

Moore To Keynote A&M Short School

Federal Water Pollution Control Commissioner Joe G. Moore will be keynote speaker at the 51st Texas Water Utilities Association's Short School, opening here Sunday.

R. H. Hayes, Tyler city manager and association president, said Moore will present his administration's plans in assisting with water pollution control man-power shortage.

Moore will speak Monday at the general session starting at 8:30 a.m. in the Memorial Student Center.

Opening general sessions will be Glenn R. Hitchkiss, sergeant-at-arms, Texas Water Utilities Association, Corpus Christi, who will deliver the invocation.

Hugh C. Yantis, executive director, Texas Water Quality Board, Austin, will deliver a Progress Report of Water Pollution Control at the State Level."

Four waste water conferences, with delegates selecting their choice, will conclude the morning session.

AFTERNOON sessions will be highlighted by a special management program conducted by the Supervisory Development Section.

Afternoon sessions also include a return to the waste water conferences.

Hayes said he anticipates "a minimum of 900 persons" for the short school which ends March 7.

A symposium covering research in the areas of water supply and water pollution control at the Texas universities is a part of this year's school, Hayes said. Graduate student research completed in universities during the past 15 months will be presented.

The annual banquet will be held at 7 p.m., March 5, in the Ramada Inn. Guest speaker will be Newt Hielscher of Shreveport, La.

AP PHOTOGRAPHER WOUNDED
Two South Vietnamese Rangers assist Associated Press Photographer Dan Van Phuoc, center, after an enemy grenade exploded near his face during a firefight six miles southwest of Da Nang. The 26-year-old Vietnamese remains in critical condition after losing his right eye. This is his fourth wound of the war.

Ingersoll To Speak At JETS Confab

Nearly 1,000 high school students, teachers, counselors and professional engineers will converge here March 7 for the annual state conference of the Junior Engineering Technical Society.

Keynote speaker for the JETS meeting will be Dr. A. C. Ingersoll, dean of engineering at the University of Southern California, who will discuss "Why A Career In Engineering?"

Assistant Engineering Dean J. G. McGuire, who also serves as JETS state coordinator, said a highlight of the program for the students will be morning and afternoon competitive test sessions, followed by a tour of College of Engineering facilities.

The students will compete in chemistry, engineering graphics, mathematics, physics and slide rule, with the winners announced at the close of the meeting. The final session also will include presentation of JETS scholarships and awards for technical papers.

While the students are taking tests and tours, visiting teachers, counselors and engineers will participate in seminars.

The morning seminar, entitled "The Interface of High School Math and Science With the Engineering Curricula," will be moderated by Dr. C. H. Samson, head of the Civil Engineering Department.

PANELISTS include Mrs. Thelma Hammerling, director of mathematics instruction for the Houston Independent School District; Howard Behrens, physics teacher at Lee High School in Houston; Dr. W. B. Ledbetter, associate professor of civil engineering, and Dr. E. J. Dowdy, assistant professor of nuclear engineering.

L. D. Webb of the Civil Engineering Department will coordinate the afternoon seminar, which will include separate sessions on "Applications of Mathematics and Science in Aerodynamics" and "Application of Mathematics and Science in Electronics."

A. E. Cronk, head of the university's Aerospace Engineering Department, will direct the aerodynamics presentation and Dr. W. B. Jones, head of the Electrical Engineering Department, will direct the other.

Featured speaker at the closing session will be J. Kelly Elliott of Houston, president of Macco Oil Tool Co. and chairman of the Texas Advisory Committee for JETS.

President Earl Rudder and Dean of Engineering Fred Benson will present welcoming addresses, with Dr. Horace R. By-

ers, academic vice president, representing the university at the closing session and presenting the awards.

While noting that most of the participants will be members of some 100 JETS chapters in the state, Dean McGuire emphasized that all high school students and teachers are invited to attend the conference.

Both the Colleges of Engineering and Agriculture will conduct open house in conjunction with the conference. The open house will continue the following day, Saturday, March 8.

JETS, McGuire explained, was organized to inform high school students and their teachers and parents about the engineering profession.

