

New Student Disorders Flare

By THE ASSOCIATED PRESS

New student disorders flared Monday at the University of Wisconsin and at San Francisco State College.

Scores of National Guardsmen with fixed bayonets moved in on a demonstration at Wisconsin, but it ended without violence.

At San Francisco State, the spring semester got off to a rocky start as Negro students broke up a class taught by a professor opposed to a faculty strike.

However, striking students and teachers went to classes at San Francisco to prevent cancellation of new classes for lack of attendance. They vowed to resume the strike once the new curriculum is established.

IT WAS quiet at Duke University in Durham, N.C., where officials announced settlement with Negro students of a dispute

which set off disorders last week.

The University of Chicago was cleaning up its administration building after a 15-day student sit-in.

At Notre Dame University in South Bend, Ind., which has been relatively free of protests, the president announced he would expel students and prosecute non-students who try forcible disruption. The president, the Rev. Theodore M. Hesburgh, said he would give demonstrators 15 minutes for "meditation" before moving against them.

THE NEW confrontation at Wisconsin apparently delayed immediate withdrawal of the 1,900 National Guardsmen assigned to the Madison campus by Gov. Warren P. Knowles.

Several hundred students surged through an administration and class building chanting, "Support the black demands,"

support the black demands." At San Francisco, the return to class was a new tactic by the dissident teachers and students. Members of the AFL-CIO American Foundation of Teachers handed out leaflets explaining that the new classes might be canceled if nobody showed up.

DPS Investigating CS Girl's Death

Department of Public Safety officials were investigating Monday whether a malfunction caused a car to go out of control and kill Nancy Ruck, 15, of College Station Saturday night.

Miss Ruck, daughter of Mr. and Mrs. Raymond Ruck of 1003 Village Drive, was dead on arrival at St. Joseph's Hospital, Bryan, at approximately 10:20 p.m.

She was struck as she and a companion, Donald Ellis, 15, also of College Station, walked back to their car from a birthday party. The accident occurred six miles from Bryan on State Highway 21.

Ellis was reported Monday as being in fair condition, according to hospital officials.

Calhoun To Chair Committee To Study Sea Oil Spillage

Dr. John C. Calhoun, Jr., A&M vice president for programs, has been appointed chairman of the Presidential panel to study the Santa Barbara off-shore oil spillage and recommend means to avoid such mishaps.

Announcement of the 14-member Santa Barbara Oil Spill Panel was made by Dr. Lee A. DuBridge, President Nixon's science adviser.

Calhoun emphasized his panel is completely separate from the one which Secretary of the Interior Walter J. Hickel is forming to review regulations governing offshore drilling.

The group headed by Calhoun is a science and engineering panel which will concern itself with four basic areas outlined by DuBridge:

"How the federal government can best and most rapidly assist in restoring the beaches and waters around Santa Barbara; how best to prevent this kind of sudden and massive oil pollution; how the methods of existing technology can be developed to control and remove oil pollution, and what avenues of research can be identified where resources will be most profitably committed in solving this problem."

Dr. DuBridge stressed the Calhoun panel will not make a de-

A giant communications satellite proposed by Hughes Aircraft Co. to meet the global communications explosion of the 1970s will carry nearly 6,000 two-way telephone calls or 12 color television programs simultaneously.

Beverly Braley TOURS-TRAVEL MSC LOBBY

Engineers:

Good ideas get off the ground at Boeing.

So do careers. Let's talk about it on Monday and Tuesday, February 24 and 25.

At The Boeing Company, you can be a member of a team that's famous for making good ideas fly.

Such as the 707, America's first jetliner. And the 727 trijet, the 737 twinjet, Boeing-Vertol helicopters, the Boeing-built first stage for the National Aeronautics and Space Administration's Apollo/Saturn V moon rocket. And the NASA Lunar Orbiter, the USAF Minuteman, and the USN hydrofoil gunboat *Tucumcari*.

Boeing has exciting new projects on the way up, too. The 747 superjet, world's largest and fastest commercial jetliner, scheduled for airline delivery in 1969. America's supersonic transport, now being developed at the company's Commercial Airplane Division. Plus other advanced programs in early development and on Boeing drawing boards.

They can help get your career off to a dynamic start in applied research, design, test, manufacturing, service or facilities engineering or computer technology.

Visit your college placement office and schedule an interview with the Boeing representative. Boeing is an equal opportunity employer.
