

Hobbs, Rolf All-America Picks

Bill Hobbs and Rolf Krueger landed spots on the United Press International's All-America team announced yesterday as the Aggies paced the teams from the Southwest area in the voting. Defensive tackle Joe Greene of

North Texas State and Hobbs were the only area players to be selected to the first team while Krueger joined four others on the second team. It was the second time in two years that Hobbs has been named

to an All-America first team. Last season the 6-1, 215 pound linebacker was picked on the Associated Press' All-America squad. The Associated Press as well as most other organizations have yet to pick their 1968 honor teams.

Named to the UPI's second team along with Krueger were Jerry Levias of Southern Methodist, Chris Gilbert of Texas University and Jim Barnes of Arkansas all of the Southwest Conference and Eugene "Mercury" Morris of West Texas State.

Dallas Party Set
The Dallas Hometown Club will host an Aggie party at the Forest Hollow Country Club in Dallas Saturday from 8 p.m. to 1 a.m. Cost will be \$4 for Hometown Club members and \$5.50 for non-members. Setups will be furnished by the club.

Hobbs, a senior from Amarillo Tascosa, was hampered most of the season with a bad back but still managed to turn in his eye-popping performances.

Lvias is the leading pass receiver in the nation from his split end post while Gilbert, a halfback, is the leading ground gainer in the history of the SWC. Barnes, a 6-4 227 pounder, is an offensive guard while Morris is a halfback.

Krueger, the brother of former Aggie All-American Charley Krueger who now plays for the San Francisco 49ers, anchored the Aggie defensive line from his tackle post this year. It was the first All-America team that the 6-4, 243 pound native of Bryan has been named to.

Paul Gibson, a fullback for the University of Houston, was named to the UPI's honorable mention squad to round out the selections from the Southwest area.

Cage Season Starts Monday

The Texas Aggies play the first of five straight home basketball games next Monday night when they entertain Southern Mississippi in G. Rollie White Coliseum.

Expected to floor one of the top teams in the Southwest, Louisiana Tech, featuring seven-foot junior center Charlie Bishop, got added strength when Tom Farrell, an all-America performer at Kilgore J.C., transferred from South Carolina.

The Monday-Thursday schedule at home in December finds Centenary here Dec. 5, Lamar Tech Dec. 9, Louisiana Tech Dec. 12 and Stephen F. Austin Dec. 16.

There will be freshman prelim games at 5:45 against Wharton JC next Monday, against TCU Dec. 9; against Henderson County JC Dec. 12 and against Lon Morris JC Dec. 16.

Despite the absence of "big name schools, the early schedule will find the Aggies facing rugged opposition.

Coach Shelby Metcalf has announced that his probable starting lineup for the Monday night opener will have 7-foot sophomore Steve Niles at center, 6-9 senior Ronnie Peret and 6-5 senior Billy Bob Barnett at the forwards and 6-1 senior Sonny Benefield and 6-4 junior Mike Heitmann at the guards.

Stephen F. Austin, for example, lost only one letterman from

last year's 27-3 club and is expected to floor one of the top teams in the Southwest.

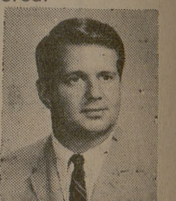

College tournament in Oklahoma City, Dec. 26-30.

MINISKIRT
Garden of Edenwise

Eve's wardrobe costs a little more these days—a factor that bears directly on every young husband's financial security. True, you may not be a young husband. Yet statistically, however, the odds are heavily against the permanency of that condition. And it's smart to plan now—before the wife and family make the scene.

Here's one way. Invest in a life insurance program that can provide the foundation for a solid financial structure. Remember, the earlier you start, the less coverage costs and the more security you'll have a chance to build.

So phone our office today. Or stop by and let's talk about it. In the meantime give a thought to the figleaf—and how comfortable it feels to be covered.

Engineering and Science at IBM

"The interdisciplinary environment keeps you technologically hot."

"Working in data processing today pretty much means you work in a broad spectrum of technologies," says Nick Donofrio.

An Associate Engineer at IBM, Nick is a 1967 graduate in Electrical Engineering. He's using his technical background to design circuits for computer memory systems.

"Circuit design used to be a narrow job," he says. "Today it can take you into the front yard of half a dozen different fields. In my job, for example, I work with systems design engineers, chemists, physicists, metallurgists, and programmers."

Nick describes a hypothetical case history: "A memory systems man comes to me with memory circuit requirements. Before I can start designing the circuit, I go to see a physicist. He helps me select an appropriate technology for the monolithic circuit.

"As the design develops, I work with a test group and also check back with the systems and semiconductor people to make sure I'm on the right track."

Keeping up

The interdisciplinary environment at IBM helps you keep up to date technologically. As Nick puts it, "You're constantly exposed to what's happening in other fields."

IBM needs technical graduates to work in research, design and development, manufacturing, product test, field engineering, and space and defense projects. We also need technical people in programming and marketing.

Check with your placement office

If you're interested in engineering and science at IBM, ask your placement office for more information.

Or send a resume or letter to Charles Cammack, IBM Corp., Dept. C, 1447 Peachtree St., N.E., Room 810, Atlanta, Ga. 30309. We'd like to hear from you even if you're headed for graduate school or military service.