Officers Get Decorations From McCoy

Decorations were awarded Thursday to Army Maj. Austin J. Christensen of Kingman, Ariz., and Capt. Donald R. Goates of Waxahachie here.

The Commendation Medal was pinned on Major Christensen and the Purple Heart on Captain Goates by Col. Jim H. McCoy, commandant.

Major Christensen, 39, was cited for service as operations and executive officer of the 538th Engineer Battalion (Construction) in Thailand. The engineer officer is studying for a master's degree in mechanical engineering.

A 1953 graduate of Oregon State, he has served in Germany, Fort Belvoir, Va.; Vietnam and Pittsburgh, Pa. The major and his wife Evelyn and six children reside at 2216 Truman.

An assistant professor and junior military science instructor in the Military Science Department, Captain Goates was wounded while on a search and destroy mission on a canal in the Keim Giang Province of Vietnam. He was with a Military Advisory Command-Vietnam advance team.

The 1965 East Texas State graduate served in the Air Force a year and transferred to the Army two years ago. Goates also wears the Cross of Gallantry with Bronze Star.

The captain, his wife Patsy and daughter reside at 1201 Westover.

A&M To Receive Magnetometers

In the not too distant future A&M will possess the most sensitive field magnetometers in the world, physicist-designer Dr. Robert R. Unterberger disclosed.

Possession of two optically pumped rubidium 87 vapor magnetometers, a gift to the College of Geosciences from Chevron Oil Field Research Company of La Habra, Calif., will already permit magnetic surveys on land in order to determine possible subsurface configurations, he said.

Unterberger also plans to use the equipment in offshore operations in the Gulf of Mexico in cooperation with oceanographers here.

Unterberger, who came here as a geophysics professor in August, 1968, designed the equipment between 1958 and 1961 while a member of the La Habra Laboratory. Design changes anticipated by Unterberger are expected to make the equipment "the most sensitive in the world."

He said possession gives A&M the capability of measuring the earth's magnetic field and its changes to a "sensitivity of almost one hundred times the present (proton precession) equipment's sensitivity."

The equipment, valued near \$40,000 and already responsible for more than half million dollars in research for Chevron, was donated through explorative vice president J. E. McCall of Chevron, a wholly-owned subsidiary of Standard Oil Company of California.

Each of the two magnetometers consists of a sensing head, an air-conditioned Volkswagen van complete with electronic equipment and a small trailer on which is built a 3,500-watt Onan power supply. The supply is a gasoline engine-driven electric generator.

Agnew Pledges Opposition To Campus Riots

WASHINGTON (AP)—Vice President Spiro T. Agnew said today the federal government will not permit campus demonstrations to interfere with the rights of students who go to college to learn.

Addressing a closed meeting of the National Governors Conference Agnew said President Nixon is not trying to dictate academic policy, but does not want the issue of academic freedom distorted to fit the purpose of campus dissidents.

No specific actions to avoid the campus disruptions were reported. Agnew's remarks paralleled a resolution stating that, "Lawless acts by a small segment of the student population must not be allowed to interfere with the vast number of students who are seeking to exercise their educational opportunities."

The resolution was recommended to the full governors' conference by its executive committee. It would extend full support to Nixon in preserving and advancing higher education.

Rangers To See Foreign Weapons

A display of foreign military weapons will be discussed Tuesday during a Ranger Company meeting.

North Atlantic Treaty Organization and Soviet bloc nation's weapons will be exhibited for Ranger Company members' familiarization, announced Sherman D. Roberts of Bryan.

The company commander said the 7:30 p.m. meeting will be at the Trigon.

Peter Court of Steele Court and Army Capt. N. H. Robb, Military Science department instructor, will supply weapons in use in Vietnam and formerly employed by German, Belgian and Italian army soldiers, among others.

Captain Robb, who has a semi-automatic rifle captured from the Vietcong, will give a talk on weapons employment.

The Ranger Company is composed of Army ROTC cadets who want to supplement their regular training. Meetings are devoted to presentations on various military subjects. Platoon problems are arranged for cadets to practice small unit tactics in the field.
