

# AGGIE BONFIRE

### HANDLE WITH CARE

Richard Mock, F-2 junior, guides a piece of second tier timber into place Monday afternoon. Mock alternated on the stack with other members of companies F-2 and A-2.

### A CHANGE IN THE SCENERY

Two Ag stackers receive coffee from one of the many A&M coed volunteer workers. The coeds make their contribution to the Aggie Bonfire by working in both the coffee stations and first-aid stations.

### CIVILIAN WORKERS

Another surprising addition this year was the large number of civilian workers who turned out for Bonfire duty. Here a member of Davis-Gary Hall smokes up the woods with his chain saw while cutting a tree.

### QUICK UNLOADING JOB

After the band members were given enough time to get settled in their job they were ordered to unload each truck in 15 minutes or "suffer the consequences." Needless to say the unloading teams lost no time in talking about the project.
