"It was a good idea, but I don't think one can study for two!"

Five Assigned To Staff Of Army ROTC

Assignment of five Army officers and non-commissioned officers including Lt. Col. William F. Turner to the Military Science Department has been announced by Col. Jim H. McCoy, commandant.

Army orders on the assignments became effective throughout the fall semester, the professor of military science said.

Colonel Turner, 44, of Clearwater, Fla., succeeds retired Lt. Col. R. L. Brooks as basic division chief. Brooks became commandant of Allen Military Academy in Bryan.

CAPT. NATHANIEL H. Robb Jr. of Raleigh, N.C., and Capt. Donald R. Goates of Waxahachie were assigned as advanced military science instructors. Staff Sgt. Donald E. Manna of Waldwick, N.J., reported to the administration section and Staff Sgt. Gilbert L. Railsback of Seymour became a basic section instructor.

A 21-year service veteran, Colonel Turner was in the Marine Corps three years during World War II and entered the Army in 1950. He completed undergraduate work in forestry at the University of Georgia in 1950. The new associate PMS wears the Bronze Star with "V" device and Purple Heart with a cluster. Turner is married, father of two daughters and is a native Texan of El Paso.

CAPTAIN ROBB was a Military Advisor Command advisor to the Vietnam Army in his last assignment. The 1964 Citadel graduate went to Aschaffenburg, Germany, with the 3rd Infantry Division in his first major assignment. The 26-year-old officer served the 3rd as platoon leader, S-3 and company commander.

His decorations include the Commendation Medal with "V" device and cluster, Bronze Star with "V" and cluster and the RVN Cross of Gallantry, with Silver and Bronze Stars. Robb is married and has two children.

TWO YEARS Air Force service preceded Captain Goates' transfer to the Army a year ago. He has served in Vietnam with distinction, receiving the Cross of Gallantry with Bronze Star. The 25-year-old officer graduated from East Texas State University in 1965. He and his wife have a daughter.

A personnel and management specialist, Sergeant Manna, 26, was born and raised in New Jersey, attending high school at Midland Park. He is single.

Sergeant Railsback has been in Korea and Vietnam the last four years. The non-com was born in Seymour and completed public school in 1962 at Seymour High.

Four states — North Dakota, South Dakota, Montana and Washington — mark the 79th anniversary of their admission to the Union in November. North Carolina celebrates its 179th birthday in November.

Connally Says State Jobs To Increase In Complexity

By JACK KEEVER AUSTIN (AP) — Gov. John Connally, on the brink of being a private citizen, gave a capsule course in state government to Texas agency heads Tuesday, predicting their jobs will get bigger and harder as the years go by.

Two weeks from the day Connally will leave office, he told the administrators: "The years ahead are exciting years, challenging years. It is no longer sufficient to live from day-to-day and just try to solve the state's problems that way."

"THE WORLD we live in is too complex and is changing too rapidly. The problems today were not even to be remembered two or three years ago. When I entered

office in 1963 there were approximately 45 federal programs. Now there are approximately 400."

The governor spoke off the cuff in his reception room, facing a semi-circle of administrators and Gov.-elect Preston Smith.

"Almost every governor is dependent on how well you do your job," Connally said.

HE TOLD the state officials, "Individually and collectively I think you have done a magnificent job," and they, in turn, praised him for his leadership.

But most of the time was spent on Connally's opinion of the changing role of state government and the future of it.

"There are so many programs that the people who really are supposed to benefit from them just cannot comprehend what programs there are, and they become confused and irritated," he said. "Ahead are a great many problems."

One, he said, would be the distribution of \$5 million or so in federal funds for work with the Criminal Justice Council.

"THE TIDE of events won't change," Connally said. "There are going to be more and more demands on regional type planning, even statewide planning. We ought not to make the same mistake the federal government has — but it's a normal human trait to try to direct something when you're giving the money for it."

Connally proposed block grants on the theory that the people who work with the money know best

what to do with it, and he added that many Texas agencies "are almost wholly financed by federal funds."

HE SAID in the past agency heads had been too reluctant to come directly to the governor with problems, but that "in 9 of 10 times in a real crisis the governor is the first person you're going to run to. The average person thinks the governor can solve anything, has to solve anything."

"I'm in complete accord" with that statement, Smith said.

