AP)—The government is ordering every federally insured bank and savings and loan association to install cameras and alarm systems to cut down the biggest wave of bank stickups since Bonnie and Clyde days.

There will be specific deadlines in 1970 and 1971 for installing the various gadgets, hardware and procedures spelled out Thursday by four agencies that regulate federally insured banks and savings and loan associations.

THE ORDER is in line with authority granted by Congress in light of FBI figures that bank robberies rose 45 per cent last year from 1966 levels and were up 278 per cent from 1960.

The FBI has been calling on the banks for years to button up a bit more and make things harder for the crooks. Congress responded this year by passing

the Bank Protection Act, which makes bank security mandatory rather than voluntary.

"Many, many banks are close to meeting these standards already," a spokesman for the Federal Deposit Insurance Corporation said. "The number of banks with camera systems for instance, has been shooting up in the last couple of years."

BESIDES THE FDIC, other agencies issuing regulations—virtually identical in their major provisions—are the Federal Reserve Board, Federal Home Loan Bank Board and Comptroller of the Currency.

They were issued on the usual

tentative basis to give interested parties time to comment. Spokesmen said the regulations will most certainly be adopted in final form Jan. 6 as now worded.

THEY REQUIRE installation by Jan. 1, 1971 of cameras positioned either to scan every person leaving a bank or savings loan office, or to observe every person approaching a teller's window.

By that same deadline the banks and S & Ls are to install burglar alarms both to summon police if a break-in is attempted during nonbusiness hours or to bring help when a holdup is staged during business hours.

Students Receive An Extra Lesson From Vet Profs

Veterinary students here receive an extra lesson every month, but it's a no-credit course.

Many of them do not know they are receiving the course. It is not found in the College of Veterinary Medicine's curriculum.

It's a lesson in dedication—given by faculty members!

This month's lesson will be offered Thursday, Nov. 7. It is a clinic-pathology conference.

Faculty members from all departments "fix themselves a sack lunch and eat and talk over interesting cases," noted Dr. K. R. Pierce who has charge of this month's meeting.

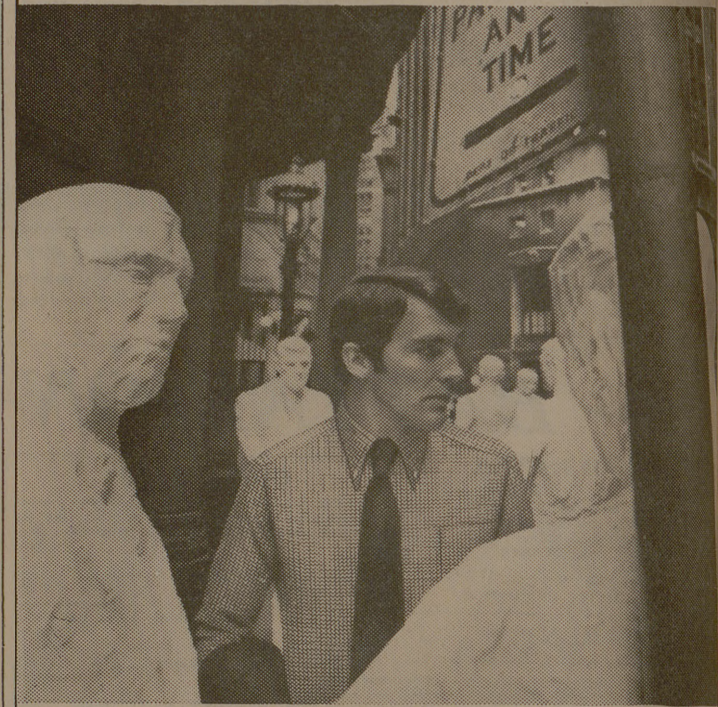

The monthly sack luncheon conference usually finds faculty members from all departments participating, Pierce added.

"It's the only period of time when we can all get together," admitted Dean A. A. Price. Graduate students often attend sessions, and occasionally undergraduate students.

While veterinarians eat cold sandwiches this week, four faculty members will discuss "Johnie disease in cattle." The doctors are R. G. Ferguson, L. M. Myers, E. E. Keahey and W. L. Sippel.

They readily admit it's "no place for anyone with a weak stomach."

When you come on in a Van Heusen shirt... the rest come off like a bunch of stiffs.

VAN HEUSEN
417

Now from Van Heusen... the scent of adventure... Passport 360... the first to last and last and last!

Friends! Seniors! Sheepskin chasers! Lend an ear to a rewarding career in menswear marketing, merchandising, engineering at Van Heusen! For full information, send your name and address to: College Grad Department, The Van Heusen Company, 417 Fifth Avenue, New York, New York 10016.

What the interviewer won't tell you about General Electric.

He won't tell you about all the job opportunities we have for college graduates.

Not that he wouldn't like to.

It's just that there are too many jobs and too little time.

In a half-hour interview our man couldn't begin to outline the scope and diversity of the opportunities we offer. Opportunities for engineering, science, business and liberal arts majors.

That's why we published a brochure called "Career Opportunities at General Electric."

It tells you about our markets, our products, our

business philosophy and our benefit programs.

And, in plain language, it tells you exactly how and where a person with your qualifications can start a career with General Electric. It even gives you the first step in starting a career with us—a Personal Information Form for you to fill out.

If you like what the brochure tells you about us, why not tell us about you? Our interviewer will be on campus soon.

GENERAL ELECTRIC