Connally said the working relations between agencies and state, local and federal government "will have to be better than we even now have. There will be 1,000 instances when there will have to be an exchange between agencies to do the job."

HE ADVISED the administrators "to get good people to work with so you can have a little time to get off and think. . . ."

"If there is one failing of government it is that it doesn't anticipate, doesn't have the courage to anticipate, the problems of the future."

Pitt Prof Sets Geology Lecture

Dr. Edward G. Lidiak, associate professor in the Department of Earth and Planetary Sciences at the University of Pittsburgh, will present a lecture at 4:30 p.m. today in Room 105 of the Geology Building.

Geology Department Head Dr. Robert R. Berg said Lidiak's lecture is entitled "Tholeiitic and Calc-alkalic Volcanism in the Puerto Rican Orogen."

The igneous rocks which Lidiak will describe represents magmas derived from the oceanic crust and the deeper mantle, Berg noted.

He pointed out the rocks are important to an understanding of the origin of oceanic areas of the earth, and to problems of continental drift and sea-floor spreading.

Lidiak received his doctorate at Rice in 1963, and his publications include geophysical, petrologic and geochronologic studies of Precambrian rocks of the continental interior of the United States.

Bulletin Board

TONIGHT

Aggie Wives Bridge Club will meet at 7:30 p.m. on the second floor of the Memorial Student Center.

Aggie Christian Fellowship will meet at 5:30 p.m. in the All-Faiths Chapel. Linda Rich, folk-singer, will appear.

Hillel Club will meet at 7:30

p.m. at the Hillel Building. Friday night services will be held at 8 p.m.

Semper Fidelis Society will meet at 7:30 p.m. in room 145 of the Physics Building. Officer in charge of Marine Officer Selection will be here and a film will be shown.

Tau Beta Phi will meet at 5 p.m. in room 146 of the Physics Building.

THURSDAY

Corpus Christi Hometown Club will meet at 7:30 p.m. in the lobby of the Memorial Student Center. Club picture will be taken.

Council Approves City Hall Plans

An artist's conception of the new City Hall and Police-Fire Station is now on display at City Hall, Mayor D. A. "Andy" Anderson has reported.

Final approval of the plans was given to the architect at a special called meeting of the Council on Friday.

It is expected that the buildings will be under construction in four months, Anderson said.

Two fire trucks were recently ordered by the City Council but delivery is expected in 12 months.

Reprints Available On CS Charter

The Charter of the City of College Station has recently been reprinted and a copy is available to interested citizens, Mayor D. A. "Andy" Anderson has reported.

The updated Charter includes changes approved by the citizens in the last two Charter Change elections, the Mayor stated.

Copies are available at City Hall, he concluded.

\$1 Million Deficit Seen By Execs Of HemisFair '68

SAN ANTONIO (AP) — Underwriters of HemisFair '68 owe about \$1 million in paying off the deficit of HemisFair '68, a report to the expositions' executive committee showed Tuesday.

However, the amount of the deficit was not revealed.

Officials said the final HemisFair '68 audit will be made public at a meeting Friday, Jan. 17. Sources have said the deficit would be in the \$5 million range, although it would be borne by three sets of underwriters.

The fair closed its six-month run Oct. 6. It now is city property, called HemisFair Plaza, and is open to the public at a small fee.

Tuesday's report said \$196,000 is owed from the first underwriting, \$683,000 from the second and \$121,000 from the third.

H. B. Zachry, construction magnate and board chairman of the fair, said \$30,000 of the third underwriting has been committed.

Claims against the fair and the city include a lawsuit by four construction firms seeking \$726,000, and one by another construction firm seeking \$133,000.

THE BATTALION

Opinions expressed in The Battalion are those of the student writers only. The Battalion is a non-tax-supported, non-profit, self-supporting educational enterprise edited and operated by students as a university and community newspaper.

Members of the Student Publications Board are: Jim Lindsey, chairman; Dr. David Bowers, College of Liberal Arts; F. S. White, College of Engineering; Dr. Donald R. Clark, College of Veterinary Medicine; and Hal Taylor, College of Agriculture.

The Battalion, a student newspaper at Texas A&M is published in College Station, Texas daily except Saturday, Sunday, and Monday, and holiday periods, September through May, and once a week during summer school.
